EXECUTIVE SUMMARY

A capital facilities element is one of the comprehensive plan elements required by Washington's Growth Management Act (GMA). Capital facilities generally have long useful lives, significant costs and tend not to be mobile.

The GMA requires that capital facilities elements include an inventory of existing capital facilities showing locations and capacities, a forecast of future needs for such capital facilities, proposed locations and capacities of new or expanded capital facilities and at least a six-year plan to finance capital facilities with identified sources of funding. The GMA also requires that the land use element be reassessed if probable funding falls short of existing needs.

This document is the City's six-year Capital Facilities Plan (CFP). The CFP, in conjunction with other City adopted documents, satisfies the GMA requirement for a Capital Facilities Element. It addresses one of the GMA's basic tenets: to provide adequate facilities to support development in accordance with locally adopted level of service standards.

This CFP will enable the City to: (1) make informed decisions about its investment of public dollars, and (2) make timely decisions about maintaining level of service in accordance with this CFP and other adopted plans.

CAPITAL FACILITIES PLAN CONTENT

This CFP consists of the following:

| Chapter 1. | Introduction | Purpose of CFP, statutory requirements, methodology. |
|------------|----------------------|--|
| Chapter 2. | Goals and Policies | Goals and policies related to the provision of capital facilities. |
| Chapter 3. | Capital Improvements | Proposed capital projects, which include the financing plan and reconciliation of project capacity to level of service (LOS) standards. |

This CFP is a companion document to the Capital Facilities Element of the Auburn Comprehensive Plan. The Capital Facilities Element of the Auburn Comprehensive Plan identifies the City's planning approach and policy framework for the provision of capital facilities. This CFP provides the background inventory, identifies proposed projects and establishes the six-year capital facilities plan for financing capital facilities.

The comprehensive plan contains timeframes that are the intended framework for future funding decisions and within which future actions and decisions are intended to occur. However, these timeframes are estimates; depending on factors involved in the processing of applications and project work, and the availability of funding, the timing may change from the included timeframes. The framework does not represent actual commitments by the City of Auburn that may depend on funding resources available.

GROWTH ASSUMPTIONS

In planning for capital facilities, contemplation of future growth needs to be considered. The CFP is based on the following City population forecast:

| Year | Population |
|------|------------|
| 2018 | 80,615 |
| 2019 | 81,905 |
| 2024 | 88,670 |

The population forecasts are based on information from the State of Washington Office of Financial Management (OFM) as well as estimates developed by the City of Auburn Planning and Community Development Department.

CAPITAL COSTS OF FACILITIES

Based on the analysis of capital improvements contained in this document, the cost of Cityowned and managed capital improvements for 2019- 2024 is summarized as follows:

| Type of Facility | 2019 - 2024 |
|---------------------------------|----------------|
| Transportation - Arterial (102) | \$ 107,387,866 |
| Transportation - Local (103) | 11,050,000 |
| Transportation - Street (105) | 20,661,580 |
| Water | 47,210,911 |
| Sanitary Sewer | 13,677,000 |
| Storm Drainage | 19,130,800 |
| Parks, Arts & Recreation | 14,668,500 |
| General Municipal Buildings | 7,839,600 |
| Community Improvements | 10,868,700 |
| Airport | 14,057,700 |
| Cemetery | 738,000 |
| Total | \$ 267,290,657 |

FINANCING FOR CAPITAL FACILITIES

The financing plan for the citywide capital improvements includes:

| Funding Source | 2019 - 2024 | Capital Facility |
|--------------------------------------|----------------|-----------------------------------|
| Grants | 85,880,360 | Transportation |
| (Includes grant funding that has not | 2,730,000 | Parks, Arts & Recreation |
| been secured) | 975,000 | General Municipal Buildings |
| | 1,470,300 | Community Improvements |
| | 750,000 | Water |
| | 400,000 | Storm Drainage |
| | 5,908,500 | Airport |
| User Fees / Fund Balance | 39,038,877 | Water |
| | 14,244,667 | Sewer |
| | 19,298,467 | Storm Drainage |
| | 705,000 | Cemetery |
| | 285,000 | Equipment Rental |
| | 2,049,200 | Airport |
| Arterial Street Fund | 4,255,550 | Transportation |
| Local Street Fund | 650,000 | Transportation |
| Arterial Street Preservation Fund | 6,031,820 | Transportation |
| Local Revitalization Fund | 384,500 | Community Improvements |
| Bond Proceeds | 2,750,000 | Airport |
| | 7,178,300 | Water |
| DWSRF Loan | 811,400 | Water |
| Municipal Parks Fund | 325,000 | Parks, Arts & Recreation |
| Property Tax | 953,500 | Parks, Arts & Recreation |
| Utility Tax | 6,325,000 | Transportation |
| Mitigation/Impact Fees | 21,556,716 | Transportation |
| | 5,905,000 | Parks, Arts & Recreation |
| | 1,000,000 | General Municipal Buildings |
| | 530,000 | Community Improvements |
| REET 1 | 4,734,400 | General Municipal Buildings |
| | 103,600 | Community Improvements |
| REET 2 | 7,130,300 | Community Improvements |
| | 180,000 | Parks, Arts & Recreation |
| | 3,500,000 | Transportation - Local Streets |
| Other Sources | 4,000,000 | Transportation - Arterial Streets |
| | 6,000,000 | Transportation - Local Streets |
| | 1,250,000 | Community Improvements |
| | 42,200 | General Municipal Buildings |
| | 3,350,000 | Airport |
| | | |
| | 33,000 | Cemetery |
| | 4,575,000 | Parks, Arts & Recreation |
| Total | \$ 267,290,657 | |

SUMMARY OF IMPACTS ON FUTURE OPERATING BUDGETS

The forecasted impacts of new capital facilities on the City's future operating budgets (2020-2025) are as follows:

| | Budget Year: | 2020 | 2021 | 2022 | 2023 | 2024 | 2025 | Total |
|---|-----------------------------|-------------|------------|-----------|-----------|-----------|------------|------------|
| 1 | Transportation | \$- | \$ 5,000 | \$ 11,600 | \$ 29,600 | \$ 55,600 | \$ 165,500 | \$ 267,300 |
| 2 | Water | 600 | 600 | 600 | 600 | 1,200 | 1,200 | 4,800 |
| 3 | Sanitary Sewer | - | - | - | - | - | - | - |
| 4 | Storm Drainage | - | - | - | - | - | - | - |
| 5 | Parks, Arts and Recreation | 15,000 | 20,000 | 22,000 | 22,000 | 22,000 | 27,000 | 128,000 |
| 6 | General Municipal Buildings | 95,000 | 95,000 | 95,000 | 95,000 | 95,000 | 95,000 | 570,000 |
| 7 | Community Improvements | (127,500) | (127,500) | (127,500) | (117,500) | (117,500) | (117,500) | (735,000) |
| 8 | Airport | 2,000 | 2,000 | 2,000 | 4,000 | 4,000 | 6,000 | 20,000 |
| 9 | Cemetery | - | - | - | - | - | - | - |
| | | | | | | | | |
| | Total | \$ (14,900) | \$ (4,900) | \$ 3,700 | \$ 33,700 | \$ 60,300 | \$ 177,200 | \$ 255,100 |

Project summary details are located on the following pages:

| Transportation | page | 84 |
|-----------------------------|------|-----|
| Water | page | 128 |

LEVEL OF SERVICE (LOS) CONSEQUENCES OF THE CFP

Based on the proposed six-year capital projects and the projected population increase of 8,055 (10%) between 2019 and 2024, the LOS for the following City-owned public facilities will change as follows:

The LOS for the following facilities will be increased as a result of the CFP, comparing the 2019 LOS to the projected 2024 LOS.

| CAPITAL FACILITY | LOS UNITS | 2019 LOS | 2024 LOS |
|--------------------|----------------------|----------|-------------|
| | | | (Projected) |
| Community Parks | Acres per 1,000 Pop. | 2.87 | 3.15 |
| Linear Parks | Acres per 1,000 Pop. | 0.20 | 0.23 |
| Neighborhood Parks | Acres per 1,000 Pop. | 0.71 | 0.77 |

The LOS for the following facilities will be maintained as a result of the CFP.

| CAPITAL FACILITY | LOS UNITS | 2019 LOS | 2024 LOS |
|---|----------------------------|----------|-------------|
| | | | (Projected) |
| Roads | Volume/Capacity Ratio | "D" | "D" |
| Airport | % Air Operations Support | 100% | 100% |
| Sanitary Sewer | Residential GPCPD (Note 1) | 171.00 | 171.00 |
| Storm Drainage | N/A | | |
| Water | Residential GPCPD (Note 1) | 230.00 | 230.00 |
| Note 1: GPCPD = Gallons per Customer per Day | | | |

The LOS for the following facilities will be decreased as a result of the CFP, comparing the 2019 LOS to the projected 2024 LOS.

| CAPITAL FACILITY | LOS UNITS | 2019 LOS | 2024 LOS |
|-----------------------------|-----------------------------|----------|-------------|
| | | | (Projected) |
| Cemetery | Burial Plots per 1,000 Pop. | 37.00 | 35.00 |
| Fire Protection | Apparatus per 1,000 Pop. | 0.21 | 0.20 |
| General Municipal Buildings | Sq. Ft. per 1,000 Pop. | 3,726.07 | 3,486.91 |
| Open Space | Acres per 1,000 Pop. | 4.72 | 4.54 |
| Senior Center | Sq. Ft. per 1,000 Pop. | 148.95 | 137.59 |
| Special Use Areas | Acres per 1,000 Pop. | 3.11 | 2.87 |

Level of Service (LOS) is a common measure used to determine the efficiency or effectiveness of services. For the City of Auburn, LOS targets serves as a means to assess the adequacy of public facilities in meeting the needs of the population for which it serves.

For example, in the case of park space, when there is an increase in population without a corresponding increase in park acreage, the LOS unit of measure (acres per 1,000 population) will decline, indicating a potential need to increase the total amount of park acreage to keep pace with population growth. On the other hand, a slight increase in population, coupled with a large increase in facilities, will result in an increased LOS. For example, facilities such as buildings or burial plots may be constructed or expanded to keep pace with anticipated population growth. While this will have the effect of increasing LOS in the short-term, in the longer-term, the LOS will gradually decline to the targeted level based on forecasted population. The impact of population growth to the LOS for facilities will vary depending on the type of facility and long range planning by the City.

