EXECUTIVE SUMMARY

A capital facilities element is one of the comprehensive plan elements required by Washington's Growth Management Act (GMA). Capital facilities generally have long useful lives, significant costs and tend to not be mobile.

The GMA requires that capital facilities elements include an inventory of existing capital facilities showing locations and capacities, a forecast of future needs for such capital facilities, proposed locations and capacities of new or expanded capital facilities and at least a six-year plan to finance capital facilities with identified sources of funding. The GMA also requires that the land use element be reassessed if probable funding falls short of existing needs.

This document is the City's six-year Capital Facilities Plan (CFP). The CFP, in conjunction with other City adopted documents, satisfies the GMA requirement for a Capital Facilities Element. It addresses one of the GMA's basic tenets: to provide adequate facilities to support development in accordance with locally adopted level of service standards.

This CFP will enable the City to: (1) make informed decisions about its investment of public dollars, and (2) make timely decisions about maintaining level of service in accordance with this CFP and other adopted plans.

CAPITAL FACILITIES PLAN CONTENT

This CFP consists of the following:

Chapter 1.	Introduction	Purpose of CFP, statutory requirements, methodology.
Chapter 2.	Goals and Policies	Goals and policies related to the provision of capital facilities.
the financing plan an		Proposed capital projects, which include the financing plan and reconciliation of project capacity to level of service (LOS) standards.

This CFP is a companion document to the Capital Facilities Element of the Auburn Comprehensive Plan. The Capital Facilities Element of the Auburn Comprehensive Plan identifies the City's planning approach and policy framework for the provision of capital facilities. This CFP provides the background inventory, identifies proposed projects and establishes the six-year capital facilities plan for financing capital facilities.

The comprehensive plan contains timeframes which are the intended framework for future funding decisions and within which future actions and decisions are intended to occur. However, these timeframes are estimates; depending on factors involved in the processing

of applications and project work, and the availability of funding, the timing may change from the included timeframes. The framework does not represent actual commitments by the City of Auburn that may depend on funding resources available.

GROWTH ASSUMPTIONS

In planning for capital facilities, contemplation of future growth needs to be considered. The CFP is based on the following City population forecast:

Year	Population
2014	74,630
2015	75,545
2021	85,912

The population forecasts are based on information from the State of Washington Office of Financial Management (OFM) as well as estimates developed by the City of Auburn Planning and Community Development Department.

CAPITAL COSTS OF FACILITIES

Based on the analysis of capital improvements contained in this document, the cost of Cityowned and managed capital improvements for 2016-2021 is summarized as follows:

Type of Facility	2016 - 2021
Transportation - Arterial (102)	\$ 123,088,541
Transportation - Local (103)	9,600,000
Transportation - Street (105)	15,762,850
Water	35,758,154
Sanitary Sewer	12,751,000
Storm Drainage	17,685,618
Parks, Arts & Recreation	20,710,000
General Municipal Buildings	5,140,850
Community Improvements	5,724,670
Airport	8,078,650
Total	\$ 254,300,333

FINANCING FOR CAPITAL FACILITIES

Funding Source	2016 - 2021	Capital Facility
Grants	79,143,903	Transportation
(Includes grant funding that has not	4,605,000	Parks, Arts & Recreation
been secured)	1,150,000	Community Improvements
	7,541,717	Airport
User Fees / Fund Balance	21,338,154	Water
	13,151,000	Sewer
	17,832,776	Storm Drainage
	150,000	Community Improvements
	1,075,000	Equipment Rental
	536,933	Airport
Arterial Street Fund	4,657,000	Transportation
Arterial Street Preservation Fund	401,750	Transportation
Bond Proceeds	14,520,000	Water
	252,842	Storm Drainage
	6,000,000	Parks, Arts & Recreation
Municipal Parks Fund	435,000	Parks, Arts & Recreation
Property Tax	735,000	Parks, Arts & Recreation
Sales Tax	8,700,000	Transportation
Utility Tax	13,307,850	Transportation
Mitigation/Impact Fees	15,809,214	Transportation
	910,000	Parks, Arts & Recreation
	176,570	Community Improvements
REET 1	759,219	Parks, Arts & Recreation
	425,000	Community Improvements
	4,065,850	General Municipal Buildings
REET 2	3,573,100	Community Improvements
	300,000	Transportation
Other Sources	25,231,674	Transportation
	250,000	Community Improvements
	7,265,781	Parks, Arts & Recreation
Total	\$ 254,300,333	

