EXECUTIVE SUMMARY

A capital facilities element is one of the comprehensive plan elements required by Washington's Growth Management Act (GMA). Capital facilities generally have long useful lives, significant costs and tend not to be mobile.

The GMA requires that capital facilities elements include an inventory of existing capital facilities showing locations and capacities, a forecast of future needs for such capital facilities, proposed locations and capacities of new or expanded capital facilities and at least a six-year plan to finance capital facilities with identified sources of funding. The GMA also requires that the land use element be reassessed if probable funding falls short of existing needs.

This document is the City's six-year Capital Facilities Plan (CFP). The CFP, in conjunction with other City adopted documents, satisfies the GMA requirement for a Capital Facilities Element. It addresses one of the GMA's basic tenets: to provide adequate facilities to support development in accordance with locally adopted level of service standards.

This CFP will enable the City to: (1) make informed decisions about its investment of public dollars, and (2) make timely decisions about maintaining level of service in accordance with this CFP and other adopted plans.

CAPITAL FACILITIES PLAN CONTENT

This CFP consists of the following:

Chapter 1. Introduction Purpose of CFP, statutory requirements,

methodology.

Chapter 2. Goals and Policies Goals and policies related to the provision of

capital facilities.

Chapter 3. Capital Improvements Proposed capital projects, which include the

financing plan and reconciliation of project capacity to level of service (LOS) standards.

This CFP is a companion document to the Capital Facilities Element of the Auburn Comprehensive Plan. The Capital Facilities Element of the Auburn Comprehensive Plan identifies the City's planning approach and policy framework for the provision of capital facilities. This CFP provides the background inventory, identifies proposed projects and establishes the six-year capital facilities plan for financing capital facilities.

The comprehensive plan contains timeframes that are the intended framework for future funding decisions and within which future actions and decisions are intended to occur. However, these timeframes are estimates; depending on factors involved in the processing of applications and project work, and the availability of funding, the timing may change from the included timeframes. The framework does not represent actual commitments by the City of Auburn that may depend on funding resources available.

GROWTH ASSUMPTIONS

In planning for capital facilities, contemplation of future growth needs to be considered. The CFP is based on the following City population forecast:

Year	Population
2021	83,950
2022	85,041
2027	89,379

The population forecasts are based on information from the State of Washington Office of Financial Management (OFM) as well as estimates developed by the City of Auburn Planning and Community Development Department.

CAPITAL COSTS OF FACILITIES

Based on the analysis of capital improvements contained in this document, the cost of Cityowned and managed capital improvements for 2022-2027 is summarized as follows:

Type of Facility	- 1	2022 - 2027
Transportation - Arterial (102)	\$	45,822,630
Transportation - Local (103)		11,660,000
Transportation - Street (105)		15,169,650
Water		50,318,838
Sanitary Sewer		16,129,879
Storm Drainage		22,733,259
Parks, Arts & Recreation		15,903,850
General Municipal Buildings		5,509,510
Community Improvements		9,483,400
Airport		16,876,460
Cemetery		355,000
Total	\$	209,962,476

FINANCING FOR CAPITAL FACILITIES

The financing plan for the citywide capital improvements includes:

Funding Source	2022 - 2027	Capital Facility
Grants	20,302,756	Transportation
(Includes grant funding that has not	2,195,500	Parks, Arts & Recreation
been secured)	528,000	General Municipal Buildings
	1,901,370	Community Improvements
	400,000	Storm Drainage
	7,248,330	Airport
User Fees / Fund Balance	46,692,498	Water
	16,708,539	Sewer
	22,823,169	Storm Drainage
	355,000	Cemetery
	274,000	Equipment Rental
	37,510	Facilities
	3,368,130	Airport
Arterial Street Fund	2,493,435	Transportation
Local Street Preservation Fund	1,760,000	Transportation
Arterial Street Preservation Fund	12,157,676	Transportation
Local Revitalization Fund	245,000	Community Improvements
General Fund	20,020	General Municipal Buildings
Bond Proceeds	505,000	Water
WSDOT Aviation Loan	750,000	Airport
DWSRF Loan	3,700,000	Water
Municipal Parks Fund	450,000	Parks, Arts & Recreation
Property Tax	1,113,500	Parks, Arts & Recreation
Mitigation/Impact Fees	20,860,913	Transportation
	6,589,850	Parks, Arts & Recreation
	500,000	General Municipal Buildings
	1,494,060	Community Improvements
REET 1	3,314,000	General Municipal Buildings
	750,000	Transportation - Local Streets
	300,000	Parks, Arts & Recreation
REET 2	4,605,500	Community Improvements
	180,000	Parks, Arts & Recreation
	930,000	Transportation - Arterial Streets
	750,000	Transportation - Local Streets
Other Sources	4,247,500	Transportation - Arterial Streets
	7,500,000	Transportation - Local Streets
	1,237,470	Community Improvements
	5,510,000	Airport
	88,750	Storm Drainage
	5,075,000	Parks, Arts & Recreation
Total	\$ 209,962,476	

SUMMARY OF IMPACTS ON FUTURE OPERATING BUDGETS

The forecasted impacts of new capital facilities on the City's future operating budgets (2023-2028) are as follows:

	Budget Year:	2023	2024	2025	2026	2027	2028	Total
1	Transportation	\$ 4,000	\$ 9,000	\$ 10,000	\$ 16,000	\$ 16,000	\$ 19,000	\$ 74,000
2	Water	-	-	-	-	-	-	-
3	Sanitary Sewer	-	-	-	-	-	-	-
4	Storm Drainage	-	-	-	-	-	-	-
5	Parks, Arts and Recreation	15,000	15,000	17,000	17,000	22,000	22,000	108,000
6	General Municipal Buildings	-	95,000	95,000	95,000	95,000	95,000	475,000
7	Community Improvements	(137,500)	(137,500)	(127,500)	(127,500)	(127,500)	(127,500)	(785,000)
8	Airport	-	2,000	2,000	4,000	4,000	4,000	16,000
9	Cemetery	-	-	-	-	-	-	-
	Total	\$ (118,500)	\$ (16,500)	\$ (3,500)	\$ 4,500	\$ 9,500	\$ 12,500	\$ (112,000)

Community Improvements page 223
Airport page 237

LEVEL OF SERVICE (LOS) CONSEQUENCES OF THE CFP

Based on the proposed six-year capital projects and the projected population increase of 4,338 (5%) between 2022 and 2027, the LOS for the following City-owned public facilities will change as follows:

The LOS for the following facilities will be increased as a result of the CFP, comparing the 2022 LOS to the projected 2027 LOS.

CAPITAL FACILITY	LOS UNITS	2022 LOS	2027 LOS
			(Projected)
Community Parks	Acres per 1,000 Pop.	2.80	3.12
Linear Parks	Acres per 1,000 Pop.	0.20	0.23
Neighborhood Parks	Acres per 1,000 Pop.	0.77	0.83

The LOS for the following facilities will be maintained as a result of the CFP.

CAPITAL FACILITY	LOS UNITS	2022 LOS	2027 LOS				
			(Projected)				
Roads	Volume/Capacity Ratio	"D"	"D"				
Airport	% Air Operations Support	100%	100%				
Cemetery	Burial Plots per 1,000 Pop.	32.00	30.00				
Sanitary Sewer	Residential GPCPD (Note 1)	171.00	171.00				
Storm Drainage	N/A						
Water	Residential GPCPD (Note 1)	230.00	230.00				
Note 1: GPCPD = Gallons per Customer per Day							

The LOS for the following facilities will be decreased as a result of the CFP, comparing the 2022 LOS to the projected 2027 LOS.

CAPITAL FACILITY	LOS UNITS	2022 LOS	2027 LOS
			(Projected)
General Municipal Buildings	Sq. Ft. per 1,000 Pop.	3,725.36	3,543.83
Open Space	Acres per 1,000 Pop.	4.56	4.34
Senior Center	Sq. Ft. per 1,000 Pop.	145.32	136.50
Special Use Areas	Acres per 1,000 Pop.	3.03	2.85

Level of Service (LOS) is a common measure used to determine the efficiency or effectiveness of services. For the City of Auburn, LOS targets serves as a means to assess the adequacy of public facilities in meeting the needs of the population for which it serves.

For example, in the case of park space, when there is an increase in population without a corresponding increase in park acreage, the LOS unit of measure (acres per 1,000 population) will decline, indicating a potential need to increase the total amount of park acreage to keep pace with population growth. On the other hand, a slight increase in population, coupled with a large increase in facilities, will result in an increased LOS. For example, facilities such as buildings or burial plots may be constructed or expanded to keep pace with anticipated population growth. While this will have the effect of increasing LOS in the short-term, in the longer-term, the LOS will gradually decline to the targeted level based on forecasted population. The impact of population growth to the LOS for facilities will vary depending on the type of facility and long range planning by the City.

CFP ELEMENT SOURCE DOCUMENTS

Documents used in preparing this Capital Facilities Plan (CFP) are principally the comprehensive plans for the various public facilities included in this CFP. These individual comprehensive plans provide detailed identification of projects and identify their (projects) proposed funding sources.

City documents include:

- City-wide Comprehensive Land Use Plan (2015)
- City Municipal Airport Master Plan Update (2012-2032)
- City Comprehensive Water Plan (2015)
- City Comprehensive Transportation Plan (2015) and Six Year Transportation Improvement Program (2022-2027)
- City Comprehensive Drainage Plan (2015)
- City Comprehensive Sewer Plan (2015)
- City 2021-22 Biennial Budget and 2020 Annual Financial Report; and,
- City Parks, Recreation & Open Space Plan Update (2015), as well as numerous other planning and financial documents.

All documents are available for public inspection at the City of Auburn.

CHAPTER 1

INTRODUCTION

PURPOSE

The Capital Facilities Plan (CFP) is a 6-year plan (2022-2027) for capital improvements that support the City of Auburn's current and future growth.

In this plan, funding for general government projects is identified. To maintain consistency with individual master and utility comprehensive plans, applicable projects in the 6-year window of those master/utility plans are included in this CFP. The CFP also identifies LOS standards, where applicable, for each public facility.

STATUTORY REQUIREMENTS FOR CAPITAL FACILITIES ELEMENTS

RCW 36.70A.070(3)(d) requires that the comprehensive plan capital facilities element include "a six-year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes." RCW 36.70A.070(3)(e) requires that all capital facilities have "probable funding" to pay for capital facility needs, or else the City must "reassess the land use element."

In addition, the capital facilities element must include the location and capacity of existing facilities, a forecast of future needs, and their proposed locations and capacities. The State Growth Management Act (GMA) guidelines suggest that this analysis be accomplished for water systems, sanitary sewer systems, storm water facilities, schools, parks and recreation facilities, police and fire protection facilities.

The GMA also seeks the selection of level of service standards for capital facilities. As a result, public facilities in the CFP should be based on quantifiable, objective measures of capacity such as traffic volume, capacity per mile of road and acres of park per capita. In some instances, though, level of service may best be expressed in terms of qualitative statements of satisfaction with a particular public facility. Factors that influence local level of service standards include, but are not limited to, community goals, national and local standards, and Federal and State mandates.

To be effective, the CFP must be updated on a regular basis. State GMA guidelines suggest that the CFP be updated at least every two years. With this in mind, the City will follow these guidelines and update the CFP at least every two years, incorporating the capital facilities improvements in the City's biennial budget process.

CONCURRENCY AND LEVEL OF SERVICE

Concurrency

The GMA requires that jurisdictions have certain capital facilities in place or available within a specified time frame when development occurs. This concept is called concurrency. Under the GMA, concurrency is required for transportation facilities and is recommended by the State for certain other public facilities, namely potable water and sanitary sewer. Concurrency has a direct relationship to level of service. The importance of concurrency to capital facilities planning is that development may be denied if it reduces the level of service for a capital facility below the locally adopted minimum. The level of service is unique for each type of facility and is presented in the subsequent sections.

Explanation of Level of Service

As indicated earlier, the GMA requires that level of service be established for certain transportation facilities for the purposes of applying concurrency to development proposals. The State GMA guidelines recommend the adoption of level of service standards for other capital facilities to measure the provision of adequate public facilities.

Typically, measures of level of service are expressed as ratios of facility capacity to demand (i.e., actual or potential users). Table 1-1 lists generic examples of level of service measures for some capital facilities:

TABLE 1-1
Sample Level of Service Measurements

Type of Facility	Sample Level of Service Measure
General Municipal Buildings	Square feet per 1,000 population
Park s	Acres per 1,000 population
Roads and Streets	Ratio of actual volume to design capacity
Sewer / Water	Gallons per customer per day

The need for capital facilities is largely determined by a community's adopted LOS standards and whether or not the community has formally designated capital facilities, other than transportation, as necessary for development to meet the concurrency test. The CFP itself is therefore largely influenced by the selection of the level of service standards. Level of service standards are measures of the quality of life in the City. The standards should be based on the City's vision of its future and its values.