CFP ELEMENT SOURCE DOCUMENTS

Documents used in preparing this Capital Facilities Plan (CFP) are principally the comprehensive plans for the various public facilities included in this CFP. These individual comprehensive plans provide detailed identification of projects and identify their (projects) proposed funding sources.

City documents include:

- City-wide Comprehensive Land Use Plan (2015)
- City Municipal Airport Master Plan Update (2012-2032)
- City Comprehensive Water Plan (2015)
- City Comprehensive Transportation Plan (2015) and Six Year Transportation Improvement Program (2019-2024)
- City Comprehensive Drainage Plan (2015)
- City Comprehensive Sewer Plan (2015)
- City 2019-20 Biennial Budget and 2017 Annual Financial Report; and,
- City Parks, Recreation & Open Space Plan Update (2015), as well as numerous other planning and financial documents.

All documents are available for public inspection at the City of Auburn.

CHAPTER 1

INTRODUCTION

PURPOSE

The Capital Facilities Plan (CFP) is a 6-year plan (2019-2024) for capital improvements that support the City of Auburn's current and future growth.

In this plan, funding for general government projects is identified. To maintain consistency with individual master and utility comprehensive plans, applicable projects in the 6-year window of those master/utility plans are included in this CFP. The CFP also identifies LOS standards, where applicable, for each public facility.

STATUTORY REQUIREMENTS FOR CAPITAL FACILITIES ELEMENTS

RCW 36.70A.070(3)(d) requires that the comprehensive plan capital facilities element include "a six-year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes." RCW 36.70A.070(3)(e) requires that all capital facilities have "probable funding" to pay for capital facility needs, or else the City must "reassess the land use element."

In addition, the capital facilities element must include the location and capacity of existing facilities, a forecast of future needs, and their proposed locations and capacities. The State Growth Management Act (GMA) guidelines suggest that this analysis be accomplished for water systems, sanitary sewer systems, storm water facilities, schools, parks and recreation facilities, police and fire protection facilities.

The GMA also seeks the selection of level of service standards for capital facilities. As a result, public facilities in the CFP should be based on quantifiable, objective measures of capacity such as traffic volume, capacity per mile of road and acres of park per capita. In some instances, though, level of service may best be expressed in terms of qualitative statements of satisfaction with a particular public facility. Factors that influence local level of service standards include, but are not limited to, community goals, national and local standards, and Federal and State mandates.

To be effective, the CFP must be updated on a regular basis. State GMA guidelines suggest that the CFP be updated at least every two years. In 2007, the City transitioned to a biennial budget. With this in mind, the City will follow these guidelines and update the CFP at least every two years, incorporating the capital facilities improvements in the City's biennial budget process.

CONCURRENCY AND LEVEL OF SERVICE

Concurrency

The GMA requires that jurisdictions have certain capital facilities in place or available within a specified time frame when development occurs. This concept is called concurrency. Under the GMA, concurrency is required for transportation facilities and is recommended by the State for certain other public facilities, namely potable water and sanitary sewer. Concurrency has a direct relationship to level of service. The importance of concurrency to capital facilities planning is that development may be denied if it reduces the level of service for a capital facility below the locally adopted minimum. The level of service is unique for each type of facility and is presented in the subsequent sections.

Explanation of Level of Service

As indicated earlier, the GMA requires that level of service be established for certain transportation facilities for the purposes of applying concurrency to development proposals. The State GMA guidelines recommend the adoption of level of service standards for other capital facilities to measure the provision of adequate public facilities.

Typically, measures of level of service are expressed as ratios of facility capacity to demand (i.e., actual or potential users). Table 1-1 lists generic examples of level of service measures for some capital facilities:

| Type of Facility | Sample Level of Service Measure |
|-----------------------------|---|
| General Municipal Buildings | Square feet per 1,000 population |
| Parks | Acres per 1,000 population |
| Roads and Streets | Ratio of actual volume to design capacity |
| Sewer / Water | Gallons per customer per day |

TABLE 1-1 Sample Level of Service Measurements

The need for capital facilities is largely determined by a community's adopted LOS standards and whether or not the community has formally designated capital facilities, other than transportation, as necessary for development to meet the concurrency test. The CFP itself is therefore largely influenced by the selection of the level of service standards. Level of service standards are measures of the quality of life in the City. The standards should be based on the City's vision of its future and its values.

IMPLEMENTATION

Implementation of the CFP requires constant monitoring and evaluation. The CFP is sensitive to funding and revenue availability and therefore needs to be constantly monitored against variations in available resources. To facilitate its implementation, the CFP should be kept current.

Update of Capital Facilities Plan

Perhaps the most desirable way to keep the CFP current is to update it regularly so the sixyear plan is a rolling CFP. Again, the State recommends that the CFP be updated at least biennially.

The City of Auburn will seek to update the CFP at least biennially in conjunction with the budget process. Future updates will consider:

- A. Revision of population projections, including annexations;
- B. Update of inventory of public facilities;
- C. Update of costs of public facilities;
- D. Update of public facilities requirements analysis (actual level of service compared to adopted standards);
- E. Update of revenue forecasts;
- F. Revise and develop capital improvement projects for the next six fiscal years; and,
- G. Update analysis of financial capacity.

Amendments to the CFP, including amendments to level of service standards, capital projects, and/or the financing plan sources of revenue are all actions that can keep the CFP current and relevant to City decision-making.

CHAPTER 2

GOALS AND POLICIES

This chapter identifies goals and policies specific to the City's provision of capital facilities.

Goal 1 Provide a variety of responses to the demands of growth on public facilities.

- Policy 1.1 Establish land use patterns that optimize the use of public facilities.
- Policy 1.2 Provide additional public facility capacity when existing facilities are used to their maximum level of efficiency (consistent with adopted standards for level of service).
- Policy 1.3 Encourage development where new public facilities can be provided in an efficient manner.
- Policy 1.4 Exempt the following from the concurrency management program:
 - 1.4.1 Development vested by RCW 19.27.095, 58.17.033 or 58.17.170.
 - 1.4.2 Development that creates no added impact on public facilities.
 - 1.4.3 Expansions of existing development that were disclosed and tested for concurrency as part of the original application.

Goal 2 Provide needed public facilities that are within the ability of the City to fund or within the City's authority to require others to provide.

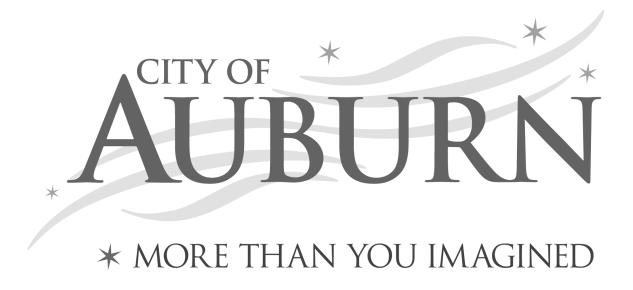

- Policy 2.1 Establish level of service standards that are achievable with the financing plan of this Capital Facilities Plan.
- Policy 2.2 Base the financing plan for public facilities on realistic estimates of current local revenues and external revenues that are reasonably anticipated to be received by the City.
- Policy 2.3 Match revenue sources to capital projects based on sound fiscal policies.
 - 2.3.1 The City shall continue to fund utility costs through utility enterprise funds, based on user fees and grants. Public facilities included in utilities are sewer, solid waste, storm drainage, and water.
 - 2.3.2 Where feasible pursue joint venture facility construction, construction timing, and other facility coordination measures for City provided facilities, as well as with school districts and other potential partners in developing public facilities.
 - 2.3.3 The City shall continue to assist through direct participation, LIDs and payback agreements, where appropriate and financially feasible. Where funding is available, the City may participate in developer initiated facility extensions or improvements, but only to the extent that the improvements benefit the broader public interest, and are consistent with the policies of this Capital Facilities Plan.
- Policy 2.4 If the projected funding is inadequate to finance needed public facilities and utilities based on adopted level of service standards and forecasted growth,

the City will do one or more of the following to achieve a balance between available revenue and needed public facilities:

- 2.4.1 Lower the level of service standards;
- 2.4.2 Increase the amount of revenue from existing sources;
- 2.4.3 Adopt new sources of revenue;
- 2.4.4 Require developers to provide such facilities at their own expense; and/or
- 2.4.5 Amend the Land Use Element to reduce the need for additional public facilities.
- Policy 2.5 Both existing and future development will pay for the costs of needed capital improvements.
 - 2.5.1 Ensure that existing development pays for capital improvements that reduce or eliminate existing deficiencies, and pays for some or all of the cost to replace obsolete or worn out facilities. Existing development may also pay a portion of the cost of capital improvements needed by future development. Existing development's payments may take the form of user fees, charges for services, special assessments and taxes.
 - 2.5.2 Ensure that future development pays a proportionate share of the cost of new facilities that it requires. Future development may also pay a portion of the cost to replace obsolete or worn-out facilities. Future development's payments may take the form of voluntary contributions for the benefit of any public facility, impact fees, mitigation payments, capacity fees, dedications of land, provision of public facilities, and future payments of user's fees, charges for services, special assessments and taxes.
- Policy 2.6 The City will determine the priority of public facility capital improvements using the following criteria as general guidelines. Any revenue source that cannot be used for the highest priority will be used beginning with the highest priority for which the revenue can legally be expended.
 - 2.6.1 Projects that eliminate hazardous conditions.
 - 2.6.2 Refurbishment of existing facilities that contribute to achieving or maintaining standards for adopted level of service.
 - 2.6.3 New or expanded facilities that reduce or eliminate deficiencies in level of service for existing demand.
 - 2.6.4 New or expanded facilities that provide the adopted level of service for new development and redevelopment during the next six fiscal years.
 - 2.6.5 Capital improvements that significantly reduce the operating cost of providing a service or facility, or otherwise mitigate impacts of public facilities on future operating budgets.
 - 2.6.6 Capital improvements that contribute to stabilizing and developing

the economy of the City.