The financing plan for the citywide capital improvements includes:

SUMMARY OF IMPACTS ON FUTURE OPERATING BUDGETS

The forecasted impacts of new capital facilities on the City's future operating budgets (2017-2022) are as follows:

	Budget Year:	2017	2018	2019	2020	2021	2022	Total
1	Transportation	\$ 86,707	\$ 95,807	\$105,807	\$ 188,807	\$258,857	\$ 258,857	\$ 994,842
2	Water	-	-	600	600	600	600	2,400
3	Sanitary Sewer	-	-	-	-	-	-	-
4	Storm Drainage	-	-	-	-	-	-	-
5	Solid Waste	-	-	-	-	-	-	-
6	Parks, Arts and Recreation	171,000	171,000	183,000	183,000	183,000	183,000	1,074,000
7	General Municipal Buildings	-	-	-	-	-	-	-
8	Community Improvements	-	-	10,000	10,000	10,000	10,000	40,000
9	Airport	-	-	-	-	-	-	-
10	Cemetery	-	-	-	-	-	-	-
11	Golf Course	-	-	-	-	-	-	-

LEVEL OF SERVICE (LOS) CONSEQUENCES OF THE CFP

Based on the proposed six-year capital projects and the projected population increase of 10,658 (13.7%) between 2015 and 2021, the LOS for the following City-owned public facilities will change as follows:

The LOS for the following facilities will be increased as a result of the CFP, comparing the 2015 LOS to the projected 2021 LOS.

CAPITAL FACILITY	LOS UNITS	2015 LOS	2021 LOS
			(Projected)
Cemetery	Burial Plots per 1,000 Pop.	27.13	40.44
Community Parks	Acres per 1,000 Pop.	2.96	3.12
Linear Parks	Acres per 1,000 Pop.	0.23	0.24
Neighborhood Parks	Acres per 1,000 Pop.	0.77	0.79

The LOS for the following facilities will be maintained as a result of the CFP.

CAPITAL FACILITY	LOS UNITS	2015 LOS	2021 LOS	
			(Projected)	
Roads	Volume/Capacity Ratio	"D"	"D"	
Airport	% Air Operations Support	100%	100%	
Sanitary Sewer	Residential GPCPD (Note 1)	171.00	171.00	
Storm Drainage	N/A			
Water	Residential GPCPD (Note 1)	230.00	230.00	
<i>Note 1:</i> GPCPD = Gallons per Customer per Day				

The LOS for the following facilities will be decreased as a result of the CFP, comparing the 2015 LOS to the projected 2021 LOS.

CAPITAL FACILITY	LOS UNITS	2015 LOS	2021 LOS
			(Projected)
Fire Protection	Apparatus per 1,000 Pop.	0.23	0.21
General Municipal Buildings	Sq. Ft. per 1,000 Pop.	3,895.98	3,585.62
Open Space	Acres per 1,000 Pop.	5.12	4.50
Senior Center	Sq. Ft. per 1,000 Pop.	154.43	135.80
Special Use Areas	Acres per 1,000 Pop.	3.37	2.96

Level of Service (LOS) is a common measure used to determine the efficiency or effectiveness of services. For the City of Auburn, LOS targets serves as a means to assess the adequacy of public facilities in meeting the needs of the population for which it serves.

For example, in the case of park space, when there is an increase in population without a corresponding increase in park acreage, the LOS unit of measure (acres per 1,000 population) will decline, indicating a potential need to increase the total amount of park acreage to keep pace with population growth. On the other hand, a slight increase in population, coupled with a large increase in facilities, will result in an increased LOS. For example, facilities such as buildings or burial plots may be constructed or expanded to keep pace with anticipated population growth. While this will have the effect of increasing LOS in the short-term, in the longer-term, the LOS will gradually decline to the targeted level based on forecasted population. The impact of population growth to the LOS for facilities will vary depending on the type of facility and long range planning by the City.