IMPLEMENTATION

Implementation of the CFP requires constant monitoring and evaluation. The CFP is sensitive to funding and revenue availability and therefore needs to be constantly monitored against variations in available resources. To facilitate its implementation, the CFP should be kept current.

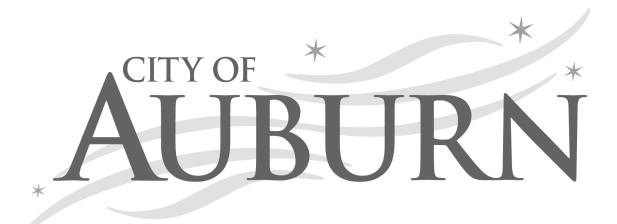

Update of Capital Facilities Plan

Perhaps the most desirable way to keep the CFP current is to update it regularly so the six-year plan is a rolling CFP. Again, the State recommends that the CFP be updated at least biennially.

The City of Auburn will seek to update the CFP at least biennially in conjunction with the budget process. Future updates will consider:

- A. Revision of population projections, including annexations;
- B. Update of inventory of public facilities;
- C. Update of costs of public facilities;
- D. Update of public facilities requirements analysis (actual level of service compared to adopted standards);
- E. Update of revenue forecasts;
- F. Revise and develop capital improvement projects for the next six fiscal years; and.
- G. Update analysis of financial capacity.

Amendments to the CFP, including amendments to level of service standards, capital projects, and/or the financing plan sources of revenue are all actions that can keep the CFP current and relevant to City decision-making.

CHAPTER 2

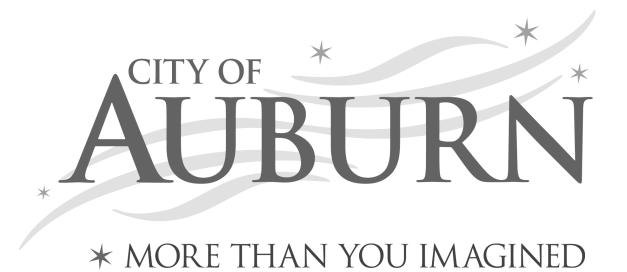

GOALS AND POLICIES

This chapter identifies goals and policies specific to the City's provision of capital facilities.

- Goal 1 Provide a variety of responses to the demands of growth on public facilities.
- Policy 1.1 Establish land use patterns that optimize the use of public facilities.
- Policy 1.2 Provide additional public facility capacity when existing facilities are used to their maximum level of efficiency (consistent with adopted standards for level of service).
- Policy 1.3 Encourage development where new public facilities can be provided in an efficient manner.
- Policy 1.4 Exempt the following from the concurrency management program:
 - 1.4.1 Development vested by RCW 19.27.095, 58.17.033 or 58.17.170.
 - 1.4.2 Development that creates no added impact on public facilities.
 - 1.4.3 Expansions of existing development that were disclosed and tested for concurrency as part of the original application.
- Goal 2 Provide needed public facilities that are within the ability of the City to fund or within the City's authority to require others to provide.
- Policy 2.1 Establish level of service standards that are achievable with the financing plan of this Capital Facilities Plan.
- Policy 2.2 Base the financing plan for public facilities on realistic estimates of current local revenues and external revenues that are reasonably anticipated to be received by the City.
- Policy 2.3 Match revenue sources to capital projects based on sound fiscal policies.
 - 2.3.1 The City shall continue to fund utility costs through utility enterprise funds, based on user fees and grants. Public facilities included in utilities are sewer, solid waste, storm drainage, and water.
 - 2.3.2 Where feasible pursue joint venture facility construction, construction timing, and other facility coordination measures for City provided facilities, as well as with school districts and other potential partners in developing public facilities.
 - 2.3.3 The City shall continue to assist through direct participation, LIDs and payback agreements, where appropriate and financially feasible. Where funding is available, the City may participate in developer initiated facility extensions or improvements, but only to the extent that the improvements benefit the broader public interest, and are consistent with the policies of this Capital Facilities Plan.

- Policy 2.4 If the projected funding is inadequate to finance needed public facilities and utilities based on adopted level of service standards and forecasted growth, the City will do one or more of the following to achieve a balance between available revenue and needed public facilities:
 - 2.4.1 Lower the level of service standards;
 - 2.4.2 Increase the amount of revenue from existing sources;
 - 2.4.3 Adopt new sources of revenue;
 - 2.4.4 Require developers to provide such facilities at their own expense; and/or
 - 2.4.5 Amend the Land Use Element to reduce the need for additional public facilities.
- Policy 2.5 Both existing and future development will pay for the costs of needed capital improvements.
 - 2.5.1 Ensure that existing development pays for capital improvements that reduce or eliminate existing deficiencies, and pays for some or all of the cost to replace obsolete or worn out facilities. Existing development may also pay a portion of the cost of capital improvements needed by future development. Existing development's payments may take the form of user fees, charges for services, special assessments and taxes.
 - 2.5.2 Ensure that future development pays a proportionate share of the cost of new facilities that it requires. Future development may also pay a portion of the cost to replace obsolete or worn-out facilities. Future development's payments may take the form of voluntary contributions for the benefit of any public facility, impact fees, mitigation payments, capacity fees, dedications of land, provision of public facilities, and future payments of user's fees, charges for services, special assessments and taxes.
- Policy 2.6 The City will determine the priority of public facility capital improvements using the following criteria as general guidelines. Any revenue source that cannot be used for the highest priority will be used beginning with the highest priority for which the revenue can legally be expended.
 - 2.6.1 Projects that eliminate hazardous conditions.
 - 2.6.2 Refurbishment of existing facilities that contribute to achieving or maintaining standards for adopted level of service.
 - 2.6.3 New or expanded facilities that reduce or eliminate deficiencies in level of service for existing demand.
 - 2.6.4 New or expanded facilities that provide the adopted level of service for new development and redevelopment during the next six fiscal years.
 - 2.6.5 Capital improvements that significantly reduce the operating cost of providing a service or facility, or otherwise mitigate impacts of public facilities on future operating budgets.

- 2.6.6 Capital improvements that contribute to stabilizing and developing the economy of the City.
- 2.6.7 Project priorities may also involve additional criteria that are unique to each type of public facility, as described in other elements of this Comprehensive Plan.
- Policy 2.7 Ensure that the ongoing operating and maintenance costs of a capital facility are financially feasible prior to constructing the facility.
- Goal 3 Protect public health, environmental quality, and neighborhood stability and viability through the appropriate design and installation of public facilities.
- Policy 3.1 Promote conservation of energy, water and other natural resources in the location and design of public facilities.
- Policy 3.2 Require the separation of sanitary and storm sewer facilities wherever combined sewers may be discovered.
- Policy 3.3 Practice efficient and environmentally responsible maintenance and operating procedures.
- Policy 3.4 The siting, design, construction and improvement of all public buildings shall be done in full compliance with the Americans with Disabilities Act (ADA).
- Policy 3.5 Promote economic and community stability and growth through strategic investments in public facilities and public private/partnerships.
- Goal 4 Make the Capital Facilities Plan consistent with other elements of the comprehensive plan, and to the extent feasible with other city, county, regional and state adopted plans.
- Policy 4.1 Ensure that the growth and development assumptions used in the Capital Facilities Plan are consistent with similar assumptions in other elements of the comprehensive plan.
- Policy 4.2 Coordinate with non-city providers of public facilities on a joint program for maintaining applicable level of service standards, concurrency requirements, funding and construction of public facilities.
- Goal 5 Provide public facilities that provide a sense of community that is inclusive of diverse populations.
- Policy 5.1 Contribute to community pride and foster a sense of community through provision of public facilities that create a community-gathering place for neighbors, family and friends.
- Policy 5.2 Through provision of public facilities, offer a broad range of activities promoting social interactions especially with new residents.
- Policy 5.3 Provide maximum flexibility and multiple uses through design of public facilities that are adaptable to changing interests.
- Policy 5.4 Provide a community center facility that is financially feasible, affordable for participants, and can generate revenue to offset a portion of the operating costs.

CHAPTER 3

CAPITAL IMPROVEMENTS

1. INTRODUCTION

This CFP includes City capital improvement projects and the financing plan to pay for those projects. It also contains the inventory of existing City facilities, and identifies level of service standards, where applicable. Each type of City public facility is presented in a separate subsection that follows a standard format. Throughout this section, tables of data are identified with abbreviations that correspond to the type of facility. For example, Table W-1 refers to Table 1 for Water (Supply and Distribution). Each abbreviation corresponds to the name of the type of facility.

1. Narrative Summary

This is an overview of the data, with sections devoted to Current Facilities, Level of Service, Capital Facilities Projects and Financing, and Impact on Future Operating Budgets.

2. Inventory of Facilities (Table X-1)

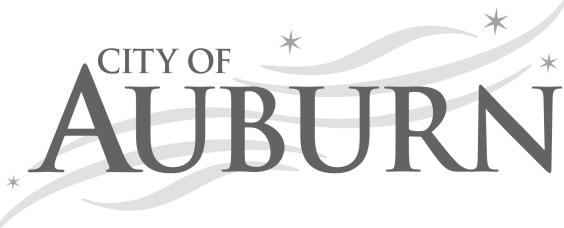

This is a list of existing capital facilities, including the name, capacity (for reference to level of service), and location. This table also includes any proposed capital projects and the planned inventory total through December 31, 2027.

3. Capital Projects and Financing Plan (Table X-2, X-2A and X-2B)

This list of capital improvements identifies existing deficiencies, identifies facilities needed for future growth, and identifies the need to repair or replace obsolete or worn out facilities through December 31, 2027. Each list shows the proposed financing plan followed by individual worksheets showing the project detail.

4. Impact on Future Operating Budgets (Table X-3)

This is a list of capital projects and the forecasted impacts on the City's future operating budgets (2023 – 2028).

* MORE THAN YOU IMAGINED

TRANSPORTATION

Current Facilities

<u>Roadways:</u> The City's street system consists of a network of approximately 254 miles of arterials, collectors, local streets and alleys. Existing non-motorized facilities include a mix of trails, sidewalks, and both dedicated and shared bicycle facilities.

<u>Signals and ITS:</u> The City's transportation system also includes 96 traffic signals, a Traffic Control Center employing Intelligent Transportation Systems (ITS), which centrally directs the signals, 83 CCTV cameras, and various traffic beacons all communicating on a network of copper wire and fiber optic cable. The City also has two roundabouts.

<u>Transit:</u> King County Metro Transit, Sound Transit and Pierce Transit serve the Auburn area. Auburn is currently served by six Metro, two Sound Transit, and one Pierce Transit bus route. In addition, Sound Transit "Sounder" commuter trains provide peak hour and midday service at the Auburn Station. The Sounder also provides special event service to selected sporting events. Park and ride facilities and the Auburn Station support bus and rail service.

Level of Service (LOS)

Washington's Growth Management Act (GMA) requires Level of Service (LOS) standards for both arterials and transit routes. The GMA requires that each jurisdiction's LOS standards be coordinated within the region and be supported by local ordinance, but the actual standards and the methods used are determined by each local jurisdiction.

Under GMA, the focus is on the performance of the whole road system, not on individual intersections or roadways. LOS standards are a tool to help keep the transportation system in balance with the needs of forecast population growth and development. Table T-1a summarizes the LOS definitions.

Table T-1a Definition of Urban Street Level of Service (LOS)

- **LOS A** describes primarily free flow operations at average travel speeds, usually about 90 percent of the free flow speed for the given street class. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Control delay at signalized intersections is minimal.
- **LOS B** describes reasonably unimpeded operations at average travel speeds, usually about 70 percent of the free flow speed for the street class. The ability to maneuver within the traffic stream is only slightly restricted, and stopped delays are not bothersome.
- **LOS C** describes stable conditions; however, ability to maneuver and change lanes in midblock locations may be more restricted than in LOS B, and longer queues, adverse signal coordination, or both may contribute to lower average travel speeds of about 50 percent of the free flow speed for the street class.
- **LOS D** borders on a range in which small increases in flow may cause substantial increases in delay and decreases in travel speed. LOS D may be due to adverse signal progression, inappropriate signal timing, high volumes, or some combination of these factors. Average travel speeds are about 40 percent of free flow speed.
- **LOS E** is characterized by significant delays and average travel speeds of 33 percent or less of the free flow speed. Such operations are caused by a combination of adverse progression, high signal density, high volumes, extensive delays at critical intersections, and inappropriate signal timing.
- **LOS F -** is characterized by urban street flow at extremely low speeds, typically one-third to one-fourth of the free flow speed. Intersection congestion is likely at critical signalized locations, with high delays, high volumes and extensive queuing.