- 2.6.7 Project priorities may also involve additional criteria that are unique to each type of public facility, as described in other elements of this Comprehensive Plan.
- Policy 2.7 Ensure that the ongoing operating and maintenance costs of a capital facility are financially feasible prior to constructing the facility.
- Goal 3 Protect public health, environmental quality, and neighborhood stability and viability through the appropriate design and installation of public facilities.
- Policy 3.1 Promote conservation of energy, water and other natural resources in the location and design of public facilities.
- Policy 3.2 Require the separation of sanitary and storm sewer facilities wherever combined sewers may be discovered.
- Policy 3.3 Practice efficient and environmentally responsible maintenance and operating procedures.
- Policy 3.4 The siting, design, construction and improvement of all public buildings shall be done in full compliance with the Americans with Disabilities Act (ADA).
- Policy 3.5 Promote economic and community stability and growth through strategic investments in public facilities and public private/partnerships.
- Goal 4 Make the Capital Facilities Plan consistent with other elements of the comprehensive plan, and to the extent feasible with other city, county, regional and state adopted plans.
- Policy 4.1 Ensure that the growth and development assumptions used in the Capital Facilities Plan are consistent with similar assumptions in other elements of the comprehensive plan.
- Policy 4.2 Coordinate with non-city providers of public facilities on a joint program for maintaining applicable level of service standards, concurrency requirements, funding and construction of public facilities.
- Goal 5 Provide public facilities that provide a sense of community that is inclusive of diverse populations.
- Policy 5.1 Contribute to community pride and foster a sense of community through provision of public facilities that create a community-gathering place for neighbors, family and friends.
- Policy 5.2 Through provision of public facilities, offer a broad range of activities promoting social interactions especially with new residents.
- Policy 5.3 Provide maximum flexibility and multiple uses through design of public facilities that are adaptable to changing interests.
- Policy 5.4 Provide a community center facility that is financially feasible, affordable for participants, and can generate revenue to offset a portion of the operating costs.

CHAPTER 3

CAPITAL IMPROVEMENTS

1. INTRODUCTION

This CFP includes City capital improvement projects and the financing plan to pay for those projects. It also contains the inventory of existing City facilities, and identifies level of service standards, where applicable. Each type of City public facility is presented in a separate subsection that follows a standard format. Throughout this section, tables of data are identified with abbreviations that correspond to the type of facility. For example, Table W-1 refers to Table 1 for Water (Supply and Distribution). Each abbreviation corresponds to the name of the type of facility.

1. Narrative Summary

This is an overview of the data, with sections devoted to Current Facilities, Level of Service, Capital Facilities Projects and Financing, and Impact on Future Operating Budgets.

2. Inventory of Facilities (Table X-1)

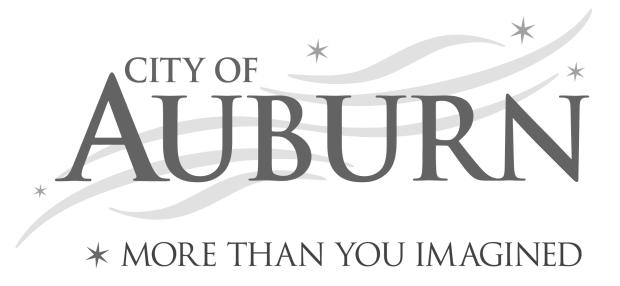

This is a list of existing capital facilities, including the name, capacity (for reference to level of service), and location. This table also includes any proposed capital projects and the planned inventory total through December 31, 2024.

3. Capital Projects and Financing Plan (Table X-2, X-2A and X-2B)

This list of capital improvements identifies existing deficiencies, identifies facilities needed for future growth, and identifies the need to repair or replace obsolete or worn out facilities through December 31, 2024. Each list shows the proposed financing plan followed by individual worksheets showing the project detail.

4. Impact on Future Operating Budgets (Table X-3)

This is a list of capital projects and the forecasted impacts on the City's future operating budgets (2020 – 2025).

TRANSPORTATION

Current Facilities

<u>Roadways:</u> The City's street system consists of a network of approximately 216 miles of arterials, collectors, local streets and alleys. Existing non-motorized facilities include a mix of trails, sidewalks, and both dedicated and shared bicycle facilities.

<u>Signals and ITS:</u> The City's transportation system also includes ninety-five traffic signals, a Traffic Control Center employing Intelligent Transportation Systems (ITS), which centrally directs the signals, more than fifty CCTV cameras, and various traffic beacons all communicating on a network of copper wire and fiber optic cable. The City also has two roundabouts.

<u>Transit:</u> King County Metro Transit, Sound Transit and Pierce Transit serve the Auburn area. Auburn is currently served by eight Metro, two Sound Transit, and one Pierce Transit bus route. In addition, Sound Transit "Sounder" commuter trains provide peak hour and midday service at the Auburn Station. The Sounder also provides special event service to selected sporting events. Park and ride facilities and the Auburn Station support bus and rail service.

Level of Service (LOS)

Washington's Growth Management Act (GMA) requires Level of Service (LOS) standards for both arterials and transit routes. The GMA requires that each jurisdiction's LOS standards be coordinated within the region and be supported by local ordinance, but the actual standards and the methods used are determined by each local jurisdiction.

Under GMA, the focus is on the performance of the whole road system, not on individual intersections or roadways. LOS standards are a tool to help keep the transportation system in balance with the needs of forecast population growth and development. Table T-1a summarizes the LOS definitions.

Table T-1aDefinition of Urban Street Level of Service (LOS)

LOS A - describes primarily free flow operations at average travel speeds, usually about 90 percent of the free flow speed for the given street class. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Control delay at signalized intersections is minimal.

LOS B - describes reasonably unimpeded operations at average travel speeds, usually about 70 percent of the free flow speed for the street class. The ability to maneuver within the traffic stream is only slightly restricted, and stopped delays are not bothersome.

LOS C - describes stable conditions; however, ability to maneuver and change lanes in midblock locations may be more restricted than in LOS B, and longer queues, adverse signal coordination, or both may contribute to lower average travel speeds of about 50 percent of the free flow speed for the street class.

LOS D - borders on a range in which small increases in flow may cause substantial increases in delay and decreases in travel speed. LOS D may be due to adverse signal progression, inappropriate signal timing, high volumes, or some combination of these factors. Average travel speeds are about 40 percent of free flow speed.

LOS E - is characterized by significant delays and average travel speeds of 33 percent or less of the free flow speed. Such operations are caused by a combination of adverse progression, high signal density, high volumes, extensive delays at critical intersections, and inappropriate signal timing.

LOS F - is characterized by urban street flow at extremely low speeds, typically one-third to one-fourth of the free flow speed. Intersection congestion is likely at critical signalized locations, with high delays, high volumes and extensive queuing.

Source: 2010 Highway Capacity Manual, Special Report 209, Transportation Research Board, Washington, D.C. 2010, page 10-5

A methodology and set of standards have been drafted for the City of Auburn Comprehensive Plan. The standards help determine concurrency (i.e., balance) between the transportation and land use elements of the City's Comprehensive Plan, as required by the GMA. The City has four choices if it is determined that standards cannot be met.

- Modify the land use plan, placing tighter controls on the amount and type of development to reduce traffic.
- Construct additional transportation facilities to support increased travel demand from new development.
- Implement Transportation Demand Management (TDM) measures to increase use of nonsingle occupant vehicle travel modes.
- Relax the LOS standards; the City can lower its level of service standards to encourage further growth and minimize the need for additional transportation facilities.

The transportation/land-use balance will be monitored through the City's Concurrency Management System as part of the State Environmental Policy Act (SEPA). Transportation concurrency will be evaluated for key facilities and on a system-wide basis.

The City can then identify locations where standards are not anticipated to be met in the future and identify appropriate improvements. At the project level, the SEPA process will continue to guide the more specific planning and analysis efforts.

Level of Service Standards

LOS standards can help identify where and when transportation improvements are needed, and when development or growth will affect system operations. LOS provides a standard below which a transportation facility or system is not considered adequate.

LOS standards can also be used to evaluate the impact of proposed developments on the surrounding street system. They can assure that all developments are served by a safe, efficient and cost-effective street system. They can also be used to disclose impacts, identify remedial actions, and apportion costs between public and private sources.

The LOS standards shown in Table T-1b apply to the facility's location and its functional classification. A more detailed description of the level of service methodology is provided in the City of Auburn Comprehensive Transportation Plan (2015), page 5-4.

Table T- 1b Draft Roadway Capacity/Congestion LOS Standards

| Roadway/Intersection | Maximum V/C Ratio/LOS | |
|---|-----------------------|--|
| Arterial Corridor | D* | |
| Signalized Intersection | D | |
| Unsignalized Intersection | D | |
| *Unless otherw ise specified in Chapter 2 of the City of Auburn Comprehensive Transportation Plan, 2015 | | |

LOS standards are also the basis of an equitable traffic impact fee system, which require developments to pay a portion of the costs for capacity improvements to the transportation infrastructure.

In 2001, the City implemented a traffic impact fee program. The purpose of the fee is to mitigate traffic impacts more equitably while making the costs of development more predictable to developers. In 2007, the City implemented an additional transportation impact fee to address the impacts of heavy truck usage on the City's transportation system. Both fees are updated annually so that the fees are consistent with current project costs.

Measuring Transportation System Performance

The level of service for street segments or links is analyzed with two primary purposes in mind. First, this site-specific LOS can be used, with the help of a travel demand model, to evaluate areas of congestion within a transportation network, leading to the development of a long-range transportation facilities plan. Second, arterial corridor LOS analysis can be used to assess concurrency or if facilities are meeting the LOS standards.

The City of Auburn currently uses Highway Capacity Manual methodologies to calculate levels of service. For arterials LOS are based on average travel speeds along a defined corridor.

Table T-1c shows the 25 defined street corridors, LOS standards and most recent calculated LOS.

TABLE T-1c

** Total travel time in the eastbound direction cannot exceed 1,000 seconds for this corridor to meet the LOS Standards

Concurrency (Adequate Public Facilities)

Concurrency involves matching public facilities and new development. The GMA extends concurrency to transportation facilities by requiring that new development be served by adequate roads and public transportation service, and that development is not permitted to cause these transportation facilities to operate below level of service standards that are adopted by local governments in their comprehensive plans.

In compliance with the GMA, adequate transportation system facilities must be available within six years of the time of occupancy and use of new development.

Capital Facilities Projects and Financing

The City's transportation facilities include projects totaling \$139,099,446. Tables T-2, T-2A and T-2B show the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table T-3 shows, operating budget impacts of \$267,300 are forecasted for transportation facilities during the six years 2020 – 2025.