CFP ELEMENT SOURCE DOCUMENTS

Documents used in preparing this Capital Facilities Plan (CFP) are principally the comprehensive plans for the various public facilities included in this CFP. These individual comprehensive plans provide detailed identification of projects and identify their (projects) proposed funding sources.

City documents include:

- City-wide Comprehensive Land Use Plan Element (2014);
- City Municipal Airport Master Plan Update (2012-2032);
- City Comprehensive Water Plan (2015);
- City Comprehensive Transportation Plan (2012) and Six Year Transportation Improvement Program (2016-2021);
- City Comprehensive Drainage Plan (2015);
- City Comprehensive Sewer Plan (2015);
- City 2015-16 Biennial Budget and 2014 Annual Financial Report; and,
- Master plan update for parks, as well as numerous other planning and financial documents.

All documents are available for public inspection at the City of Auburn.

CHAPTER 1

INTRODUCTION

PURPOSE

The Capital Facilities Plan (CFP) is a 6-year plan (2016-2021) for capital improvements that support the City of Auburn's current and future growth.

In this plan, funding for general government projects is identified. To maintain consistency with individual master and utility comprehensive plans, applicable projects in the 6-year window of those master/utility plans are included in this CFP. The CFP also identifies LOS standards, where applicable, for each public facility.

STATUTORY REQUIREMENTS FOR CAPITAL FACILITIES ELEMENTS

RCW 36.70A.070(3)(d) requires that the comprehensive plan capital facilities element include "a six-year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes." RCW 36.70A.070(3)(e) requires that all capital facilities have "probable funding" to pay for capital facility needs, or else the City must "reassess the land use element."

In addition, the capital facilities element must include the location and capacity of existing facilities, a forecast of future needs, and their proposed locations and capacities. The State Growth Management Act (GMA) guidelines suggest that this analysis be accomplished for water systems, sanitary sewer systems, storm water facilities, schools, parks and recreation facilities, police and fire protection facilities.

The GMA also seeks the selection of level of service standards for capital facilities. As a result, public facilities in the CFP should be based on quantifiable, objective measures of capacity such as traffic volume, capacity per mile of road and acres of park per capita. In some instances, though, level of service may best be expressed in terms of qualitative statements of satisfaction with a particular public facility. Factors that influence local level of service standards include, but are not limited to, community goals, national and local standards, and Federal and State mandates.

To be effective, the CFP must be updated on a regular basis. State GMA guidelines suggest that the CFP be updated at least every two years. In 2007, the City transitioned to a biennial budget. With this in mind, the City will follow these guidelines and update the CFP at least every two years, incorporating the capital facilities improvements in the City's biennial budget process.

CONCURRENCY AND LEVEL OF SERVICE

Concurrency

The GMA requires that jurisdictions have certain capital facilities in place or available within a specified time frame when development occurs. This concept is called concurrency. Under the GMA, concurrency is required for transportation facilities and is recommended by the State for certain other public facilities, namely potable water and sanitary sewer. Concurrency has a direct relationship to level of service. The importance of concurrency to capital facilities planning is that development may be denied if it reduces the level of service for a capital facility below the locally adopted minimum. The level of service is unique for each type of facility and is presented in the subsequent sections.

Explanation of Level of Service

As indicated earlier, the GMA requires that level of service be established for certain transportation facilities for the purposes of applying concurrency to development proposals. The State GMA guidelines recommend the adoption of level of service standards for other capital facilities to measure the provision of adequate public facilities.