Source: 2010 Highw ay Capacity Manual, Special Report 209, Transportation Research Board, Washington, D.C. 2010, page 10-5

A methodology and set of standards have been drafted for the City of Auburn Comprehensive Plan. The standards help determine concurrency (i.e., balance) between the transportation and land use elements of the City's Comprehensive Plan, as required by the GMA. The City has four choices if it is determined that standards cannot be met.

- Modify the land use plan, placing tighter controls on the amount and type of development to reduce traffic.
- Construct additional transportation facilities to support increased travel demand from new development.
- Implement Transportation Demand Management (TDM) measures to increase use of nonsingle occupant vehicle travel modes.
- Relax the LOS standards; the City can lower its level of service standards to encourage further growth and minimize the need for additional transportation facilities.

The transportation/land-use balance will be monitored through the City's Concurrency Management System as part of the State Environmental Policy Act (SEPA). Transportation concurrency will be evaluated for key facilities and on a system-wide basis.

The City can then identify locations where standards are not anticipated to be met in the future and identify appropriate improvements. At the project level, the SEPA process will continue to guide the more specific planning and analysis efforts.

Level of Service Standards

LOS standards can help identify where and when transportation improvements are needed, and when development or growth will affect system operations. LOS provides a standard below which a transportation facility or system is not considered adequate.

LOS standards can also be used to evaluate the impact of proposed developments on the surrounding street system. They can assure that all developments are served by a safe, efficient and cost-effective street system. They can also be used to disclose impacts, identify remedial actions, and apportion costs between public and private sources.

The LOS standards shown in Table T-1b apply to the facility's location and its functional classification. A more detailed description of the level of service methodology is provided in the City of Auburn Comprehensive Transportation Plan (2021), Chapter 5, Policy LOS-02.

Table T- 1b Draft Roadway Capacity/Congestion LOS Standards

Roadway/Intersection	Maximum V/C Ratio/LOS					
Arterial Corridor	D*					
Signalized Intersection	D					
Unsignalized Intersection	D					
Unless otherwise specified in Chapter 2 of the City of Auburn Comprehensive Transportation Plan, 2020						

LOS standards are also the basis of an equitable traffic impact fee system, which require developments to pay a portion of the costs for capacity improvements to the transportation infrastructure.

In 2001, the City implemented a traffic impact fee program. The purpose of the fee is to mitigate traffic impacts more equitably while making the costs of development more predictable to developers. In 2007, the City implemented an additional transportation impact fee to address the impacts of heavy truck usage on the City's transportation system. Both fees are updated annually so that the fees are consistent with current project costs.

Measuring Transportation System Performance

The level of service for street segments or links is analyzed with two primary purposes in mind. First, this site-specific LOS can be used, with the help of a travel demand model, to evaluate areas of congestion within a transportation network, leading to the development of a long-range transportation facilities plan. Second, arterial corridor LOS analysis can be used to assess concurrency or if facilities are meeting the LOS standards.

The City of Auburn currently uses Highway Capacity Manual methodologies to calculate levels of service. For arterials LOS are based on average travel speeds along a defined corridor.

Table T-1c shows the 25 defined street corridors, LOS standards and most recent calculated LOS.

TABLE T-1c

Auburn Corridor Level of Service - Existing 2014 Weekday PM Peak Hour

			LOS	20	14 LOS
ID Corridor	From	То	Standard*	NB/EB	SB/WB

Corridor segments within Downtown Auburn may operate at LOS E in accordance with the Auburn Downtown Plan. All other arterial and collector corridors must operate at LOS D or better, unless otherwise indicated.

^{**} Total travel time in the eastbound direction cannot exceed 1,000 seconds for this corridor to meet the LOS Standards

Concurrency (Adequate Public Facilities)

Concurrency involves matching public facilities and new development. The GMA extends concurrency to transportation facilities by requiring that new development be served by adequate roads and public transportation service, and that development is not permitted to cause these transportation facilities to operate below level of service standards that are adopted by local governments in their comprehensive plans.

In compliance with the GMA, adequate transportation system facilities must be available within six years of the time of occupancy and use of new development.

Capital Facilities Projects and Financing

The City's transportation facilities include projects totaling \$72,652,280. Tables T-2, T-2A and T-2B show the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table T-3 shows, operating budget impacts of \$74,000 are forecasted for transportation facilities during the six years 2023 – 2028.

Harvey Rd NE/8th St NE Intersection Improvements Project Title:

TIP# I-5

Project No: cp0611 Capacity Project Type:

None Project Manager: LOS Corridor ID# 5, 19

Description:

The project constructed one eastbound through/right turn-lane on 8th St NE to the west of Harvey Rd and modified traffic signals and traffic channelization to accommodate the new lane. The additional lane reduced traffic delays and queuing at the intersection of Harvey Rd and 8th St NE in all directions. This project also reconstructed M St NE from 4th St NE to 8th St NE, a segment of roadway approximately 0.3 miles long with a four-lane cross-section. The reconstruction addressed the existing poor pavement condition and completed sidewalk gaps. .

Progress Summary:

Project was completed in 2010. Ongoing budget is for Public Works Trust Fund Loan debt payments scheduled through 2028.

Future Impact on Operating Budget:

N/A

Activity:

Total

Project Title: Lea Hill Road/112th Ave SE Roundabout TIP# I-6

Project No: **cpxxxx**

Project Type: Capacity, Safety

Project Manager: TBD LOS Corridor ID# 19

Description:

The project will construct a single-lane roundabout at the 112th Avenue SE intersection with Lea Hill Road. The intersection is currently stop-controlled on the 112th Avenue SE approach. The project will also implement turn restrictions at the Lea Hill Road intersection with 105th Place SE, and remove the existing span wire traffic signal. The project will improve traffic operations, safety and non-motorized access.

Progress Summary:

The Lea Hill Road Corridor study was completed during 2020. This project is based on the study recommendations.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Capital Facilities Plan Special Revenue Fund

Project Title: 29th St SE/R St SE Intersection Improvements TIP# I-8

Project No: cp2116
Project Type: Capacity

Project Manager: TBD LOS Corridor ID# 16, 27

Description:

The project will construct a second southbound through lane between 22nd Street SE and 33rd Street SE and a new signal at the 29th Street SE intersection. The improvements are needed to address the existing LOS deficiency at this intersection during the weekday PM peak hour.

Progress Summary:

The R Street Corridor study was completed during 2020. This project is based on the study recommendations.

Future Impact on Operating Budget:

The additional annual maintenance cost for this project is estimated to be \$500. Replacing the traffic signal will reduce ongoing maintenance costs to replace parts and equipment that have reached the end of their service life.

Project Title: R Street SE & 21st Street SE Intersection Safety Improvements

TIP# I-10

Project No: CP1918

Project Type: Capacity, Safety
Project Manager: James Webb

LOS Corridor ID# 16

Description:

The project will construct a single lane roundabout in place of the existing east/west stop-control on 21st Street SE. The project is needed to address an existing LOS deficiency, and will improve safety at the intersection.

Progress Summary:

This improvement was recommended in the R Street Corridor study which was completed during 2020.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Project Title: Auburn Way S and 6th Street SE

Project No: **cpxxx**

Project Type: Capacity, Safety

Project Manager: TBD LOS Corridor ID# 3

Description:

The project will construct a dedicated southbound right-turn pocket on Auburn Way S at 6th Street SE and other improvements to support the new right-turn pocket. The project will address an existing level of service deficiency at the intersection, improving access from SR-18 to A Street SE.

Progress Summary:

Federal grant funding for construction is proposed to be applied for in 2022. If awarded construction would occur in 2025.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$500.

Project Title: SE 304th Street/132nd Avenue SE Roundabout TIP# I-13

Project No: cpxxxx
Project Type: Capacity

Project Manager: TBD LOS Corridor ID# 23, 25

Description:

The project will construct a single-lane roundabout at the SE 304th Street intersection with 132nd Avenue SE on Lea Hill. The roundabout will replace the existing stop-controlled on the SE 304th Street approach. The project is needed to address a level of service deficiency at the intersection.

Progress Summary:

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Project Title: Riverwalk Drive SE Non-Motorized Improvements

TIP# N-9

Project No: cp2121

Project Type: Capacity, Non-Motorized

Project Manager: Jeff Bender LOS Corridor ID# 27

Description:

The project will construct sidewalks, street lighting, and related storm improvements along the east side of Riverwalk Drive SE between Auburn Way S and Howard Road SE. This project will close a major gap in the sidewalk system and ties into the proposed improvements on Auburn Way South. The project will also install a RRFB at the intersection with Howard Road. The project is proposed to be in partnership with the Muckleshoot Indian Tribe.

Progress Summary:

Grant funding from WSDOT was awarded in 2021. The design phase will start in 2021 with construction of the improvements completed during 2023. The City and Muckleshoot Indian Tribe have entered into a memorandum of understanding for improvements along the Auburn Way S corridor, and are currently negotiating the funding agreement for this project.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$2,000.

Capital Facilities Plan Special Revenue Fund

Project Title: A Street Loop TIP# R-4

Project No: CP2117
Project Type: Capacity

Project Manager: Luis Barba LOS Corridor ID# N/A

Description:

The project will construct a new one-way (eastbound) roadway connection between A Street SW/S Division Street and A Street SE. The new intersection with A Street SE will allow an unsignalized right-turn movement onto southbound A Street SE, providing an alternative to the intersection of 3rd Street SE and A Street SE, which does not meet adopted LOS standards. The roadway will be constructed as a complete street to accommodate non-motorized road users.

Progress Summary:

Sound Transit has agreed to provide \$340,000 towards the construction phase as mitigation for the second parking garage. Federal funding for the construction phase was awarded in 2021.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Project Title: Auburn Way S Improvements (Hemlock St SE to Poplar St SE)

TIP# R-6

Project No: cp1622
Project Type: Capacity
Project Manager: Left Bond

Project Manager: Jeff Bender LOS Corridor ID# 4

Description:

The project will widen Auburn Way S between Hemlock St SE and Poplar St SE to accommodate two general purpose lanes in each direction, turn lanes, access management where feasible, U-turns, curb, gutter, sidewalk, illumination, transit stop improvements, a new traffic signal in the vicinity of Chinook Elementary School, Intelligent Transportation Systems, streetscape and storm improvements. The project length is approximately 0.4 miles. The project is needed to address traffic operations issues along the corridor.

Progress Summary:

Project scope was revised to omit portions of the original project scope that are being built by the Auburn School District's (ASD) Chinook Elementary replacement project. ASD's project will construct a roundabout at the school driveway on Auburn Way S instead of the traffic signal on Auburn Way S that was originally proposed as part of the City's project. \$1,297,000 of federal grant funding for the design phase was awarded in 2019. 2021 Funding includes 2020 carry forward. If the cost of design phase is less than anticipated, a portion of the design phase grant will be utilized for construction. \$3,605,807 of federal grant funding was awarded in 2022 for the construction phase.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$2,500.

Project Manager: TBD LOS Corridor ID# 5

Description:

This project will construct a complete four/five-lane street section on M St NE from south of E Main St to 4th St NE, and reconstruct the signal at E Main St. The project is needed to improve traffic operations along the M Street NE corridor, and replace the existing pavement which is in poor condition.

Progress Summary:

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$500.

Project Title: 46th Place S Realignment TIP# R-9

Project No: cpxxx

Project Type: Capacity, Safety

Project Manager: TBD LOS Corridor ID# N/A

Description:

The project will realign 46th Place S to the south of S 321st Street. The realignment will move the 46th Place S intersection with S 321st Street approximately 350 feet to the east of the current location. This will create two T-intersections (44th Avenue S and 46th Place S) in place of the existing four-leg intersection. The existing 46th Place S will be dead-ended to the south of S 321st Street. The project will improve safety and traffic operations at the intersections.

Progress Summary:

A portion of the right-of-way for the realigned roadway was dedicated as part of an adjacent development project.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

TIP# R-11

Total

Project No: asbd01
Project Type: Capacity

Project Manager: TBD LOS Corridor ID# 23

Description:

This project will widen 124th Avenue SE to create a four-lane section with bicycle and pedestrian facilities SE 318th St and SE 312th St. The project will also construct improvements at the SE 312th St/124th Ave SE intersection (including adding bike lanes, dual westbound left-turn lanes, dual southbound through-lanes, a northbound right-turn pocket, ITS improvements, and pedestrian safety improvements). The project is needed to improve traffic operations along the corridor and to accommodate all travel modes.

Progress Summary:

Phase 1 improvements between SE 318th and SE 316th were completed by GRC in 2012.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Stewart Road - City of Pacific (Lake Tapps Parkway Corridor)

TIP# R-24

Project No: asbd25
Project Type: Capacity

Project Manager: City of Pacific LOS Corridor ID# N/A

Description:

Project Title:

This is a City of Pacific project to widen the Stewart Road (Lake Tapps Parkway) Corridor. This is the final segment of widening in the City of Pacific which will tie in with the City of Sumner's planned final widening segment and new bridge over the White River. Completion of this corridor widening is expected to significantly relieve traffic congestion in Auburn along the A St SE and C St SW corridors.