ARTERIAL STREET FUND (102)

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Special Revenue Fund

| Project Title: | Harvey Rd NE/8th St NE Intersection Improvements | TIP# I-5 |
|------------------|--|------------------------|
| Project No: | cp0611 | |
| Project Type: | Capacity | |
| Project Manager: | None | LOS Corridor ID# 5, 19 |

Description:

Add one eastbound through/right turn-lane on 8th St NE to the west of Harvey Rd. Modify traffic signals and traffic channelization to accommodate the new lane. The additional lane will reduce traffic delays and queuing at the intersection of Harvey Rd and 8th St NE in all directions. This project will reconstruct M St NE from 4th St NE to 8th St NE, a segment of roadway approximately 0.3 miles long with a four-lane cross-section. The reconstruction will address the existing poor pavement condition and fill in any gaps in the sidewalk network.

Progress Summary:

Project was completed in 2010. Ongoing budget is for Public Works Trust Fund Loan debt payments scheduled through 2028.

Future Impact on Operating Budget:

This project will have no additional impact on the operating budget for street maintenance.

ARTERIAL STREET FUND (102)

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Special Revenue Fund

| Project Title: | Lake Tapps Parkway ITS Expansion | TIP# I-6 |
|------------------|----------------------------------|---------------------|
| Project No: | cp1618 | |
| Project Type: | Capacity | |
| Project Manager: | Kevin Thompson | LOS Corridor ID# 17 |

Description:

The project funds the design, coordination, permitting, and construction of new Intelligent Transportation System (ITS) infrastructure along Lake Tapps Parkway from Lakeland Hills Way to East Valley Highway, and along East Valley Highway to Lakeland Hills Way. The proposed ITS infrastructure includes conduit, fiber, VMS signage, cameras, network communication upgrades, and weather stations along the route.

Progress Summary:

Federal Grant application was submitted to PSRC in May 2014. Project was awarded design and construction funds in 2016; the awarded amount will not be released to the City until 2019.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

Capital Facilities Plan

Special Revenue Fund

Description:

This project includes the design and construction of intersection safety improvements.

Progress Summary:

R St SE & 21st St SE is currently a two-way stop controlled intersection, experiences significant congestion in the peak traffic hours, and has a documented high collision history. Analysis to determine appropriate intersection control and preliminary design are anticipated to be completed in 2019. Construction will be completed when the project is fully funded. Interim improvements were constructed in 2017 to improve the pedestrian crossing in partnership with the Muckleshoot Indian Tribe.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

This project is planned as a partnership between the City of Auburn and the Muckleshoot Indian Tribe to improve pedestrian safety by constructing sidewalks, street lighting, and related storm improvements on Riverwalk Drive SE between Auburn Way S and Howard Road SE. This project will close a major gap in the sidewalk system and ties into the proposed improvements on Auburn Way South. **Progress Summary:** Design is anticipated to begin in 2022. Construction will be completed when funds are available.

Capacity, Non-Motorized

Future Impact on Operating Budget:

ARTERIAL STREET FUND (102)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | M Street Underpass (3rd St SE to 8th St SE) | TIP# R-3 |
|------------------|---|--------------------|
| Project No: | c201a0 | |
| Project Type: | Capacity | |
| Project Manager: | Ryan Vondrak | LOS Corridor ID# 6 |

Capital Facilities Plan

Special Revenue Fund

Description:

Construction of a grade separated railroad crossing of M Street SE at the BNSF Stampede Pass tracks.

Progress Summary:

Construction was completed in 2014. Debt Service is scheduled each year through 2041.

Future Impact on Operating Budget:

This project will have no additional impact on the operating budget for street maintenance.

Special Revenue Fund

T - 4 - 1

Description:

This project will construct a four-lane street section on M St NE between south of E Main St and 4th St NE.

Progress Summary:

Pre-design will be completed during 2019 to refine project scope, alignment, and cost.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

|------------------|--------------------------|----------------------|
| Project Type: | Capacity, Safety | |
| Project No: | срххх | |
| Project Title: | 46th Place S Realignment | TIP# R-9 |

Description:

The project will realign 46th Place S to the south of S 321st Street. The realignment will move the 46th Place S intersection with S 321st Street approximately 350 feet to the east of the current location. This will create two T-intersections (44th Avenue S and 46th Place S) in place of the existing four-leg intersection. The existing 46th Place S will be dead-ended to the south of S 321st Street. The project will improve safety and traffic operations at the intersections.

Progress Summary:

A portion of the right-of-way for the realigned roadway was dedicated as part of an adjacent development project.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

Capital Facilities Plan

Special Revenue Fund

Description:

SE 320th St is a primary route serving Green River Community College and adjacent neighborhoods. There are very high volumes of pedestrians, bicyclists, and transit utilizing the corridor. This project will fund the design, right-of-way acquisition, and construction of non-motorized roadway and safety improvements including bicycle lanes, sidewalks, and street lighting between 122nd Ave SE and 116th Ave SE. Project length is approximately .45 miles.

Progress Summary:

GRC completed the design and construction for the segment between 124th Ave SE and 122nd Ave SE in 2013. The project schedule is dependent on the availability of grant funding.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

Description:

This project will study traffic operations, safety, and prepare a preliminary design for intersection improvements.

Progress Summary:

Analysis, preliminary design, and construction cost estimate will be initiated in 2019. Future phases will be programmed as funding becomes available.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

|------------------|------------------------------|---------------------|
| Project No: | asbd11 | |
| Project Type: | Capacity | |
| Project Manager: | TBD | LOS Corridor ID# 36 |

Description:

This project will study improvements to the Kersey Way SE corridor from the White River Bridge to the southern city limits. The study will develop the scope and costs for horizontal /vertical geometric roadway improvements, roadside hazard mitigation, street lighting and non-motorized trail construction. The project length is approximately two miles.

Progress Summary:

Design study will begin in 2019.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Description:

Study the A Street SE corridor between 6th Street SE and Lakeland Hills Way SE including 41st St SE from D St SE to C St SE. The study will review the safety and access needs of the traveling public and the adjacent properties.

Progress Summary:

In-house pre-design was completed to refine project scope, alignment, and identify design issues. 2019 design will complete conceptual corridor plan for future improvements.

Future Impact on Operating Budget:

This study will have no impact on the operating budget for street maintenance.

| Project Title: | ITS Dynamic Message Signs | TIP# I-3 |
|------------------|---------------------------|----------------------|
| Project No: | asbd16, cp1701 | |
| Project Type: | Non-Capacity (ITS) | |
| Project Manager: | Luis Barba | LOS Corridor ID# N/A |

Description:

This project funds the design and construction of Dynamic Message Signs at various locations throughout the City. Dynamic message signs are an important Intelligent Transportation System (ITS) tool for providing information to roadway users. Priority locations for sign placement are based on the Comprehensive Transportation Plan ITS map and include Auburn Way N, Auburn Way S, W Valley Highway, E Valley Highway and Lea Hill Road.

Progress Summary:

The first two signs (Auburn Way S and S 277th Street) have been completed.

Future Impact on Operating Budget:

The annual maintenance and operational costs for this project is estimated to be \$6,000.

| Project Title: | Auburn Way N/S (4th St NE to 4th St SE) | TIP# R-1 |
|------------------|---|-----------------------|
| Project No: | c409a0, cpxxxx | |
| Project Type: | Non-Capacity | |
| Project Manager: | TBD | LOS Corridor ID# 2, 3 |

Capital Facilities Plan

Special Revenue Fund

Description:

This project is based on a pre-design study to improve pedestrian accessibility, appearance, and link the downtown area along Auburn Way S between 4th Street NE and 4th Street SE. The project is approximately 0.5 miles long. The project would construct curb-bulbs at intersections adjacent to on-street parking, a new northbound left-turn at 3rd Street NE, and improvements to the signal and channelization at E Main Street.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

|------------------|--|--------------------|
| Project No: | cp1901 | |
| Project Type: | Non-Capacity, Safety | |
| Project Manager: | TBD | LOS Corridor ID# 4 |

Description:

This project will complete design and construct safety improvements at the curve along Auburn Way S in the vicinity of the intersection with Poplar Street. The improvements would include, illumination, electronic curve ahead warning signage, a high-friction surface treatment for the pavement, guardrail and driveway improvements.

Progress Summary:

Grant funding application was submitted in 2018. If secured the design phase will be started in 2019 and construction completed during 2021.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Special Revenue Fund

TIP# P-2

Description:

Project Title:

Project No: Project Type:

The program preserves local (unclassified) streets. The work includes crack sealing, asphalt patching, pre-leveling, asphalt overlays and roadway reconstruction. From 2013 through 2018 this program was funded by sales tax on construction; beginning in 2019, funding will be from Real Estate Excise Tax (REET).

Progress Summary:

This program has successfully completed overlays, chip seals and complete reconstructions since 2005. The program will focus on completing reconstruction needs in addition to regular maintenance treatments.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

| Project Type: | Non-Capacity, Preservation |
| Project Manager: | Jai Carter |

Capital Facilities Plan Special Revenue Funds

TIP# P-1

LOS Corridor ID# N/A

Description: Implement regular pavement maintenance and/or rehabilitation of various classified streets citywide. These projects may include a combination of overlays, rebuilds, and spot repairs. This program is funded through a 1% utility tax that was adopted by City Council during 2008.

Progress Summary:

The 2017 construction cycle included the completion of the B Street NW reconstruction and provided matching funds for the Federally funded preservation projects on Auburn Way N and Lake Tapps Parkway. 2018 construction includes matching funds for the Federally funded preservation of S 277th Street and 15th Street NE/NW preservation, and for arterial patching and overlay.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

Description:

Implement regular maintenance of various classified streets by sealing newly formed cracks. Sealing the cracks will prolong the life of the pavement by stopping water from draining into the sub-base of the road.

Progress Summary:

Program continues to successfully extend pavement life citywide.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

| Project Title: | A St SE Preservation (E Main St to 17th St SE) | TIP# P-9 |
|------------------|--|---------------------|
| Project No: | cp1819 | |
| Project Type: | Non-Capacity, Preservation | |
| Project Manager: | Kim Truong | LOS Corridor ID# 10 |

Capital Facilities Plan

Special Revenue Fund

Description:

This project will grind and overlay A St SE between E Main St and 17th St SE, remove unused driveways, and upgrade all curb ramps and pedestrian signals to meet ADA requirements.

Progress Summary:

Federal Grant funding was awarded in 2018.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

WATER

Current Facilities

The City of Auburn water utility provides water supply, treatment, transmission, storage, distribution, and service connections to in-City residences and businesses. The City also provides water to the City of Algona and Water District #111 under wholesale agreements. The water system consists of wells, springs and interties for source; chlorination stations and corrosion control for treatment; pump stations, pressure reducing stations and pipelines for transmission; and steel and concrete enclosed reservoirs for storage. Table W-1, "Facilities Inventory", lists the facilities along with their current capacities and approximate locations.

Level of Service (LOS)

The City's Comprehensive Water Plan summarizes the design criteria and service polices for the City's water distribution system.

Capital Facilities Projects and Financing

The City of Auburn's water system anticipates seven capacity projects in the amount of \$18,223,611 and twenty-eight non-capacity projects totaling \$28,987,300 for a 6-year planning expectation total of \$47,210,911. The financing plan is shown in Table W-2 followed by individual worksheets showing the project details.

The capacity projects will increase water supply quantities, storage, and distribution for growth of retail customers. The non-capacity projects will provide for pipeline improvements and replacements, delivery pressure improvements, water quality enhancements, comprehensive and resource management planning, pump station upgrades, telemetry system improvements, and meter upgrades.

Impact on Future Operating Budgets

As Table W-3 shows, operating budget impacts of \$4,800 are forecasted for water supply and distribution facilities during the six years 2020 – 2025.

WATER FUND (460)

Capital Facilities Plan Enterprise Funds

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Cascade Water Alliance Water Purchase |
|------------------|---------------------------------------|
| Project No: | wabd06 |
| Project Type: | Capacity |
| Project Manager: | n/a |

Description:

Financing to purchase water from adjacent purveyors to meet projected demand based on agreements with Cascade Water Alliance. Council approved the agreements for permanent and reserve wholesale supply in September 2013. A new agreement with Tacoma was executed in 2014. Budget reflects purchase of permanent supply - payments of \$934,805 will continue from 2020 through 2029. Reserve supply will not be purchased and is not included. 2015 Comprehensive Water Plan CIP ID S-04

Progress Summary:

Ongoing payments through 2029

Future Impact on Operating Budget:

None

WATER FUND (460) Six Year Capital Facilities Plan, 2019-2024 **Coal Creek Springs Rehabilitation** Project Title: wabd07 Project No: Project Type: Capacity Project Manager: TBD Description: Rehabilitation of the Coal Creek Springs middle collector will improve capacity of the springs resulting in greater utilization of the water right.

2015 Comprehensive Plan CIP ID S-09

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Progress Summary: Planned

Future Impact on Operating Budget: No significant impact.

Activity:

WATER FUND (460)Six Year Capital Facilities Plan, 2019-2024Project Title:Reservoir Seismic RehabilitationProject No:wabd16Project Type:Non-CapacityProject Manager:TBD

Description:

Install seismic control valves on outlet piping of Reservoirs 2, 4A, 4B, 8A, and 8B. This project will include a study (2019) to identify work to be completed at each site, and to further define project costs at each site. A grant was received for Reservoir 1 and a separate project was established, removing \$25,000 from these costs. Costs for the remaining reservoirs will be updated based on the Reservoir 1 project.

2015 Comprehensive Plan CIP ID R-06

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

| Six Year Capital Facilities Plan, 2019-2024 | |

| Project Title: | Coal Creek Springs Transmission Main Replacement |
|------------------|--|
| Project No: | cp1603 |
| Project Type: | Non-Capacity |
| Project Manager: | Wickstrom |

Description:

The facilities evaluation study conducted in 2013-2014 found a suspected leak on the 24" steel transmission main crossing the White River. The approximate location was determined, but further investigation is required to assess the degree and magnitude of the potential leak. This project will provide for full replacement of the river crossing via a utility bridge. This option eliminates the deep blow-off and allows more flexibility for expansion. A future project would rehabilitate the existing crossing for redundancy. 2015 Comprehensive Plan CIP ID D-11

Progress Summary:

Design is anticipated to be completed in 2018 with construction completed in 2019.

Future Impact on Operating Budget: No significant impact

WATER FUND (460)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Deduct Meter Replacement Program |
|------------------|----------------------------------|
| Project No: | wabd19 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

Approximately 200 non-single family irrigation meters within the water system are connected to the customer's supply line on the customer side of the domestic meter, instead of being directly connected to the water main. Since sewer charges for non-single family customers are based on the domestic water meter reading and irrigation water does not use the sewer system, customers ask to have the irrigation use deducted from their overall domestic use for sewer billing purposes. Thus, irrigation meters installed after the domestic meter are referred to as "deduct meters". To improve the billing process, increase staff efficiencies and eliminate manual calculations in the billing process this project will re-install the irrigation meters to directly connect to the main. Deduct meters will be converted to irrigation meters to more equitably bill water usage.

Progress Summary:

Planned

Future Impact on Operating Budget:

No significant impact.

Park Pump Station/Distribution System Improvements

Capital Facilities Plan

| Project Title: | Game Farm Park Pump Station/Distribution System Improvements |
|------------------|--|
| Project No: | срхххх |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

The pumps at Game Farm Wilderness Park are in need of replacement, and the building need repairs. This project was identified in the 2015 Comprehensive Plan as occurring in the short to mid term, or by 2025. Installation of new water main crossing the White River to eliminate the pump station was identified as being completed by 2035. The Coal Creek Springs Transmission Main project will add a pipe crossing the White River to be used for installation of a water main for Game Farm Wilderness Park. Completion of the river crossing will enable the water main project to be completed sooner and eliminate the need for pump station improvements. This project will install new main within the Game Farm Park from the existing 8" near the amphitheater to the river crossing, and from the river crossing to the existing pump station in the Wilderness area. The project will also decommission the existing pump station.

2015 Comprehensive Plan CIP ID PS-09, D16

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

SANITARY SEWER

Current Facilities

The City's sanitary sewer service area encompasses approximately 28-square miles that are primarily within the City limits, but includes a total of approximately ½ square mile within Auburn's Proposed Annexation area (PAA). The City contracts with King County for sewage treatment and disposal. The City's Sanitary Sewer Utility is responsible for the collection and transmission of wastewater to the King County trunk lines.

The City's current inventory of approximately 200 miles of sewer lines serves the City's sewer service area. Table S-1, Facilities Inventory, lists the sewage collection and transmission facilities along with their capacities and locations.

Level of Service (LOS)

The Comprehensive Sewerage Plan for the Sewerage Collection System summarizes the level of service (LOS), or design criteria, for the City's sewage collection system. These standards represent the average quantities of sewage that the system is designated to accommodate for residential, industrial, and commercial development.

Capital Facilities Projects and Financing

Investments in the City's sewage collection facilities include primarily non-capacity improvements and replacement projects. Anticipated replacements include replacement of aging sewer pipes and manholes in conjunction with arterial and local street improvements, and replacement of pipe identified through the sewer program's condition assessment process. The City will also undertake significant system assessment efforts including inspections and evaluations of siphons, pump stations, large diameter pipe, and specific areas of the City that shows high levels of inflow and infiltration. The City of Auburn's sewer system anticipates costs for thirteen non-capacity projects totaling \$13,677,000. Table S-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for sanitary sewer facilities during the six years 2020 – 2025.

Six Year Capital Facilities Plan, 2019-2024

Project Title:Sanitary Sewer Repair & Replacement/System Improvements ProgramProject No:sebd01Project Type:Non-Capacity (Repair and Replacement)Project Manager:Elwell

Capital Facilities Plan

Enterprise Funds

Description:

Repair and replace broken sewer mains and other facilities. These lines will be identified through television inspection and routine cleaning. This particular program includes proposed projects which do not have an approved Project Management Plan, or are not associated with the SOS or other transportation improvements. Anticipated projects include bi-annual, stand-alone, repair and replacement projects for sewer lines which are broken, misaligned, "bellied" or otherwise require an inordinate amount of maintenance effort or present a risk of backup or trench failure, and facilities which generate consistent odor complaints. Additionally, system improvements which enhance the ability to maintain service are included here. Comp Plan ID #1.

Progress Summary:

21 Sites were identified 2017. Funds from this program were transferred to CP1805, the 2019 Sewer Repair and Replacement project. Funds from 2020 and 2021 may be needed to complete those repairs. Design of future R&R projects will begin in 2020, with construction of those projects in 2021, and this two-year cycle of design followed by construction will continue in subsequent years.

Future Impact on Operating Budget:

This should slightly decrease the operating budget by correcting the problems that require operation staffs attention.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | Sewer Vactor Decant Facility |
|------------------|------------------------------|
| Project No: | sebd03 |
| Project Type: | Non-Capacity (Improvements) |
| Project Manager: | TBD |

Other

Description:

Currently the City hauls vactored sewage waste to the County landfill on a biweekly basis. The sewage sludge is considerably wet, thus Utility funds are paying for the disposal of water. This project consists of a study/analysis to assess the City's vactor disposal method and identify a cost-effective alternative to the status quo. Possible

recommendations may include maintaining current operations, constructing a gravity decant

facility, incorporating special equipment into the vactor truck to increase decanting ability, purchasing

specialized dewatering machinery, or collaborating with neighboring utilities for the shared use of facilities and equipment. Comp Plan ID #3

5/2018 - Cost of project escalated approximately 3% per year from 2014 Comp Plan to year of completion.

Progress Summary:

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the expenses associated with hauling saturated waste to the County landfill.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | Manhole Ring and Cover Replacement |
|------------------|---------------------------------------|
| Project No: | sebd04 |
| Project Type: | Non-Capacity (Repair and Replacement) |
| Project Manager: | TBD |

Description:

As manholes and roads age and their condition deteriorates, access covers and the rings in which they sit can become loose and/or misoriented, and can become a road hazard requiring maintenance staff attention and increasing the City's liability. This annual project will replace approximately 50 sewer manhole rings and covers to maintain access to the sewer system and to decrease the likelihood of the manholes becoming road hazards. Some of these replacements may be in conjunction with other City capital projects. Comp Plan ID #7.

Progress Summary:

Ongoing

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the need for staff to respond to loose manholes or lids.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | Sewer Pump Station Replacement/Improvement Program |
|------------------|--|
| Project No: | sebd05 |
| Project Type: | Non-Capacity (Repair and Replacement/Improvements) |
| Project Manager: | TBD |

Description:

The Sewer Utility's infrastructure currently consists of 15 public sewer pump stations that range in age from 5 to 50 years old. As those stations age, and utility operations change, considerations such as station condition, component condition, capacity, reliability, and safety consistently suggest that stations be upgraded, rehabilitated, and replaced. This program fund will continue to acknowledge and plan for those needs over the course of the next six years. Comp Plan ID #4.