Progress Summary:

City of Pacific is in the process of completing the design phase and environmental permitting for the project. Construction is currently planned for 2021/22.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Project Title: East Valley Highway Widening

TIP # R-26

Total

Project No: cpxxxx
Project Type: Capacity

Project Manager: TBD LOS Corridor ID#

Description:

This project will widen E Valley Highway between Lakeland Hills Way and Terrace View Drive SE, approximately 0.6 miles. The roadway will have a four/five lane cross section with a trail connection along the east side. Other project elements include storm improvement, illumination and ITS. The project will provide congestion relief along the corridor and provide access for non-motorized users.

Progress Summary:

The City is conducting a corridor study during 2021. The scope and cost estimate for this project will be revised based on the study recommendations.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$2,500.

Project Title: Garden Avenue Realignment
Project No: cp2022

Project Type: Capacity
Project Manager: Kim Truong LOS Corridor ID# 19

Description:

The project will construct a new east/west connection between Garden Avenue and 104th Avenue SE, and will cul-de-sac Garden Avenue to the north of 8th Street NE. This will improve traffic operations and safety along 8th Street NE.

Progress Summary:

The previous project title (Lea Hill Rd Segment 1A) was updated based on recommendations from the Lea Hill Corridor Study in 2020. In 2016, a parcel at the intersection of Garden Avenue and 320th/8th Street was purchased for the project. In 2016, right-of-way was dedicated for a portion of the new east/west roadway as part of an adjacent development project.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,000.

Project Title: A Street NW - Phase 1 (3rd St NW to 14th St NW)

TIP# S-1

Project No: c207a0

Project Type: Capacity, Environmental Monitoring

Project Manager: Tim Carlaw LOS Corridor ID# 18

Description:

The project constructed a new multi-lane arterial from 3rd Street NW to 14th Street NW completing a missing link along the corridor. This project improves mobility and was tied to corridor development. The project length was approximately three-quarters of a mile. The City purchased ROW from the northern property owner. If the property develops any access to A St NW, some or a portion of those funds may be reimbursed to the City (total cost was \$251,000).

Progress Summary:

Pre-design was completed prior to 2007. Final design and environmental permitting were completed in 2011 and construction was completed in 2013. Major plantings are scheduled in 2015 as part of the wetland monitoring that is required to continue until 2023.

Project Title: Auburn Way N/1st Street NE Signal Replacement TIP# I-1

Project No: CP1927
Project Type: Non-Capacity
Project Manager: Matt Larger

Project Manager: Matt Larson LOS Corridor ID# N/A

Description:

The project will replace the existing traffic signal at the Auburn Way N/1st Street NE signal. The signal was constructed in 1968 and is approaching the end of its service life. The project scope also includes the construction of ADA improvements, curb-bulbs, and storm improvements.

Progress Summary:

Future Impact on Operating Budget:

Replacing the traffic signal will reduce on-going maintenance costs to replace parts and equipment that have reached the end of their service life.

Special Revenue Fund

Project Title: ITS Dynamic Message Signs

Project No: asbd16, cp1701, cp1912
Project Type: Non-Capacity (ITS)
Project Manager: Seth Wickstrom

LOS Corridor ID# N/A

Description:

The program constructs Dynamic Message Signs at various locations throughout the City. Dynamic message signs are an important tool for communicating with roadway users in real time. Priority locations for sign placement are based on the Comprehensive Transportation Plans ITS map and include S. 277th, Auburn Way N, Auburn Way S, W Valley Highway, E Valley Highway, Lake Tapps Parkway, 15th St NW, and Lea Hill Rd.

Progress Summary:

The Auburn Way S and S 277th Street have been completed. The Lake Tapps Parkway and 15th Street NW signs are being constructed during 2021.

Future Impact on Operating Budget:

The annual maintenance and operational costs for this project is estimated to be \$750 per sign.

2022Year End

Project Title: Auburn Avenue/E Main Street Signal Replacement TIP# I-7

Project No: **cpxxxx**

Project Type: Non-Capacity

Project Manager: TBD LOS Corridor ID# N/A

Description:

This program will replace the existing traffic signal at the Auburn Avenue/E Main Street signal, which was constructed in 1968. The project scope also includes the construction of ADA improvements.

Progress Summary:

Future Impact on Operating Budget:

Replacing the traffic signal will reduce on-going maintenance costs to replace parts and equipment that have reached the end of their service life.

Project Title: Non-Motorized Safety Program TIP# N-1

Project No: asbd08, cp1804, cp1902
Project Type: Non-Capacity (Annual)

Project Manager: James Webb LOS Corridor ID# N/A

Description:

The program will construct non-motorized safety improvement projects at locations throughout the City. Projects are prioritized based on pedestrian and bicycle demands, existing deficiencies, field studies and community requests. Common improvements installed by this program include, but are not limited to, RRFBs, signage, striping, raised crosswalk, bicycle lanes, etc.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Special Revenue Fund

Project Title: M Street SE Sidewalk Improvements TIP# N-10

Project No: CP2012

Project Type: Non-Capacity, Non-Motorized

Project Manager: Luis Barba LOS Corridor ID# N/A

Description:

The project will construct sidewalks along the M Street SE corridor between Auburn Way S and 8th Street SE. The project will complete the missing sections of sidewalk along the west side of M Street SE between Auburn Way S and 8th Street SE, and will complete the missing segments of sidewalk along the east side between Auburn Way S and 12th Street SE. The project will construct approximately 2,000 linear feet of new sidewalk to match adjacent widths. The project will also construct ADA compliant curb ramps and relocate existing utility poles and overhead signage to provide ADA access.

Progress Summary:

Grant funding for the project was awarded by TIB in 2019. The design phase was initiated in 2020 and construction anticipated to be completed during 2021.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

ARTERIAL STREET PRESERVATION FUND (105)

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Special Revenue Funds

Project Title: Arterial Street Preservation Program TIP# P-1

Project No: Varies annually, spbd01, cp1718, cp1725, cp1803, cp1829, cp1926

Project Type: Non-Capacity, Preservation

Project Manager: Kenneth Clark LOS Corridor ID# N/A

Description:

The program preserves classified streets throughout the City. Individual projects may include a combination of crack seal, overlays, rebuilds, and spot repairs. The program also funds the biennial collection of pavement condition ratings. This program is funded through a 1% utility tax that was adopted by City Council in 2008. Program funds reflect remaining budget after allocations to specific arterial street preservation projects which are included as separate projects in this TIP.

Progress Summary:

During 2021, the Auburn Way N preservation projects and 15th Street NW reconstruction will be completed; the Lea Hill Road and 3rd Street SW bridge decks will be preserved; the reconstruction of 2nd Street SE will begin; 4th Street SE reconstruction is being designed; and arterial patching and crack seal projects are proposed.

Future Impact on Operating Budget:

This program is anticipated to reduce the operating budget for street maintenance.

Special Revenue Funds

TIP# P-3

Project Title: 2nd Street SE Preservation

Project No: **CP2003**

Project Type: Non-Capacity, Preservation

Jai Carter Project Manager:

Description:

This project will reconstruct 2nd Street SE between A Street SE and Auburn Way S. The reconstruction will utilize full depth reclamation techniques. The project will also address fixed objects located within the clear zone, remove barriers to ADA access, and install new LED street lighting.

Progress Summary:

Grant funding for this project was awarded by TIB in 2019. The design phase started in 2020.

Future Impact on Operating Budget:

This project is anticipated to reduce the operating budget for street maintenance.

Special Revenue Funds

Project Title: Lake Tapps Pkwy/Sumner-Tapps Hwy E Preservation

Lake Tapps I kwy/Summer-Tapps IIwy L I Test

TIP# P-6

Project No: spbd08

Project Type: Non-Capacity, Preservation
Project Manager: TBD

Description:

The project will grind and overlay the Lake Tapps Parkway/Sumner-Tapps Highway E corridor from the intersection of Lake Tapps Parkway with Lakeland Hills Way to the intersection of Sumner-Tapps Highway E with 16th Street E (the Auburn City limit). Portions of the corridor include a center two-way left-turn lane which does not require preservation and would be omitted from the grind and overlay. The project scope also includes upgrades to ADA curb ramps and pedestrian push buttons, and replacement of vehicle detection at signalized intersections.

Progress Summary:

Grant funding for the project was awarded in 2020.

Future Impact on Operating Budget:

This project is anticipated to reduce the operating budget for street maintenance.

ARTERIAL STREET PRESERVATION FUND (105)

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Special Revenue Fund

Project Title: A St SE Preservation (37th Street SE to Lakeland Hills Way) TIP# P-10

Project No: spbd09

Project Type: Non-Capacity, Preservation

Project Manager: TBD LOS Corridor ID# 10

Description:

The project will grind and overlay A Street SE from 37th Street SE to the Auburn/Pacific City Limit and from the Pacific/Auburn City Limit to the intersection with Lakeland Hills Way). The project also includes ADA upgrades to curb ramps, pedestrian push buttons, and replacement of vehicle detection loops.

Progress Summary:

Grant funding for the construction phase of this project is anticipated to be submitted in 2022. If awarded, the design phase would begin in 2023.

Future Impact on Operating Budget:

This project is anticipated to reduce the operating budget for street maintenance.

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Special Revenue Funds

Project Title: 4th Street SE Preservation (Auburn Way S to L Street SE)

TIP# P-14

Project No: CP2102
Project Type: Preservation
Project Manager: Jeff Bender

Description:

This project will replace pavement and utilities on 4th Street SE from Auburn Way South to L Street SE. A pavement grind and overlay is planned between Auburn Way South and D Street SE. Full depth pavement reclamation is planned from D Street SE to L Street SE. The project will also include replacement of City utilities, removal of sidewalk obstructions, replacement of sidewalk and curb ramps as needed to address ADA requirements, and other improvements.

Progress Summary:

Grant funding for the project was awarded by TIB in 2020.

Future Impact on Operating Budget:

This project is anticipated to reduce the operating budget for street maintenance.

WATER

Current Facilities

The City of Auburn water utility provides water supply, treatment, transmission, storage, distribution, and service connections to in-City residences and businesses. The City also provides water to the City of Algona under a wholesale agreement. The water system consists of wells, springs and interties for source; chlorination stations and corrosion control for treatment; pump stations, pressure reducing stations and pipelines for transmission; and steel and concrete enclosed reservoirs for storage. Table W-1, "Facilities Inventory", lists the facilities along with their current capacities and approximate locations.

Level of Service (LOS)

The City's Comprehensive Water Plan summarizes the design criteria and service polices for the City's water distribution system.

Capital Facilities Projects and Financing

The City of Auburn's water system anticipates eight capacity projects in the amount of \$17,274,823 and thirty non-capacity projects totaling \$33,044,015 for a 6-year planning expectation total of \$50,318,838. The financing plan is shown in Table W-2 followed by individual worksheets showing the project details.

The capacity projects will increase water supply quantities, storage, and distribution for growth of retail customers. The non-capacity projects will provide for pipeline improvements and replacements, delivery pressure improvements, water quality enhancements, comprehensive and resource management planning, pump station upgrades, telemetry system improvements, and meter upgrades.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for the water facilities during the six years 2023-2028.

Project Title: Cascade Water Alliance Water Purchase

Project No: cp1914
Project Type: Capacity

Project Manager: Susan Fenhaus

Description:

Financing of System Development Charges for the right to purchase water from Tacoma Public Utilities through the Second Supply Pipeline to meet future projected demand, based on agreements with Cascade Water Alliance. Council approved the agreements for permanent and reserve wholesale supply in September 2013. A new agreement with Tacoma was executed in 2014. Budget reflects purchase of permanent supply - payments of \$934,810 will continue from 2020 through 2029. Reserve supply will not be purchased and is not included.

Comprehensive Plan project S-04.

Progress Summary:

Ongoing payments through 2029

Future Impact on Operating Budget:

None

Project Title: Academy Pump Station #1 Pump Replacement

Project No: cp1916
Project Type: Capacity
Project Manager: Jeff Bender

Description:

The pump station is reaching the end of its useful life. The project will construct a new pump station with 4 pumps to meet peak demands and fire flow requirements. Pump station #1 will be removed and pump station #2 will be used for storage after the pumps are removed. Preliminary design found it to be more cost effective to build a new pump station and decommission both existing pump stations. The backup power generator will be replaced.

Comprehensive Plan project PS-07.

Progress Summary:

Construction underway in 2021.

Future Impact on Operating Budget:

No significant impact.

Project Title: Well 5/5A Upgrades

Project No: cpxxx
Project Type: Capacity
Project Manager: TBD

Description:

This project was identified in the 2016 Facilities Evaluation Study. Well 5 is in need of a new building, backup generator, chlorination, pump, and hydrologic investigation to evaluate the well's production. Due to the small size of the existing site, the acquisition of an adjacent parcel may be required. The Facilities Evaluation Study also identified the need for a new pump and motor in Well 5A. **Comprehensive Plan project S-06.**

Progress Summary:

The hydrologic study and property acquisition are anticipated to begin in 2025.