5/2018 - Cost of project escalated approximately 3% per year from 2017 to years of construction.

Progress Summary:

Following the results of the systematic pump station evaluation study, the 2017-2022 funds for this program were divided into the Pump Station Electrical Improvements project (for common improvements at many stations) and the Pump Station Replacement project (for 22nd Street). As future considerations of reliability, capacity, and condition are evaluated, and specific projects are developed, these funds will be designated for those projects.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Six Year Capital Facilities Plan, 2018-2023

| Project Title: | Pump Station Electrical Improvements |
|------------------|--------------------------------------|
| Project No: | cp1812 |
| Project Type: | Non-capacity |
| Project Manager: | Luis Barba |

Description:

The Pump Station Condition Assessment (2016) identified a number of improvements to be made to the electrical systems at the City's sewer pump stations. The additions and modifications are intended to increase employee safety as well as operational efficiency. They include adding dry well control panel disconnects, bringing intrinsically safe wiring up to code, organizing, labelling, and dressing out control panel boxes at 5 stations (8th Street, Valley Meadows, Rainier Ridge, Riverside, and Peasley Ridge), adding dry well HMI computer screens, creating uniform as-built wiring diagrams for each station, as well as several other modifications identified for specific stations.

5/2018 - Cost of project were escalated approximately 3% per year from 2017 to the year of completion.

Progress Summary:

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget. Funding for this project was derived from the Sewer Pump Station Replacement/Improvement program (sebd05).

| Project Title: | Large Diameter Pipe Assessment |
|------------------|--------------------------------|
| Project No: | sebd07 |
| Project Type: | Non-Capacity (Improvement) |
| Project Manager: | TBD |

Description:

City staff is not equipped to efficiently clean and inspect sewer pipes with a diameter larger than 18 inches. This project would clean and internally inspect all pipe owned by the City that is larger than 18 inches in diameter. This is approximately 39,300 feet, ranging in diameter from 20 inches up to 36 inches.

Comp Plan ID #8.

5/2018 - Cost of project escalated approximately 3% per year from 2014 Comp Plan to year of completion.

Progress Summary:

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: Project No: | Inflow and Infiltration Study sebd11 |
|-------------------------------|--------------------------------------|
| Project Type: | Non-Capacity (Improvement) |
| Project Manager: | TBD |

Description:

This project would assess portions of the City Sewer Service Area for infiltration/inflow (I/I) values, since excessive localized I/I can also be an indicator of poor sewer main and side sewer condition and could contribute to capacity issues in the future. This project would monitor flow in the collection system over 5 years. This data will then be used to help identify repair and replacement needs and for modeling purposes and I/I assessment in future updates to the Comprehensive Sewer Plan. Comp Plan ID #9.

5/2018 - Cost of project escalated approximately 3% per year from 2014 Comp Plan to year of completion.

Progress Summary:

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

SEWER FUND (461)

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | 22nd Street Pump Station Replacement |
|------------------|--------------------------------------|
| Project No: | sebd13 |
| Project Type: | Non-capacity |
| Project Manager: | TBD |

Description:

The 22nd Street Pump Station was constructed in 1967. The dry well has shown some signs of corrosion, and the mechanical systems are reaching the end of their useful life. The initial phase of this project will examine the alternatives of rehabilitating the station, replacing major components, or replacing the entire station. The proposed funding assumes a complete replacement, and will be adjusted pending the alternatives analysis.

5/2018 - Cost of project escalated approximately 3% per year from 2017 to the years of construction.

Progress Summary:

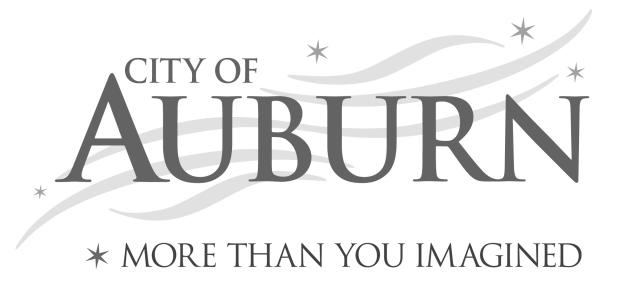

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget. Funding for this project was derived from the Sewer Pump Station Replacement/Improvement program (sebd05).

SEWER FUND (461) Capital Facilities Plan Six Year Capital Facilities Plan, 2019-2024 **Enterprise Funds** Project Title: 2019 Sewer Repair and Replacement Project No: cp1805 Project Type: Non-Capacity (Repair and Replacement) **Kevin Thompson** Project Manager: Description: Repair and/or replace existing aging sewer lines at 21 different sites throughout the City. **Progress Summary:** The project will be designed in 2018 for construction of the repairs/replacements of a portion of the sites in 2019. Completion of the design of the remaining sites will occur in 2020, and construction of those repairs/replacements is planned for 2021 Future Impact on Operating Budget: This project should slightly decrease the operating budget by correcting the problems that require operation staffs attention. City of Auburn Capital Facilities Plan

STORM DRAINAGE

Current Facilities

The City's storm drainage service area encompasses the municipal boundaries of the City. For management purposes, the service area is divided into 60 drainage sub-basins. The City's drainage system consists of a combination of closed conveyance pipes and open ditch conveyance facilities, with six pumping stations. Table SD-1 Facilities Inventory lists the facilities along with their current capacities and location.

Level of Service (LOS)

The City's Comprehensive Drainage Plan summarizes the level of service (LOS), or design criteria, for the City's storm drainage system. Generally, these standards represent a 25-year/24-hour design storm capacity within the 60 drainage sub-basins.

Capital Facilities Projects and Financing

The City's storm drainage facilities anticipate one capacity project in the amount of \$10,000 and seventeen non-capacity projects totaling \$19,120,800 for a six-year planning expectation total of \$19,130,800. Table SD-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for storm drainage facilities during the six years 2020 – 2025.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | 37th St. NW Storm Improvement |
|------------------|-------------------------------|
| Project No: | ср1724 |
| Project Type: | Capacity |
| Project Manager: | Luis Barba |

Description:

This project will increase existing pipes to provide additional capacity to alleviate current periodic flooding conditions in vicinity of "I" St. NW. This will also provide relief to the flooding experienced on the Interurban Bike Trail. 2015 Comprehensive Storm Drainage Plan Project No. 2

Progress Summary:

Temporary work to evaluate the capacity for addressing the re-occurring flooding has been completed and will be observed for the next year. A project scope will be developed from this information.

Future Impact on Operating Budget: None

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Pipeline Repair & Replacement Program |
|------------------|---------------------------------------|
| Project No: | sdbd03 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

This program provides funding for projects involving replacement of existing infrastructure. These projects support street repairs and other utility replacement programs, requiring coordination. Typically, design for repair and replacement projects is completed in one year, followed by construction the following year. 2015 Comprehensive Storm Drainage Plan Project No. 1

Progress Summary:

Previous 2 years expenses were allocated to the following projects: In 2016, \$100K was allocated to cp1522 -30th St NE Area Flooding Phase 1B project. In 2017, \$100,466 was allocated to Eastridge Manor Drainage Improvements project (cp1316) and \$85,000 was allocated to 30th St NE Area Flooding Phase 1B (cp1522).

Future Impact on Operating Budget:

Repair and replacement of aging infrastructure should reduce operating costs.

Activity:

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | 30th Street NE Area Flooding, Phase 3 |
|------------------|---------------------------------------|
| Project No: | срхххх |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

This project would reduce flooding in C St. NE by redirecting wet weather high flows southward to the 42-inch diameter (Phase 1) storm drain in 30th St. NE. By redirecting the C St. NE drainage into the Brannan Park system, these flows would no longer be affected by high water levels in Mill Creek. To avoid deepening the Phase 1 gravity line (and extensive retrofits to the Brannan Park pump station), this project would include a wet weather pump station and force main connection to 30th St. NE. The upgraded 42-inch diameter pipe in 30th St. NE would have sufficient capacity for these additional flows. Key components of Phase 3 include: Wet weather pump station (estimated capacity of 4.5 to 7 cfs), 1,730 feet of 15-inch diameter force main; Diversion structure in C St. NE for pump station. 2015 Comprehensive Storm Drainage Plan Project No. 4B.

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Progress Summary:

Future Impact on Operating Budget:

No significant impact.

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Vegetation Sorting Facility |
|------------------|-----------------------------|
| Project No: | sdbd12 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

Evaluation to determine benefits and costs of acquiring property to use as a vegetation sorting facility prior to disposal or reuse of materials from storm drainage maintenance activities (e.g., pond and ditch cleaning). In addition, evaluate potential for use by other City departments and by neighboring jurisdictions as a regional facility. If evaluation shows a reasonable benefit/cost ratio, budget includes property acquisition and site improvements to construct the vegetation sorting facility. Cost includes bin barriers and sorting equipment to facilitate materials handling and separation. 2015 Comprehensive Storm Drainage Plan Project No. 10.

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Progress Summary:

None

Future Impact on Operating Budget:

Overall operating costs should decrease as a result of improved efficiency from the sorting facility.

Capital Facilities Plan Enterprise Funds

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | S. 330th St. & 46th Pl. S. Storm Improvement |
|------------------|--|
| Project No: | sdbd13 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

Improve existing drainage conditions for the West Hill annexation areas. This project includes improvements near 330th St. and 46th Pl. S. where public storm drainage currently discharges within a large open ditch. The improvement will re-route the drainage within the right-of-way to the existing outfall.

2015 Comprehensive Storm Drainage Plan Project No. 5A.

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Six Year Capital Facilities Plan, 2019-2024

Capital Facilities Plan Enterprise Funds

| Project Title: | 23rd Street SE Storm Improvement |
|------------------|----------------------------------|
| Project No: | sdbd17 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

This project will improve existing drainage conditions in vicinity of 23rd St. SE & K St. SE. The project includes installation of a new 15-inch line along K St. SE from 23rd St. SE to 21st St. SE to alleviate flooding associated with the pedestrian entrance to Terminal Park Elementary School. Installation of new 12-18-inch line along 23rd St. SE from F St. SE to K St. SE. 2015 Comprehensive Storm Drainage Plan Project No. 8 (Phase 1+2).

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Progress Summary:

None

Future Impact on Operating Budget:

| Project Title: | Riverwalk Drive SE Non-Motorized Improvements |
|------------------|---|
| Project No: | sdbd14 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

As part of a non-motorized improvement project along Riverwalk Drive SE between Howard Road and Auburn Way South, construct large diameter storm piping to replace existing ditch, and expand Riverwalk ponds to accommodate increased capacity.

Progress Summary:

None

Future Impact on Operating Budget:

Maintenance costs should decrease as a result of the project.

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | West Main Street Pump Station Upgrade |
|------------------|---------------------------------------|
| Project No: | срххх |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

This project will upgrade the existing pump station by providing a redundant pump to meet level of service goals, including new force main and outlet.

5/2018 - Cost of project escalated an average of 3% per year from 2015 Comp Plan to year of construction.

Progress Summary:

None

Future Impact on Operating Budget: None

|-------|----------|------------|

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | 2019 Local Street Reconstruction |
|------------------|----------------------------------|
| Project No: | CP1726 |
| Project Type: | Non-Capacity |
| Project Manager: | TBD |

Description:

Storm drainage conveyance improvements for 28th St. SE and M St. SE needed to support the local street project. The new drainage improvements will allow for the elimination of a drywell system that does not meet storm requirements.

PARKS, ARTS AND RECREATION

Current Facilities

The City of Auburn's park system consists of a total of 951.50 acres of neighborhood and community parks, special use areas, open space and linear parks (trails).

Table PR – 1 "Facilities Inventory" lists all park and recreation land in the City's park system along with their current capacity and location.

Level of Service (LOS)

The current LOS provided by the City's park system represents the existing inventory of Cityowned park acres divided by the 2019 projected City population of 81,905. This equates to 0.71 acres per 1,000 population for neighborhood parks, 2.87 acres per 1,000 population for community parks, 0.20 acres for linear parks, 4.72 acres for open space, and 3.11 acres for special use areas.

The proposed LOS provided by the City's park system represents the planned 2024 inventory of City-owned park acres divided by the 2024 projected City population of 88,670. This equates to 0.77 acres per 1,000 population for neighborhood parks, 3.15 acres per 1,000 population for community parks, 0.23 acres per 1,000 population for linear parks, 4.54 acres per 1,000 population for population for special use areas.

Capital Facilities Projects and Financing

Parks and Recreation facilities include eighteen capital projects at a cost of 14,668,500. Table PR – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table PR - 3 shows, operating budget impacts of \$128,000 are forecasted for parks and recreation facilities during the six years 2020 - 2025.

Six Year Capital Facilities Plan, 2019-2024

Project Title:Jacobsen Tree Farm Site PlanProject No:cp0609Project Type:CapacityProject Manager:Daryl Faber

Description:

Develop the 29.3 acre site into a Community Park. A Master Plan for the park was completed in 2009 and will serve as a roadmap for development of the site. The newly annexed Lea Hill area of the City is deficient in park acreage.

Progress Summary:

Future Impact on Operating Budget:

No significant impact due to master plan. Future park development will result in maintenance and utility expenses undeterminable at this time.

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Brannan Park Synthetic Infield |
|------------------|--------------------------------|
| Project No: | cp1817 |
| Project Type: | Capacity |
| Project Manager: | Jamie Kelly |

Description:

Upgrade the existing dirt infield to synthetic turf to increase playability during inclement weather. The Parks Department submitted an application for a Youth Sports Facilities Grant (YAF) from the State Recreation and Conservation Office (RCO) in May 2016 for the synthetic infield. In addition, a King County Youth Athletic Facilities Grant application was submitted to cover City matching funds for the YAF grant. Additional improvements to the park include replacing the degraded concrete curbing around the perimeter of the parking lot.

Progress Summary:

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Mary Olson Farm - Watts Property Acquisition |
|------------------|--|
| Project No: | gpbd13 |
| Project Type: | Capacity |
| Project Manager: | Daryl Faber/Jamie Kelly |

Description:

Acquire approximately 16 acres in the southern portion of tax parcel number 3222059118, which is located east of the Mary Olson Farm property. The purpose of the acquisition is to create interpretive and educational opportunities in a plateau area that has historical significance within the steep forested ravine. The area was once a gathering place for Native Americans preparing to embark on fishing expeditions. The City was recently awarded a King County Conservation Futures grant to acquire the property.

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Lakeland Hills Nature Area |
|------------------|----------------------------|
| Project No: | gpbd11 |
| Project Type: | Capacity |
| Project Manager: | Daryl Faber |

Description:

Complete Master Plan to include the development and construction of an environmental community park. Trails, fencing, parking and visitor amenities are included in the project.

Progress Summary:

Future Impact on Operating Budget:

Increased maintenance costs of \$5,000

Activity:

| Project Title: | Fairway Drainage Improvement |
|------------------|------------------------------|
| Project No: | gpbd19 |
| Project Type: | Non-capacity |
| Project Manager: | Daryl Faber |

Description:

Apply top dressing sand to the first five fairways in order to firm up these landing areas so that the holes are playable year round. Sand will be applied with a three yard topdressing machine. Sand will be applied bi/weekly at a tenth of an inch of sand throughout the fairways. Fairways will start to show improvements once four inches of sand are applied.

SENIOR CENTER

Current Facilities

The City of Auburn currently has one Senior Center. Table PR-5 Facilities Inventory lists the facility along with its current capacity and location.

Level of Service (LOS)

The current LOS of 148.95 square feet per 1,000 population is based on the existing inventory divided by the 2019 citywide population of 81,905. The proposed LOS of 137.59 square feet per 1,000 population is based on the projected inventory divided by the 2024-projected citywide population of 88,670.

Capital Facilities Projects and Financing

The CFP does not include any senior center capital facilities projects during 2019-2024.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for the senior center facility during the six years 2020 – 2025.

TABLE PR-5

GENERAL MUNICIPAL BUILDINGS

Current Facilities

The current inventory of City government administration and operations facilities include 204,858 square feet for general government operations, 61,680 square feet for police services, and 38,646 square feet for fire protection, for a total of 305,184 square feet. Table GM - 1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 3,726.07 square feet per 1,000 population is based on the existing inventory divided by the 2019 citywide population of 81,905. The proposed LOS of 3,486.91 square feet per 1,000 population is based on the projected inventory divided by the 2024-projected citywide population of 88,670.

Capital Facilities Projects and Financing

The City's General Municipal Building facilities include eight capital projects at a cost of 3,895,200 and debt service at a cost of 3,944,400 for a total of 7,839,600. The major projects include (1) 2,017,200 for the Auburn Arts & Culture Center Renovation, (2) 448,000 for Equipment Rental Vehicle Maintenance Bay (3) 320,000 for M&O Fuel Tank (4) 350,000 for City Hall Roof Replacement and 3,944,400 for City Hall Annex debt service costs. Table GM – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table GM-3 shows, operating budget impacts of \$570,000 are forecasted for General Municipal buildings facilities during the six years 2020 - 2025.

CAPITAL IMPROVEMENT FUND (328)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Auburn Arts & Culture Center Renovation |
|------------------|---|
| Project No: | cp1612 |
| Project Type: | Capacity |
| Project Manager: | Daryl Faber |

Description:

Renovation to the property and building located at 20 Auburn Avenue (100 Auburn Avenue) Building for the creation of an Arts & Culture Center in downtown Auburn. The renovation of this building will allow increased access to the arts for all of Auburn residents and visitors. Having a dedicated Art Center alongside the Auburn Avenue Theater performing arts series has the potential to transform Auburn into an arts tourism destination within the South Puget Sound. This project is a high priority for the City of Auburn and the purchase of this important building was completed in 2016.

Progress Summary:

The City has secured \$325,000 in local grant funding. The historic window restoration is expected to be completed by 2018. As a landmark building, exterior renovations must maintain the historic character of the building.

Future Impact on Operating Budget:

The annual operating budget fiscal impact is estimated to be \$95,000.

| Equipment Rental Vehicle Maintenance Bay |
|--|
| cp1223 |
| Non-Capacity |
| Randy Bailey |

Description:

Project Title: Project No: Project Type: Project Manager:

Build additional vehicle bay at Equipment Rental shop for heavy equipment and large vehicles to improve efficiency and remove choke points. Adding a large vehicle bay with a large vehicle lift will enable us to perform inspections and maintenance on more than one large vehicle at a time, this becomes extremely important during emergency operations such as snow and ice events. The City currently has 2.5 maintenance bays, this project will add one more maintenance bay for a total of 3.5 bays.

| Project Title: | M&O Lunchroom Expansion |
|------------------|-------------------------|
| Project No: | erbd02 |
| Project Type: | Non-Capacity |
| Project Manager: | Randy Bailey |

Description:

Expansion of the current lunchroom by redesigning the area to accommodate All-Staff meetings, provide for a training facility, lunch room and also serve as the Department Operations Center (DOC) during an emergency event. In addition, the design will include sliding doors which will allow the area to serve two purposes at once, for example, one half of the room being used as a DOC and the other half open to employees to use as a lunch/break room.

Progress Summary:

This project will be designed in 2018 and built in 2019

COMMUNITY IMPROVEMENTS

Current Facilities

Community Improvements include sidewalk and traffic signal improvements, neighborhood traffic calming program, Main Street urban design improvements, public art and phase two of the Auburn Environmental Park Boardwalk project.

Level of Service (LOS)

No Level of Service for community improvement projects have been identified at this time.

Capital Facilities Projects and Financing

The City's proposed Community Improvements include fourteen capital projects at a cost of \$9,526,100 and debt service at a cost of 1,342,600 for a total of \$10,868,700. Table CI-2 shows the proposed financing plan followed by individual work sheets showing the project detail.

Impact on Future Operating Budgets

As Table CI-3 shows, because of the City Street light LED retrofit program the operating budget will save approximately \$735,000 for community improvement facilities during the six years 2020-2025.

| Project Title: | 104th Ave. Park Development |
|------------------|-----------------------------|
| Project No: | cp1619 |
| Project Type: | Capacity |
| Project Manager: | Jamie Kelly |

Description:

Complete Master Plan and construct park improvements identified in the Master Plan. Anticipated improvements include parking, trails, restroom, and playground. Work associated with permit approvals is also included in the budget.

Progress Summary:

Staff is in the process of finalizing the Master Plan for future park development and have submitted grant applications for two separate grant programs to the Washington State Recreation and Conservation Office. If awarded, funding would be available in June 2019 and construction is anticipated in late Summer or early Fall 2019. Other efforts for the property include working with King County and non-profit groups to control invasive species and replace with native plantings.

Future Impact on Operating Budget:

The annual impact on the operating budget is estimated to be \$10,000 for temporary wages and \$2,500 for supplies.