Future Impact on Operating Budget:

No significant Impact

Project Title: Reservoir Seismic Rehabilitation

Project No: wabd16
Project Type: Non-Capacity

Project Manager: **TBD**

Description:

Install seismic control valves on outlet piping of Reservoirs 4A, 4B, 8A, and 8B. This project will include a study to identify work to be completed at each site, and to further define project costs at each site. Costs for the remaining reservoirs will be updated based on the study. Seismic control valve for Reservoir 2 is a separate project.

Comprehensive Plan project R-06.

Progress Summary:

The study to identify the work to be completed at each site was completed in 2020. Individual sites will be planned based on the study results.

Future Impact on Operating Budget:

No significant impact

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Coal Creek Springs Transmission Main Replacement

Project No: cp1603
Project Type: Non-Capacity
Project Manager: Seth Wickstrom

Description:

The facilities evaluation study conducted in 2013-2014 found a suspected leak on the 24" steel transmission main crossing the White River. This project plans to provide for full replacement of the transmission main suspended from a pedestrian bridge to be constructed across the White River. Parks Department will participate in the project by providing funding from grants for the trail connections to the bridge. This option eliminates the deep blow-off and allows more flexibility for expansion. A future project would rehabilitate the existing transmission main for redundancy.

Comprehensive Plan project D-11.

Progress Summary:

Design underway in 2019 and 2020. Permitting in 2021. A DWSRF loan was applied for in 2020 for construction in 2022.

Future Impact on Operating Budget:

No significant impact

Project Title: Lea Hill Pump Station Replacement

Project No: wabd18
Project Type: Non-Capacity

Project Manager: TBD

Description:

Lea Hill pump station will be reconstructed to provide redundant pumped supply to the Lea Hill area. If the Green River Pump Station is out of service for maintenance, a redundant pump station would avoid the need to purchase more expensive regional surface water through the 132nd Intertie. The pump station needs to be relocated from its current location on the shoulder of Lea Hill Road at the base of a steep hill for safety and reliability considerations. The project will also construct approximately 900 feet of 12" transmission main along Lea Hill Rd from Garden Avenue to the existing pump station site.

Comprehensive Plan project PS-10.

Progress Summary:

Property acquisition completed in 2020 under Garden Ave Realignment project.

Future Impact on Operating Budget:

No significant Impact

Project Title: Deduct Meter Replacement Program, Phases 1 through 3

Project No: **cp1917, cp2001, cp2115**

Project Type: Non-Capacity
Project Manager: Jeff Bender

Description:

Approximately 200 non-single family irrigation meters within the water system are connected to the customer's supply line on the customer side of the domestic meter, instead of being directly connected to the water main. Since sewer charges for non-single family customers are based on the domestic water meter reading and irrigation water does not use the sewer system, customers ask to have the irrigation use deducted from their overall domestic use for sewer billing purposes. Thus, irrigation meters installed after the domestic meter are referred to as "deduct meters". To improve the billing process, increase staff efficiencies and eliminate manual calculations in the billing process this project will re-install the irrigation meters to directly connect to the main. Deduct meters will be converted to irrigation meters to more equitably bill water usage.

Progress Summary:

Construction was planned and budgeted to be completed in 4 years. Recent bids indicate the original cost estimate was low. The budget was increased in 2021 and 2022, and the project will be completed in 3 years (2020-2022).

Future Impact on Operating Budget:

No significant impact.

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Comprehensive Water Plan

Project No: wabd25
Project Type: Non-Capacity
Project Manager: Susan Fenhaus

Description:

Update the Comprehensive Water Plan as required by Washington Department of Health (DOH) by May 2022. DOH changed WAC to require a 10-year planning period which is an increase from the 6-year period. Current plan (2015) was approved before the code change, but was written to include the 10-year period in anticipation of the revised code. In August 2021, submitted update letter to DOH requesting extension of approved plan. The letter included a report of the demand forecast compared to actual demand, and report of the capital improvement plan. If the extension is approved, next complete plan will be due in 2025. However, the water plan will need to be updated in conjunction with the City's Comprehensive Plan due in 2024.

Progress Summary:

Request for current plan extension was submitted in 2021. Complete update will begin in 2022.

Future Impact on Operating Budget:

No significant impact.

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Well 4 Facility Improvements

Project No: cp2021
Project Type: Non-Capacity
Project Manager: Seth Wickstrom

Description:

This project was identified in the Facilities Evaluation Study. The project will include a comprehensive investigation and evaluation of the well operation. Findings from the evaluation will likely result in replacing the generator with a larger unit, possibly replacing the motor soft starter with a variable frequency drive (VFD), and replacing aging control valves, gate valves, and air relief system.

Comprehensive Plan project S-22.

Progress Summary:

Design underway in 2021, with construction anticipated to be complete in 2022.

Future Impact on Operating Budget:

No significant Impact

* MORE THAN YOU IMAGINED

SANITARY SEWER

Current Facilities

The City's sanitary sewer service area encompasses approximately 28-square miles that are primarily within the City limits but includes a total of approximately ½ square mile within Auburn's Proposed Annexation area (PAA). The City contracts with King County for sewage treatment and disposal. The City's Sanitary Sewer Utility is responsible for the collection and transmission of wastewater to the King County trunk lines.

The City's current inventory of approximately 218 miles of sewer lines serves the City's sewer service area. Table S-1, Facilities Inventory, lists the sewage collection and transmission facilities along with their capacities and locations.

Level of Service (LOS)

The Comprehensive Sewerage Plan for the Sewerage Collection System summarizes the level of service (LOS), or design criteria, for the City's sewage collection system. These standards represent the average quantities of sewage that the system is designated to accommodate for residential, industrial, and commercial development.

Capital Facilities Projects and Financing

Investments in the City's sewage collection facilities include primarily non-capacity improvements and replacement projects. Anticipated projects include replacement of aging sewer pipes and manholes in conjunction with arterial and local street improvements, replacement of pipe identified through the sewer program's condition assessment process, replacement of the Rainier Ridge Pump station, and updating the Comprehensive Sewer Plan. Additionally, the City will continue to monitor flow rates, primarily within the Valley Basin area to help identify specific areas of the City that show high levels of inflow and infiltration. The City of Auburn's sewer system includes one capacity project in the amount of \$75,000 and fifteen non-capacity projects totaling \$16,054,879 for an overall six-year plan of \$16,129,879. Table S-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for sanitary sewer facilities during the six years 2023 – 2028.

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Garden Avenue Re-alignment

Project No: CP2022
Project Type: Capacity
Project Manager: Kim Truong

Description:

Along with the extension of the road between Garden Avenue and 104th Ave SE, extend the existing sewer line in the new east/west roadway from the existing manhole to Garden Avenue (approx.. 220 feet of 8" PVC pipe). Install two side sewer stubs to the properties north and south of the new road extension.

Progress Summary:

Design for the project is underway. Project construction is anticipated to be completed in 2022

The majority of property owners along Garden Avenue either did not support or did not respond to questionnaire regarding additional sewer extensions along Garden Avenue, so they will not be included in the project.

Future Impact on Operating Budget:

No significant impact

Enterprise Funds

Project Title: Sanitary Sewer Repair & Replacement/System Improvements Program

Project No: sebd01

Project Type: Non-Capacity (Repair and Replacement)

Project Manager: Bob Elwell

Description:

Repair and replace (R&R) broken sewer mains and other facilities. These lines will be identified through television inspection and routine cleaning. This program includes funding for R&R projects which have not yet been identified as a separate R&R project or are not associated with transportation projects. Anticipated projects include bi-annual, stand-alone, repair and replacement projects for sewer lines which are broken, misaligned, "bellied" or otherwise require an inordinate amount of maintenance effort or present a risk of backup or trench failure, and facilities which generate consistent odor complaints. For efficiency and cost savings, sewer R&R may be combined with other public facility improvements. Additionally, system improvements which enhance the ability to maintain service are included here

Comprehensive Plan Project #1.

Progress Summary:

In 2021, funds from this program were transferred to CP2010 - 2021 Sewer Repair and Replacement project and CP2102 - 4th Street SE Preservation, which will use those funds to repair or replace sewer lines at 18 sites around the City.

Future Impact on Operating Budget:

This program should slightly decrease the operating budget by correcting the problems that require operation staff's attention.

Project Title: Sewer Vactor Decant Facility

Project No: sebd03

Project Type: Non-Capacity (Improvements)

Project Manager: **TBD**

Description:

Currently the City hauls vactored sewage waste to the County landfill on a biweekly basis. The sewage sludge is considerably wet, thus Utility funds are paying for the disposal of water. This project consists of a study/analysis to assess the City's vactor disposal method and identify a cost-effective alternative to the status quo. Possible recommendations may include maintaining current operations, constructing a gravity decant facility, incorporating special equipment into the vactor truck to increase decanting ability, purchasing specialized dewatering machinery, or collaborating with neighboring utilities for the shared use of facilities and equipment.

Comprehensive Plan Project #3.

Progress Summary:

This analysis will be completed in 2022.

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the expenses associated with hauling saturated waste to the County landfill.

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Manhole Ring and Cover Replacement

Project No: sebd04

Project Type: Non-Capacity (Repair and Replacement)

Project Manager: Bob Elwell

Description:

As manholes and roads age and their condition deteriorates, access covers and the rings in which they sit can become loose and/or misaligned, and can become a road hazard requiring maintenance staff attention and increasing the City's liability. This annual project will replace approximately 50 sewer manhole rings and covers to maintain access to the sewer system and to decrease the likelihood of the manholes becoming road hazards. In some years, this replacement will be as a standalone project, and in some years many of these replacements will be in conjunction with other City capital projects.

Comprehensive Plan Project #7.

Progress Summary:

Ongoing

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the need for staff to respond to loose manholes or lids.

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Sewer Pump Station Replacement/Improvement Program

Project No: sebd05

Project Type: Non-Capacity (Repair and Replacement/Improvements)

Project Manager: Bob Elwell

Description:

A a 4 is ei 4s es

The Sewer Utility's infrastructure currently consists of 17 public sewer pump stations that range in age from 2 to over 50 years old. As those stations age, and utility operations change, considerations such as station condition, component condition, capacity, reliability, and safety suggest that stations be upgraded, rehabilitated, and replaced. This program fund will provide funding to meet those needs through 2025.

Comprehensive Plan Project #4.

Progress Summary:

Following the results of the systematic pump station evaluation study, the 2017-2022 funds for this program were divided into the Pump Station Electrical Improvements project (for common improvements at many stations) and the Pump Station Replacement project (for Rainier Ridge) As future considerations of reliability, capacity, and condition are evaluated, and specific projects are developed, these funds will be designated for those projects.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Project Title: Pump Station Electrical Improvements

Project No: cp1812
Project Type: Non-capacity
Project Manager: Jeff Bender

Description:

This project will design and construction improvements to the City's sewer pump stations' electrical systems that were identifed by the 2016 Pump Station Condition Assessment Project. The additions and modifications are intended to increase employee safety as well as operational efficiency. They include adding dry well control panel disconnects, bringing intrinsically safe wiring up to code, organizing, labelling, and dressing out control panel boxes, adding dry well HMI computer screens, creating uniform as-built wiring diagrams for each station, as well as several other modifications identified for specific stations. Funding for this project was derived from the Sewer Pump Station Replacement/Improvement program (sebd05).

Progress Summary:

The project is anticipated to be substantially complete by the end of 2021, with project closeout in early 2022.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Project Title: Inflow and Infiltration Study

Project No: CP2124

Project Type: Non-Capacity (Improvement)

Project Manager: **Elwell**

Description:

This project will assess portions of the City Sewer Service Area for infiltration/inflow (I/I) values. Excessive localized I/I can be an indicator of poor sewer main and side sewer conditions and could contribute to capacity issues in the future. This project will monitor flow in the collection system over several years. This data will then be used to help identify repair and replacement needs, modeling purposes, and for I/I assessment in future updates to the Comprehensive Sewer Plan.

Comprehensive Plan Project #9.

Progress Summary:

Initial flow monitors were installed in May, 2020 with additional monitors were added in September/October, 2020. Monitoring locations for September/October, 2021 were determined based on the results of the initial phase of monitoring. The two years of data collection coincide with King County's flow monitoring program which will allow the data to be shared and correlated.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Project Title: Comprehensive Sewer Plan Update

Project No: sebd12

Project Type: Non-Capacity (Repair and Replacement/Improvement)

Project Manager: Bob Elwell

Description:

This project will prepare an update to the City's Sewer Comprehensive Plan to be adopted by City Council as part of the City's overall Comprehensive Plan to be completed by June 2024. City staff will prepare portions of the plan and will engage consultants to complete some of the tasks including hydraulic modeling, financial analysis, cost estimation and overal plan preparation/assembly.