Capital Projects Fund

| Project Title: | Citywide ADA & Sidewalk Improvements | TIP# N-2 |
|------------------|--------------------------------------|----------------------|
| Project No: | cp1710, cp1815, gcbd01 | |
| Project Type: | Non-Capacity (Annual) | |
| Project Manager: | Aleksey Koshman | LOS Corridor ID# N/A |

Description:

This project funds citywide accessibility improvements to the public right-of-way sidewalk system including adding/upgrading curb ramps, removing barriers to access and completing gaps. Improvements are programmed annually based on the criteria adopted in the City's Public Right-of-Way Accessibility Transition Plan.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

CAPITAL IMPROVEMENT FUND (328)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Neighborhood Traffic Safety Program |
|------------------|-------------------------------------|
| Project No: | cp1713, cp1814, gcbd06 |
| Project Type: | Non-Capacity (Annual) |
| Project Manager: | Joe Welsh |

Description:

This project will implement neighborhood traffic calming strategies including street lighting, speed cushions, signage, speed radar signs, mini roundabouts, chicanes, traffic circles, and other approved traffic calming devices. Projects will be selected annually based on neighborhood meetings, public surveys, and engineering studies.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

CAPITAL IMPROVEMENT FUND (328) Six Year Capital Facilities Plan, 2019-2024

| Project Title: | City Wetland Mitigation Projects |
|------------------|---|
| Project No: | cp1315 |
| Project Type: | Non-Capacity |
| Project Manager: | Jeff Tate |

Description:

This project designs and constructs off-site wetland mitigation in the Auburn Environmental Park for participating development projects as approved through the City's development review process. Design, construction, monitoring, and maintenance of the mitigation is funded through wetland mitigation fees collected by the City.

Progress Summary:

Replacement plantings for Auburn Airport tree removal conducted in 2013. Design and construction of mitigation for other development sites deferred to 2018. Years 2019-2021 scheduled for site monitoring only.

Future Impact on Operating Budget:

After construction, each wetland mitigation site will be monitored and maintained for a period of three to five years, depending on the specific requirements for the project. Funding for future year monitoring and maintenance is included in the development fees collected by the City, and is budgeted as part of the Capital Facilities Plan.

CAPITAL IMPROVEMENT FUND (328)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Auburn Environmental Park Boardwalk - Phase 2 |
|------------------|---|
| Project No: | ср1611 |
| Project Type: | Non-Capacity |
| Project Manager: | Jeff Tate |

Description:

The Auburn Environmental Park (AEP) provides vegetated natural open space within an urbanized area. The AEP provides opportunities for local economic development, water quality improvement, storm water detention, flood control, fish and wildlife enhancement, visual resources, public education, and passive recreation, including walking trails and bird viewing amenities. In 2012, the City completed the construction of approximately 1,200 lineal feet of the first phase (Phase 1) of an elevated boardwalk trail in the Auburn Environmental Park (AEP). This trail extended from West Main Street through existing wetlands in the AEP terminating at the base of the Bird Viewing Tower constructed in 2009. As part of the construction of the elevated boardwalk, the City also installed interpretative signage, bench seating, limited new vehicle parking on Western Avenue and over two acres of wetland species of trees, plants and shrubs. Phase 2 of the elevated boardwalk trail would construct a combination of up to approximately 2,000 lineal feet of surface trail and elevated boardwalk trail from the current terminus at the Bird Viewing Tower to a connection with the Interurban Trail. The Phase 2 project will further previous and current Councils' visions of the AEP providing passive recreation and environmental education opportunities for all Auburn citizens.

Progress Summary:

Design for this project is scheduled to start in fall of 2021.

Future Impact on Operating Budget:

Construction of the Phase 2 project is anticipated to incur approximately \$10,000 in annual operating costs to the City's operating budget. Operating costs are addressed in the Environmental Services portion of the Community Development and Public Works Department operating budget.

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | City Street Light LED Retrofit |
|------------------|--------------------------------|
| Project No: | gcbd11 |
| Project Type: | Non-Capacity |
| Project Manager: | Scott Nutter |

Description:

This project will fund an LED retrofit program for all existing City owned (non LED) street lights. New Light fixtures and retrofits will replace our aging light fixtures with 10 year warrantied fixtures with long life LEDs and will improve lighting uniformity and visibility and is in accordance with the City's current design standards for new street lighting. The scope also includes street light control options for remote management of the City owned street lights. The project will utilize an approved energy service company (ESCO) management team.

Progress Summary:

Future Impact on Operating Budget:

Annual savings in power usage is anticipated to be \$130,000 per year. Additional maintenance savings will be realized in the reduction of materials for light replacement and is estimated to be \$20,000 per year.

LOCAL REVITALIZATION FUND (330) Six Year Capital Facilities Plan, 2019-2024

| Capital Facilities Plan |
|--------------------------------|
| Capital Projects Fund |

| Project Title: | City Downtown Public Parking Lot Reconfiguration |
|------------------|--|
| Project No: | ср1616 |
| Project Type: | Non-Capacity |
| Project Manager: | Ingrid Gaub |

Description:

Reconfigure the City owned public parking lot between Safeway and Main Street to address pedestrian and vehicular circulation; remove existing landscaping to allow more flexibility in the parking lot redesign; explore whether more parking stalls can be added to the lot to aid in providing additional customer parking within Downtown Auburn; and resurface the parking lot.

Progress Summary:

Begin design in 2016. Monies to improve the parking lot adjacent to Safeway and the B Street Plaza were used to create safety and aesthetic improvements to the plaza. New catenary lighting and planters were added to the plaza as a short-to medium-term improvement. The lighting increases safety and the planters were added to delineate walking paths and create visual interest. Completion of design and construction is delayed until the Heritage Building is addressed.

Future Impact on Operating Budget:

None anticipated as the City already maintains the parking lot.

Capital Facilities Plan Capital Projects Fund

| Project Title: | City Owned Parking Lot Improvements |
|------------------|-------------------------------------|
| Project No: | lrbd04 |
| Project Type: | Non-Capacity |
| Project Manager: | Josh Arndt |

Description:

The City owns and operates six improved, surface-level asphalt parking lots located downtown. The parking lots are used for a variety of permit, free 3-hour and employee parking. Maintenance on these lots has been performed primarily only on an emergency basis. As a result the condition of the lots show signs of deterioration and disrepair. This project will fund needed improvements for City owned parking lots within the downtown area.

Progress Summary: Planning phase.

Future Impact on Operating Budget: None anticipated as the City already maintains the parking lot.

City of Auburn Capital Facilities Plan

AIRPORT

Current Facilities

The City of Auburn operates the Auburn Municipal Airport, providing hangar and tie-down facilities/leasing space for aircraft-related businesses. As of 2017, there were approximately 142,000 take-offs and landings (aircraft operations) at the airport annually. Table A-1 "Facilities Inventory" lists the facilities with current capacity and location. The Airport Master Plan was completed in May 2015 for the period 2012 through 2032.

Level of Service (LOS)

The Auburn Municipal Airport Master Plan provides a maximum runway capacity (LOS standard) of 231,000 aircraft operations annually; one take-off or landing equals one aircraft operation. This LOS is recognized by the Federal Aviation Administration (FAA). The FAA requires the airport to have the capital facilities capacity (i.e., runways, taxiways, holding areas, terminal, hangars, water/sewer system, etc.) necessary to accommodate 100% of aircraft operations during any one year. By 2022, the Airport Master Plan forecasts the number of operations to be 198,623 – well below the capacity of the airport runway.

Capital Facilities Projects and Financing

The City's Airport facilities include eleven non-capacity projects totaling \$14,057,700. These include the runway enhancements project, Jet A fueling facility, automated weather observation system, hangar replacement program and land acquisition for future approaches. Table A-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table A-3 shows, operating budget impacts of \$20,000 are forecasted for Airport facilities during the six years 2020 – 2025.

AIRPORT FUND (465)

Six Year Capital Facilities Plan, 2019-2024

| Project Title: | Runway Enhancements |
|------------------|----------------------------|
| Project No: | cp1516 |
| Project Type: | Non-Capacity |
| Project Manager: | Seth Wickstrom |

Description:

Enhance Runway 16/34 per Airport Layout Plan & Master Plan Update for increased safety and utilization. This also includes the As-built AGIS Survey that is required following the runway construction.

Progress Summary:

Environmental Assessment is complete. Design planned for Federal FY 2017 and construction is anticipated to begin in Federal FY 2018. Budget has been adjusted to account for the anticipated funding plan identified by FAA for Design and Construction of the project per their letter of April 17, 2017.

Future Impact on Operating Budget:

City of Auburn Capital Facilities Plan

CEMETERY

Current Facilities

The City owns two cemeteries. The Mountain View Cemetery is a fully developed facility (60 acres and five buildings) that provides burial services and related merchandise for the community. The Pioneer Cemetery is a historic cemetery that is no longer used for burial purposes. Table C-1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 37 burial plots/niches and cremation in ground plots per 1,000 population is based on the existing inventory divided by the estimated 2019 citywide population of 81,905. The proposed LOS of 35 burial and plots/niches and cremation in ground plots per 1,000 population is based on the projected inventory divided by the 2024-projected citywide population of 88,670.

Capital Facilities Projects and Financing

The City's Mountain View Cemetery facilities include two capital projects at cost of \$738,000 to build a new mausoleum and to improve the cemetery roads. Table C-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecast for the cemetery during the six years 2020 – 2025.

FIRE PROTECTION

Current Facilities

The Valley Regional Fire Authority provides fire protection and rescue services to a 40-square mile area which includes the City of Auburn, the City of Algona, the City of Pacific and King County Fire Protection District 31. The Valley Regional Fire Authority operates out of five stations, which are manned 24 hours per day. The North Station #31 also serves as the department headquarters and includes a hose and training tower. Each station is assigned fire apparatus (Engines and Aid Vehicles). Table F-1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 0.21 fire apparatus per 1,000 population is based on the existing inventory (17 fire apparatus) divided by the 2019 citywide population estimate of 81,905. The proposed LOS of 0.20 fire apparatus per 1,000 is based on the 2024-planned inventory (18 fire apparatus) divided by the 2024-projected citywide population of 88,670.

Capital Facilities Projects and Financing

The Valley Regional Fire Authority includes one capital project at a cost of \$450,000 for fire apparatus enhancements and improvements. Table F-2 shows the proposed financing plan followed by an individual worksheet showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for fire protection during the six years 2020 – 2025.