Comprehensive Plan Project #10.

Progress Summary:

Activity:

Preliminary work on policy review, project schedule, and hiring a consultant for hydraulic modeling and plan preparation is anticipated to be completed 2021. The plan is anticipated to be completed by late 2023 for adoption with City Comprehensive Plan in 2024.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Project Title: M Street NE Widening

Project No: sebd08
Project Type: Non-Capacity

Project Manager: **TBD**

Description:

Replace approximately 170 LF of 12" and 20 LF of 8" vitrified clay sewer line in M St NE between Main Street and 1st St NE and replace approximately 100 LF of 8" PVC between 2nd and 3rd Street NE to repair a belly at the downstream end of the pipe in conjunction with street improvements.

Progress Summary:

Design is anticipated in 2022.

Future Impact on Operating Budget:

No significant Impact

Project Title: Rainier Ridge Pump Station Rehabilitation/Replacement

Project No: cp2009
Project Type: Non-capacity
Project Manager: Jai Carter

Description:

The Rainer Ridge Pump Station was constructed in 1980. Most of the property within its tributary basin has been fully developed, and the station has very little excess capacity. As such, there is a very short response time in the event of a pump failure, especially during peak use. Additionally, the PVC force main has had several breaks, and should be replaced. The initial phase of this project will examine the alternatives of rehabilitating the station, replacing major components, or replacing the entire station. The proposed funding assumes a complete replacement, and will be adjusted pending the alternatives analysis. Funding for this project was derived from the Sewer Pump Station Replacement/Improvement program (sebd05).

Progress Summary:

A consultant for the project has been selected, and design has begun on several replacement options.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

Project Title: 2021 Sewer Repair and Replacement

Project No: CP2010
Project Type: Non-capacity
Project Manager: Jai Carter

Description:

This project plans to replace a total of approximately 2585 LF of 8"-10" diameter sewer line at 9 separate sites, and to complete 10 spot repairs.

Progress Summary:

Project design began in 2020. The project began construction in August 2021 and is anticipated be completed in early 2022.

Future Impact on Operating Budget:

This project should slightly decrease the operating budget by correcting the problems that require operation staff's attention.

* MORE THAN YOU IMAGINED

STORM DRAINAGE

Current Facilities

The City's storm drainage service area encompasses the municipal boundaries of the City. The City's drainage system consists of a combination of closed conveyance pipes and open ditch conveyance facilities, with seven pumping stations. Table SD-1 Facilities Inventory lists the facilities along with their current capacities and location.

Level of Service (LOS)

The City's Comprehensive Drainage Plan summarizes the level of service (LOS), or design criteria, for the City's storm drainage system. Generally, these standards represent a 25-year/24-hour design storm capacity.

Capital Facilities Projects and Financing

The City's storm drainage facilities anticipate one capacity project in the amount of \$88,750 and 24 non-capacity projects totaling \$22,644,509 for a six-year planning expectation total of \$22,733,259. Table SD-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for storm drainage facilities during the six years 2023 – 2028.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: 37th St. NW Storm Improvement

Project No: cp1724
Project Type: Capacity
Project Manager: Luis Barba

Description:

Phase 1: Phase 1 will address storm improvements in the ROW. Project will eliminate a direct connection to the adjacent side channel to Mill Creek and tie into the main storm system. Phase 2: Project will replace the damaged and eroded existing pipes spanning the PSE substation access driveway in vicinity of 37th St NE near I St NW. During periods of prolonged heavy flows, this side channel to Mill Creek exceeds the capacity of the combined culverts and backs up onto 37th St. NW and also impacts the Interurban Trail.

Comprehensive Plan Project #2

Progress Summary:

The City has been awarded a \$210,000 King County Opportunity Grant for the overall project. Phase 1 will be bid and constructed in 2021 using storm funds only. Ongoing discussions with PSE continue for phase 2 with possible construction in 2022.

Future Impact on Operating Budget:

None

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Pipeline Repair & Replacement Program

Project No: sdbd03
Project Type: Non-Capacity

Project Manager: TBD

Description:

This program provides funding for projects involving replacement of existing infrastructure. These projects support street repairs and other utility replacement programs, requiring coordination.

Comprehensive Plan Project #1.

Progress Summary:

In 2021, this program transferred funding to the 4th Street (cp2102 - \$75K), the Arterial Pedestrian and Bike Safety Project (cp2119 - \$35K) and R St SE Improvements (cp2116 - 70K).

Future Impact on Operating Budget:

Repair and replacement of aging infrastructure should reduce operating costs.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: 2021 Storm Renewal & Replacement Project

Project No: cp2017
Project Type: Non-Capacity
Project Manager: Luis Barba

Description:

This project will provide improvements to the existing storm drainage system to eliminate known drainage issues and reduce maintenance at eight sites: Eastpoint Storm Pond, Mountain View Cemetery, SE 304th Street at 108th Ave SE, S 316th Street near 55th Ave S, Lakeland Hills Way at Oravetz Drive, Riverwalk Drive at Howard Rd, 2nd St NW at H St. NW and the south side of Mill Pond Drive near Oravetz Rd.

Progress Summary:

Design in 2020/2021, construction beginning fall 2021 with completion in early 2022.

Future Impact on Operating Budget:

Lower maintenance costs due to reducing stormwater runoff onto roadways and sidewalks.

STORM DRAINAGE FUND (462)

Capital Facilities Plan Enterprise Funds

Six Year Capital Facilities Plan, 2022-2027

Project Title: 30th Street NE Area Flooding, Phase 3

Project No: **CPXXXX**

Project Type: Non-Capacity

Project Manager: TBD

Description:

This project will reduce potential flooding in C St. NE by redirecting wet weather high flows southward to the 42-inch diameter (Phase 1) storm drain in 30th St. NE. By redirecting the C St. NE drainage into the Brannan Park system, these flows would no longer be affected by high water levels in Mill Creek. To avoid deepening the Phase 1 gravity line (and extensive retrofits to the Brannan Park pump station), this project would include a wet weather pump station and force main connection to 30th St. NE. The upgraded 42-inch diameter pipe in 30th St. NE would have sufficient capacity for these additional flows. Key components of Phase 3 include: Wet weather pump station (estimated capacity of 4.5 to 7 cfs), 1,730 feet of 15-inch diameter force main; Diversion structure in C St. NE for pump station. Comprehensive Plan Project #4B.

Progress Summary:

This project was moved from 2023-2024 to 2025-2026 to balance storm funding requirements throughout the capital facilities plan.

Future Impact on Operating Budget:

Impacts are expected to increase due to high level of maintenance required for pump stations.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: Vegetation Sorting Facility

Project No: sdbd12

Project Type: Non-Capacity

Project Manager: TBD

Description:

This project will prepare an evaluation of the benefits and costs of acquiring property to use as a vegetation sorting facility prior to disposal or reuse of materials from storm drainage maintenance activities (e.g., pond and ditch cleaning). The evaluation will identify potential use of a sorting facility by other City departments and by neighboring jurisdictions as a regional facility. If evaluation shows a reasonable benefit/cost ratio, the project implementation proceed with property acquisition and site improvements to construct the vegetation sorting facility. Cost includes bin barriers and sorting equipment to facilitate materials handling and separation.

Comprehensive Plan Project #10.

Progress Summary:

Due to lack of staff resources due to Covid, the evaluation and property purchase has been deferred to 2022.

Future Impact on Operating Budget:

Overall operating costs should decrease as a result of improved efficiency from the sorting facility.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: Regional Growth Center Access

Project No: cp2110
Project Type: Non-capacity
Project Manager: Seth Wickstrom

Description:

Along with the street reconstruction and other utility improvements, replace approximately 463 LF of existing 8" storm with 12" storm along Auburn Ave and 3rd St NE alignments. Also install approximately 80 LF new 12" storm in this area for local inflow. Install approximately 200 LF new 12" storm in 4th St NE between Auburn Way North and Auburn Ave for local inflow.

Progress Summary:

Design is underway in 2021 with construction expected in 2023.

Future Impact on Operating Budget:

None.

STORM DRAINAGE FUND (462)

Six Year Capital Facilities Plan, 2022-2027

Project Title: North Airport Area Storm Improvements

Project No: cp2026
Project Type: Non-Capacity
Project Manager: Seth Wickstrom

Description:

This project will reconfigure the storm lines that flow into "Pond I", an existing storm pond on Airport property at the northeast end of the runway. The specific items of work include removing existing storm pipe, installing approximately 470 linear feet of new 12-inch and 30-inch storm pipe, and restoring existing pavement and landscaping.

The purpose of this work is to better utilize the existing storage capacity available to the City's storm system on 30th St NE which will help reduced localized flooding around northern airport hangars during heavy rain events. This project will also allow the City to eventually eliminate one or more of the existing storm ponds at the north end of the Airport property in future.

Progress Summary:

Project completed in 2021.

Future Impact on Operating Budget:

Reduce maintenance costs and airport building damage due to flooding.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: D St. SE Storm Improvement

Project No: cp2125

Project Type: Non-Capacity
Project Manager: Jai Carter

Description:

This project will Install approximately 990 L.F. 30-inch, 630 L.F. 24-inch and 1230 L.F. 12-inch of new gravity storm drain pipe to convey the 25-year flow along D Street SE from a flooding area that caused by failing dry wells located near the intersection of D Street SE and 25th Street SE. Additionally, the project will install approximately 380 LF 12-inch gravity storm drain pipe in F Street SE from 27th to 26th Street SE to complete a missing line connection. Both of these systems direct flows to the existing 21st Street storm pond.

Comprehensive Plan Project #7.

Progress Summary:

Charter completed in 2021, design in 2022, construction in 2023. Construction costs escalated by 3% for delaying construction from 2022 to 2023.

Future Impact on Operating Budget:

Operating expenses are expected to decrease with the elimination of existing drywells.

Capital Facilities Plan Enterprise Funds

Project Title: S. 330th St. & 46th Pl. S. Storm Improvement

Project No: cp2018

Project Type: Non-Capacity

Project Manager: Barba

Description:

As part of the City's efforts to improve the drainage system in the West Hill annexation area, this project construct improvements near S. 330th Street and 46th Place S. where public storm drainage currently discharges within a large open ditch. The improvement will re-route the drainage within the right-of-way to the existing outfall.

Comprehensive Plan Project #5A.

Progress Summary:

Project design underway in 2020. The project is delayed due to environmental permitting. Anticipated construction in 2022.

Future Impact on Operating Budget:

None

Project Title: 23rd Street SE Storm Improvement

Project No: cp2126

Project Type: Non-Capacity
Project Manager: Jai Carter

Description:

This project will improve existing drainage conditions in vicinity of 23rd St. SE & K St. SE. In the 2015 Comprehensive Storm Drainage Plan, the project was divided into two phases: Phase 1 includes installation of 600 LF of 15-inch line along K St. SE from 23rd St. SE to 21st St. SE to alleviate flooding associated with the pedestrian entrance to Pioneer Elementary School, and Phase 2 includes installation of 560 LF of 18-inch line along 23rd St SE from F St. SE to K St. SE to convey flows to the F St. SE trunkline for discharge into the 21st St SE regional infiltration facility. Phases 1 and 2 will be constructed as a single project.

Comprehensive Plan Project #8 (Phase 1+2).

Progress Summary:

In 2020, the project implementation has been moved from 2020 to 2021 to coordinate with the redevelopment of Pioneer Elementary School. Design will begin in early 2022, with construction expected in 2023. Construction costs were escalated 3% from 2022 to 2023.

Project Title: Riverwalk Drive SE Non-Motorized Improvements

Project No: cp2121

Project Type: Non-Capacity
Project Manager: Jeff Bender

Description:

This project will construct large diameter storm piping to replace the existing roadside ditch, and expand the Riverwalk ponds to accommodate increased capacity due to the lost infiltration of the upstream ditch along Riverwalk Drive. The project will be implemented as part of the transportation project that will construct sidewalks along the east side of Riverwalk Drive SE from Howard Road and Auburn Way South.

Progress Summary:

Design beginning in 2021. Construction 2023.

Future Impact on Operating Budget:

Maintenance costs should decrease as a result of the project.

Six Year Capital Facilities Plan, 2022-2027

Project Title: Manhole & Catchbasin Frame and Grate Replacement

Project No: sdbd21

Project Type: Non-Capacity (Repair and Replacement)

Project Manager: **TBD**

Description:

As manholes & catchbasins age and their condition deteriorates, frame and grates can become loose and/or misoriented, or due to age are not meeting standards. This annual project will replace approximately 50 storm manhole and catchbasin frame and grates to maintain access to the storm system and to decrease the likelihood of the manholes becoming road hazards. In some years, this replacement will be as a stand-alone project, and in some years many of these replacements will be in conjunction with other City capital projects.

Progress Summary:

New program

Future Impact on Operating Budget:

Reduced risk of road hazard claims.

Project Manager: Matt Larson

Description:

This project addresses an existing storm-to-sanitary sewer cross connection(s) at the intersection of Auburn Way North and 1st Street SE with installation of new 12" storm pipes and manholes. The project is being implemented with the transportation project that is replacing the traffic signal and curb ramps at the intersection.

Progress Summary:

Construction will be completed in early 2022.

Future Impact on Operating Budget:

None

Project Title: Lead Service Line Replacement

Project No: CP1922
Project Type: Non-capacity
Project Manager: Carter

Description:

Along with the street reconstruction resulting from Water Utility improvements, replace approximately 673 LF of 12" DI storm at the following locations: 3rd at D St NE, 3rd at E St NE, 2nd St NE at Auburn Ave, 2nd at E St NE, 1st at D St NE, 1st at E St NE, D St SE between 2nd and 4th St SE, and B St SE at 14th St SE.

Progress Summary:

Design completed in 2021, construction to be completed in 2022.

Future Impact on Operating Budget:

None.

2022 Voor End

Six Year Capital Facilities Plan, 2022-2027

Project Title: North Airport Stormwater Improvement, Phase 2

Project No: cp2118
Project Type: Non-Capacity
Project Manager: Wickstrom

Description:

This project will eliminate Pond F and underground Pond G within subsurface chambers. Storm modeling for the north auburn airport area has determined that overall storage capacity is sufficient and will eliminate the existing bird netting and vegetation management for these two ponds.

Progress Summary:

Consultant scope and fee negotiation is in process. Design anticipated to begin September 2021. Construction in 2022.

Future Impact on Operating Budget:

Eliminating Pond F and undergrounding Pond G will significantly reduce the costs to maintain the bird netting and vegetation management within the ponds.

* MORE THAN YOU IMAGINED

PARKS, ARTS AND RECREATION

Current Facilities

The City of Auburn's Park system consists of a total of 953.39 acres of neighborhood and community parks, special use areas, open space and linear parks (trails).

Table PR – 1 "Facilities Inventory" lists all park and recreation land in the City's park system along with their current capacity and location.

Level of Service (LOS)

The current LOS provided by the City's park system represents the existing inventory of City-owned park acres divided by the 2022 projected City population of 85,041. This equates to 0.77 acres per 1,000 population for neighborhood parks, 2.80 acres per 1,000 population for community parks, 0.20 acres for linear parks, 4.56 acres for open space, and 3.03 acres for special use areas.

The proposed LOS provided by the City's park system represents the planned 2027 inventory of City-owned park acres divided by the 2027 projected City population of 89,379. This equates to 0.83 acres per 1,000 population for neighborhood parks, 3.12 acres per 1,000 population for community parks, 0.23 acres per 1,000 population for linear parks, 4.34 acres per 1,000 population for open space, and 2.85 acres per 1,000 population for special use areas.

Capital Facilities Projects and Financing

Parks and Recreation facilities include eleven capacity projects at a cost of \$15,163,850 and four non-capacity projects totaling \$740,000 for a 6-year planning total of \$15,903,850. Table PR – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table PR-3 shows, operating budget impacts of \$108,000 are forecasted for parks and recreation facilities during the six years 2023-2028.

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Capital Projects Fund

Project Title: Park Acquisitions/Development

Project No: gpbd04
Project Type: Capacity
Project Manager: Daryl Faber

Description:

Land and other property acquisitions to occur based on demand and deficiencies including parks, open space, trails, corridors and recreational facilities.

Progress Summary:

The City purchased the Auburn Avenue Theater and the Qares property in 2020.

Future Impact on Operating Budget:

None

Activity:

Capital Facilities Plan Capital Projects Fund

Project Title: Jacobsen Tree Farm Development

Project No: cp0609, cp2020
Project Type: Capacity
Project Manager: Daryl Faber

Description:

Develop the 29.3 acre site into a Community Park. A Master Plan for the park was completed in 2009 and will serve as a roadmap for development of the site. The newly annexed Lea Hill area of the City is deficient in park acreage.

Progress Si	ummary:
-------------	---------

Future Impact on Operating Budget:

No significant impact due to master plan. Future park development will result in maintenance and utility expenses undeterminable at this time.

Capital Facilities Plan
Capital Projects Fund

Six Year Capital Facilities Plan, 2022-2027

Project Title: West Hill Park Acquisition and Development

Project No: gpbd27
Project Type: Capacity
Project Manager: Jamie Kelly

Description:

Acquire property adjacent to Watershed property on the West Hill, and develop park. Park to be used as access to the trails on the watershed property. Improvements to include parking, playground, restroom, and kiosks.

Progress Summary:

The City has been exploring local and state funding for acquisition and development. Staff to send out form letters to existing property owners in an effort to gauge interest in selling suitable properties to the City.

Future Impact on Operating Budget:

Undetermined at this time.

Project Title: Miscellaneous Parks Improvements

Project No: various, gpbd03

Project Type: Capacity/Non-Capacity

Project Manager: Daryl Faber

Des		

Minor park improvements including shelters, roofs, playgrounds, irrigation and restrooms.

Progress Summary:

Project funding includes the Mill Pond Dock Improvement (cp1915) in 2019, funded \$25,000 to help complete the West Auburn Lake Park (cp1801) in 2020 and \$36,000 for the Lea Hill Mini Soccer Field Turf replacement (cp2122) in 2021

SENIOR CENTER

Current Facilities

The City of Auburn currently has one Senior Center. Table PR-5 Facilities Inventory lists the facility along with its current capacity and location.

Level of Service (LOS)

The current LOS of 145.32 square feet per 1,000 population is based on the existing inventory divided by the 2022 citywide population of 83,950. The proposed LOS of 136.50 square feet per 1,000 population is based on the projected inventory divided by the 2027-projected citywide population of 89,379.

Capital Facilities Projects and Financing

The CFP does not include any senior center capital facilities projects during 2022-2027

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for the senior center facility during the six years 2023 – 2028.

GENERAL MUNICIPAL BUILDINGS

Current Facilities

The current inventory of City government administration and operations facilities include 207,629 square feet for general government operations, 66,469 square feet for police services, and 38,646 square feet for fire protection, for a total of 312,744 square feet. Table GM - 1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 3,725.36 square feet per 1,000 population is based on the existing inventory divided by the 2022 citywide population of 83,950. The proposed LOS of 3,543.83 square feet per 1,000 population is based on the projected inventory divided by the 2027-projected citywide population of 89,379.

Capital Facilities Projects and Financing

The City's General Municipal Building facilities include four capital projects at a cost of \$2,195,510 and debt service at a cost of \$3.314.000 for a total of \$5,509,510. The major projects include (1) \$1,028,000 for the Auburn Arts & Culture Center Renovation, (2) \$810,000 for M&O Facility Improvement (3) \$320,000 for M&O Fuel Tank and \$3,314,000 for City Hall Annex debt service costs. Table GM – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table GM-3 shows, operating budget impacts of \$570,000 are forecasted for General Municipal buildings facilities during the six years 2023- 2028.

CAPITAL IMPROVEMENT FUND (328)

Capital Facilities Plan
Capital Projects Fund

Six Year Capital Facilities Plan, 2022-2027

Project Title: Auburn Arts & Culture Center Renovation

Project No: cp1612
Project Type: Capacity
Project Manager: Daryl Faber

Description:

Renovation to the property and building located at 20 Auburn Avenue (100 Auburn Avenue) Building for the creation of an Arts & Culture Center in downtown Auburn. The renovation of this building will allow increased access to the arts for all of Auburn residents and visitors. Having a dedicated Art Center alongside the Auburn Avenue Theater performing arts series has the potential to transform Auburn into an arts tourism destination within the South Puget Sound. This project is a high priority for the City of Auburn and the purchase of this important building was completed in 2016.

Progress Summary:

The City has secured \$898,000 in grant funding. The historic window restoration was completed in 2018, interior demolition started in 2019, and final renovation designs completed in 2020. It is anticipated that Phase 1 renovation of the main floor will begin in 2020 and continue through 2021. As a landmark building, exterior renovations must maintain the historic character of the building. Phase 2 renovations for the basement are expected to begin in 2023 at which time the City intends to apply for additional grant funds.

Future Impact on Operating Budget:

The annual operating budget fiscal impact is estimated to be \$95,000.

Description:

Project Title:

This project will enclose the existing eight bay large fleet covered parking area north of the Public Works M&O's main building by installing full height mechanically operated door systems. This project will also expand the existing M&O building with a new Central Stores and reconfigure the existing building to increase the fleet maintenance area.

Progress Summary:

Project design phase began in May 2021.

Future Impact on Operating Budget:

None

Six Year Capital Facilities Plan, 2022-2027

Capital Facilities Plan Enterprise Funds

Project Title: M&O Fuel Tank Replacement

Project No: erbd01

Project Type: Non-Capacity
Project Manager: Tyler Thompson

Description:

Replace three 10,000 gallon underground tanks with new above ground tanks. The existing tanks were installed in 1989 and are single wall fiberglass tanks. It will be a benefit to the City to have the tanks above ground in the future due to the reduced maintenance and inspection cost.

Progress Summary	²rogress S	ummary:
------------------	------------	---------

Future Impact on Operating Budget:

This project should reduce the operating budget due to lower maintenance and inspection costs.

COMMUNITY IMPROVEMENTS

Current Facilities

Community Improvements include the 104th Avenue Park development, sidewalk and traffic signal improvements, neighborhood traffic calming program, public art and phase two of the Auburn Environmental Park Boardwalk project.

Level of Service (LOS)

No Level of Service for community improvement projects have been identified at this time.

Capital Facilities Projects and Financing

The City's proposed Community Improvements include fourteen capital projects at a cost of \$8,582,900 and debt service at a cost of \$900,500 for a total of \$9,483,400. Table CI-2 shows the proposed financing plan followed by individual work sheets showing the project detail.

Impact on Future Operating Budgets

As Table CI-3 shows, because of the City Street light LED retrofit program the operating budget will save approximately \$785,000 for community improvement facilities during the six years 2023-2028.

Project Title: Auburn Way South (SR-164) - Southside Sidewalk Improvements TIP# N-7

Project No: gcbd10

Project Type: Capacity, Non-motorized, Safety

Project Manager: TBD

Description:

The project will construct missing sidewalk along the south side of Auburn Way S. The existing sidewalk along the south side currently ends at the intersection with Howard Road and restarts to the west of the intersection with Muckleshoot Plaza. The sidewalk gap extends for approximately 1,700 feet. The project also includes a Rapid Flashing Rectangular Beacon (RRFB) across Howard Road to provide a connection from the existing non-motorized facilities to the proposed improvements.

Progress Summary:

Grant funding from WSDOT was awarded in 2021. The design phase will start in 2022, with construction of the improvements completed during 2023. The City and Muckleshoot Indian Tribe have entered into a memorandum of understanding for improvements along the Auburn Way S corridor, and are currently negotiating the funding agreement for this project.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Capital Projects Fund

Six Year Capital Facilities Plan, 2022-2027

104th Ave. Park Development

Project No: cp1619
Project Type: Capacity
Project Manager: Jamie Kelly

Description:

Project Title:

Complete Master Plan and construct park improvements identified in the Master Plan. Anticipated improvements include parking, trails, restroom, and playground. Work associated with permit approvals is also included in the budget.

Progress Summary:

The City was awarded a State grant from RCO where funds became available in June 2019. Park staff is currently working with design consultant team and Public Works to design the project. Design is anticipated to be completed in 2021, and construction in Spring/Summer 2022.

Future Impact on Operating Budget:

The annual impact on the operating budget is estimated to be \$10,000 for temporary wages and \$2,500 for supplies.

Project Title: Citywide ADA & Sidewalk Improvements TIP# N-2

Project No: cp1804, cp1815, cp1902, cp2106, gcbd01

Project Type: Non-Capacity (Annual)

Project Manager: James Webb LOS Corridor ID# N/A

Description:

The program will construct citywide accessibility improvements to the public right-of-way sidewalk system including adding/upgrading curb ramps, removing barriers to access and completing gaps. Projects are prioritized annually based on pedestrian demands, existing deficiencies, and citizen requests. Program funds reflect remaining budget after allocations to specific ADA and sidewalk improvement projects.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Capital Projects Fund

TIP# N-11

Project Title: Lea Hill Safe Routes to Schools

Project No: gcbd16
Project Type: Non-Motorized

Project Manager: TBD

Description:

The project will construct non-motorized improvements along SE 304th St from Hazelwood Elementary School extending east to 124th Ave SE, and along the west side of 124th Ave SE to the south of SE 304th St. The project will complete multiple gaps in the existing non-motorized network. The project will also construct curb and gutter, ADA compliant curb ramps, driveways aprons and retaining walls associated with the new sidewalks. Utility poles will need to be relocated to accommodate the proposed sidewalk alignment in some locations. Additional lighting is proposed for pedestrian safety and will be incorporated onto existing/relocated utility poles, and an RRFB will be installed at the SE 304th St intersection with 116th Ave SE. Ancillary work, including but not limited to, property restoration, grading, storm upgrades, school zone beacon relocation, channelization, fencing, landscaping and mailbox relocation will be addressed with the project.

Progress Summary:

Grant funding is anticipated to be applied for in 2022. If secured, the design phase will be started in 2023.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Capital Projects Fund

Project Title: Citywide Street Lighting Improvements

Project No: cp1928, cp2005, gcbd09

Project Type: Non-Capacity
Project Manager: Scott Nutter

Description:

The project constructs lighting improvements throughout the City, including upgrading decorative street lights not converted to LED with the 2020 conversion project, and installing new street lights.

Progress Summary:

During 2021 a program is being developed to continue the conversion of decorative city street lights and non-city owned street lights which were not included in the 2020 LED conversion project.

Future Impact on Operating Budget:

New street lights installed with this program will increase the City's street light power costs but this increase will be offset by decreased power costs as existing standard street lights are converted to LED.

Capital Projects Fund

TIP# I-17

Project Title: City Street Light LED Retrofit

Project No: cp1920
Project Type: Non-Capacity
Project Manager: Scott Nutter

Description:

The project will convert all City owned cobra-head street lights to LED. This phase of the project will convert all City owned cobra-head street lights to LED and add smart lighting control technology. Federal grant funding for this phase of the project was awarded in 2019. Future phases to upgrade other types of City street lights (such as decorative residential and downtown decorative lights) to LED will be considered as additional funding is available.

Progress Summary:

A detailed audit of all existing City owned lights and the design phase of the project have been completed. The construction phase of the project is programmed to begin during Spring 2020. REET funds shown in 2021 reflect anticipated carry forward of 2020 funds to complete project in 2021.

Future Impact on Operating Budget:

Annual savings in power usage is anticipated to be \$130,000 per year. Additional maintenance savings will be realized in the reduction of materials for light replacement and is estimated to be \$20,000 per year.

Project Title: Neighborhood Traffic Safety Program

Project No: cp1814, cp1907, cp2013, gcbd06

Project Type: Non-Capacity (Annual)

Project Manager: Scott Nutter

Description:

This program will implement low-cost traffic calming strategies, supported by engineering studies as necessary. Projects will be selected annually based on requests from residents, or police concerns, crash history, and available staff and financial resources.

Progress Summary:

During 2020 and 2021 the scope of the program was reduced due to funding and staffing constraints. A budget ammendment is proposed for 2022 to allow the program to be resumed.

Future Impact on Operating Budget:

The traffic calming program will have no impact on the operating budget for street maintenance.

Project Title: City Wetland Mitigation Projects

Project No: cp1315
Project Type: Non-Capacity
Project Manager: Jeff Tate

Description:

This project designs and constructs off-site wetland mitigation in the Auburn Environmental Park for participating development projects as approved through the City's development review process. Design, construction, monitoring, and maintenance of the mitigation is funded through wetland mitigation fees collected by the City.

Progress Summary:

Replacement plantings for Auburn Airport tree removal conducted in 2013. Design and construction of mitigation for other development sites deferred to 2021. Years 2019-2024 scheduled for site monitoring only.

Future Impact on Operating Budget:

After construction, each wetland mitigation site will be monitored and maintained for a period of three to five years, depending on the specific requirements for the project. Funding for future year monitoring and maintenance is included in the development fees collected by the City, and is budgeted as part of the Capital Facilities Plan.

CAPITAL IMPROVEMENT FUND (328)

Capital Facilities Plan
Capital Projects Fund

Six Year Capital Facilities Plan, 2022-2027

Project Title: Auburn Environmental Park Boardwalk - Phase 2

Project No: cp1611

Project Type: Non-Capacity
Project Manager: Jeff Tate

Description:

The Auburn Environmental Park (AEP) provides vegetated natural open space within an urbanized area. The AEP provides opportunities for local economic development, water quality improvement, storm water detention, flood control, fish and wildlife enhancement, visual resources, public education, and passive recreation, including walking trails and bird viewing amenities. In 2012, the City completed the construction of approximately 1,200 lineal feet of the first phase (Phase 1) of an elevated boardwalk trail in the Auburn Environmental Park (AEP). This trail extended from West Main Street through existing wetlands in the AEP terminating at the base of the Bird Viewing Tower constructed in 2009. As part of the construction of the elevated boardwalk, the City also installed interpretative signage, bench seating, limited new vehicle parking on Western Avenue and over two acres of wetland species of trees, plants and shrubs. Phase 2 of the elevated boardwalk trail would construct a combination of up to approximately 2,000 lineal feet of surface trail and elevated boardwalk trail from the current terminus at the Bird Viewing Tower to a connection with the Interurban Trail. The Phase 2 project will further previous and current Councils' visions of the AEP providing passive recreation and environmental education opportunities for all Auburn citizens.

Progress Summary:

Design for this project is scheduled to start in fall of 2023.

Future Impact on Operating Budget:

Construction of the Phase 2 project is anticipated to incur approximately \$10,000 in annual operating costs to the City's operating budget. Operating costs are addressed in the Environmental Services portion of the Community Development and Public Works Department operating budget.

LOCAL REVITALIZATION FUND (330)

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Capital Projects Fund

Project Title: City Downtown Public Parking Lot Reconfiguration

Project No: cp1616

Project Type: Non-Capacity
Project Manager: Ingrid Gaub

Description:

Reconfigure the City owned public parking lot between Safeway and Main Street to address pedestrian and vehicular circulation; remove existing landscaping to allow more flexibility in the parking lot redesign; explore whether more parking stalls can be added to the lot to aid in providing additional customer parking within Downtown Auburn; and resurface the parking lot.

Progress Summary:

Monies to improve the parking lot adjacent to Safeway and the B Street Plaza were used to create safety and aesthetic improvements to the plaza. New catenary lighting and planters were added to the plaza as a short- to medium-term improvement. The lighting increases safety and the planters were added to delineate walking paths and create visual interest. Completion of design and construction is delayed until the Heritage Building is addressed.

Future Impact on Operating Budget:

None anticipated as the City already maintains the parking lot.

AIRPORT

Current Facilities

The City of Auburn operates the Auburn Municipal Airport, providing hangar and tie-down facilities/leasing space for aircraft-related businesses. As of 2017, there were approximately 142,000 take-offs and landings (aircraft operations) at the airport annually. Table A-1 "Facilities Inventory" lists the facilities with current capacity and location. The Airport Master Plan was completed in May 2015 for the period 2012 through 2032.

Level of Service (LOS)

The Auburn Municipal Airport Master Plan provides a maximum runway capacity (LOS standard) of 231,000 aircraft operations annually; one take-off or landing equals one aircraft operation. This LOS is recognized by the Federal Aviation Administration (FAA). The FAA requires the airport to have the capital facilities capacity (i.e., runways, taxiways, holding areas, terminal, hangars, water/sewer system, etc.) necessary to accommodate 100% of aircraft operations during any one year. By 2022, the Airport Master Plan forecasts the number of operations to be 198,623 – well below the capacity of the airport runway.

Capital Facilities Projects and Financing

The City's Airport facilities include ten non-capacity projects totaling \$16,876,460. These include the Runway/Taxiway Rehab, RSA grading & Precision Approach Path Indicator (PAPI) project, open T-hangar upgrades, and Airport office/middle ramp reconfigure project. Table A-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table A-3 shows, operating budget impacts of \$16,000 are forecasted for Airport facilities during the six years 2023 – 2028.

Project Title: Annual Repair and Maintenance of Airport Facilities

Project No: apbd05, cp1931
Project Type: Non-Capacity

Project Manager: **TBD**

Description:

Due to the current conditions of the Facilities at the Airport, this program provides for necessary maintenance and repair work such as slab sealing, roof replacement, hangar beam replacement, painting, electrical repairs, etc. for buildings identified in the 2018 Facility Condition Assessment as being in "Fair" to "Good" condition. Repair and maintenance of these facilities will help prolong the service life of these buildings.

Progress Summary:

Program began in 2017. In 2018, a Facilities Condition Assessment was completed.

Future Impact on Operating Budget:

This project will decrease the need for more costly repairs and maintenance on older buildings.

Activity:

Project Title: Jet A Fueling Facility

Project No: apbd04
Project Type: Non-Capacity
Project Manager: Ingrid Gaub

Description:

Construct any necessary site improvements to accommodate a temporary 2,000 gallon fueling truck for Jet A fuel on site in 2018. Design and Construct a permanent 12,000 gallon Fuel Tank for Jet A service at Airport in 2022 and 2023 after the runway extension is complete and demand for Jet A fuel is established. 50% split of funding between the airport and a private party.

Progress Summary:

Due to the minimal demand for Jet A and interest in private partner to install this project was moved 2024.

Future Impact on Operating Budget:

None

Capital Facilities Plan

Six Year Capital Facilities Plan, 2022-2027

Enterprise Funds

Project Title: Open T-Hangar Upgrades & Door Replacement

Project No: apbd14
Project Type: Non-Capacity

Project Manager: TBD

Description:

Due to the current conditions of the hangar facilities at the Airport, this program will replace or upgrade hangar facilities as they reach the end of their service life. A Facility Condition Assessment was completed in 2018. In 2019 an in depth analysis of the hangars' structure and roofing was conducted with a recommendation to not replace but upgrade the structures. The demand on the airport is greater for closed hangars vs open units. This project will convert 2 open hangar rows to closed hangars, and replace old doors on the airport's "H" hangar row. This will increase airport revenues at approximately \$100,000 annually. This will allow for 2 open rows to remain on the airport and provide greater hangar options for airport tenants.

Progress Summary:

Project is scheduled to begin and be completed in 2022.

Future Impact on Operating Budget:

Utilization of 750K dollar low interest airport loan offered by WSDOT Aviation, Airport funds and an FAA grant. In 2023 hangar revenues increase \$100,000 annually.

Activity:

Six Year Capital Facilities Plan, 2022-2027

Project Title: Runway/Taxiway Rehab, RSA Grading & PAPI project

Project No: apbd13
Project Type: Non-Capacity
Project Manager: Tim Mensonides

Description:

This project will complete a Fog seal of on the Airport Taxiways to extend the life of the pavement and complete rehabilitation of the Runway to prolong the useful life of the Runway. This project will also complete necessary improvements to the property purchased from the Park and Ride to be in compliance with the FAA requirements for the Runway Safety Area. In addition the project will install Precision Approach Path Indicator (PAPI) for Runway to replace aging Visual Approach Slope Indicator (VASI) system.

Progress Summary:

After discussion with the FAA this project combined the Runway/Taxiway Rehab, the RSA Grading and the PAPI project into one project as part of the 2021 -2026 Capital Facilities Plan.

Future Impact on Operating Budget:

\$2,000 annually for PAPI on-going maintenance and repair

CEMETERY

Current Facilities

The City owns two cemeteries. The Mountain View Cemetery is a fully developed facility (60 acres and five buildings) that provides burial services and related merchandise for the community. The Pioneer Cemetery is a historic cemetery that is no longer used for burial purposes. Table C-1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 32 burial plots/niches and cremation in ground plots per 1,000 population is based on the existing inventory divided by the estimated 2022 citywide population of 83,950. The proposed LOS of 30 burial and plots/niches and cremation in ground plots per 1,000 population is based on the projected inventory divided by the 2027-projected citywide population of 89,379.

Capital Facilities Projects and Financing

The City's Mountain View Cemetery facilities includes one capital projects costing \$355,000 to build a new mausoleum. Table C-2 shows the proposed financing plan followed by the worksheet showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecast for the cemetery during the six years 2023 – 2028.

FIRE PROTECTION

Current Facilities

The Valley Regional Fire Authority provides fire protection and rescue services to a 40-square mile area which includes the City of Auburn, the City of Algona, the City of Pacific and King County Fire Protection District 31. The Valley Regional Fire Authority operates out of five stations, which are manned 24 hours per day. The North Station #31 also serves as the department headquarters and includes a hose and training tower. Each station is assigned fire apparatus (Engines and Aid Vehicles). Table F–1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 0.20 fire apparatus per 1,000 population is based on the existing inventory (17 fire apparatus) divided by the 2022 citywide population estimate of 85,041. The proposed LOS of 0.20 fire apparatus per 1,000 is based on the 2027-planned inventory (18 fire apparatus) divided by the 2027-projected citywide population of 89,379.

Capital Facilities Projects and Financing

The Valley Regional Fire Authority includes one capital project at a cost of \$1,200,000 for fire apparatus enhancements and improvements. Table F-2 shows the proposed financing plan followed by an individual worksheet showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for fire protection during the six years 2023 – 2028.