Typically, measures of level of service are expressed as ratios of facility capacity to demand (i.e., actual or potential users). Table 1-1 lists generic examples of level of service measures for some capital facilities:

Type of Facility	Sample Level of Service Measure
General Municipal Buildings	Square feet per 1,000 population
Parks	Acres per 1,000 population
Roads and Streets	Ratio of actual volume to design capacity
Sewer / Water	Gallons per customer per day

TABLE 1-1 Sample Level of Service Measurements

The need for capital facilities is largely determined by a community's adopted LOS standards and whether or not the community has formally designated capital facilities, other than transportation, as necessary for development to meet the concurrency test. The CFP itself is therefore largely influenced by the selection of the level of service standards. Level of service standards are measures of the quality of life in the City. The standards should be based on the City's vision of its future and its values.

IMPLEMENTATION

Implementation of the CFP requires constant monitoring and evaluation. The CFP is sensitive to funding and revenue availability and therefore needs to be constantly monitored against variations in available resources. To facilitate its implementation, the CFP should be kept current.

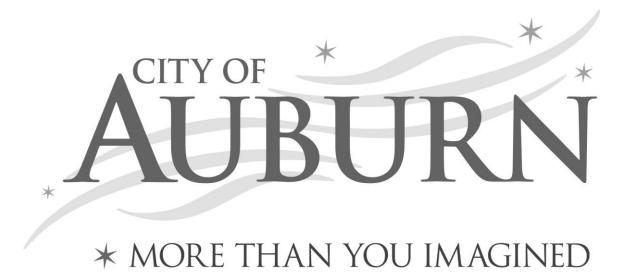

Update of Capital Facilities Plan

Perhaps the most desirable way to keep the CFP current is to update it regularly so the sixyear plan is a rolling CFP. Again, the State recommends that the CFP be updated at least biennially.

The City of Auburn will seek to update the CFP at least biennially in conjunction with the budget process. Future updates will consider:

- A. Revision of population projections, including annexations;
- B. Update of inventory of public facilities;
- C. Update of costs of public facilities;
- D. Update of public facilities requirements analysis (actual level of service compared to adopted standards);
- E. Update of revenue forecasts;
- F. Revise and develop capital improvement projects for the next six fiscal years; and,
- G. Update analysis of financial capacity.

Amendments to the CFP, including amendments to level of service standards, capital projects, and/or the financing plan sources of revenue are all actions that can keep the CFP current and relevant to City decision-making.

CHAPTER 2

GOALS AND POLICIES

This chapter identifies goals and policies specific to the City's provision of capital facilities.

- Goal 1 Provide a variety of responses to the demands of growth on public facilities.
- Policy 1.1 Establish land use patterns that optimize the use of public facilities.
- Policy 1.2 Provide additional public facility capacity when existing facilities are used to their maximum level of efficiency (consistent with adopted standards for level of service).
- Policy 1.3 Encourage development where new public facilities can be provided in an efficient manner.
- Policy 1.4 Exempt the following from the concurrency management program:
 - 1.4.1 Development vested by RCW 19.27.095, 58.17.033 or 58.17.170.
 - 1.4.2 Development that creates no added impact on public facilities.
 - 1.4.3 Expansions of existing development that were disclosed and tested for concurrency as part of the original application.

Goal 2 Provide needed public facilities that are within the ability of the City to fund or within the City's authority to require others to provide.

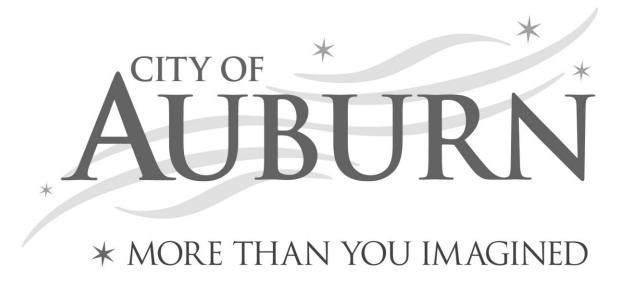

- Policy 2.1 Establish level of service standards that are achievable with the financing plan of this Capital Facilities Plan.
- Policy 2.2 Base the financing plan for public facilities on realistic estimates of current local revenues and external revenues that are reasonably anticipated to be received by the City.
- Policy 2.3 Match revenue sources to capital projects on the basis of sound fiscal policies.
 - 2.3.1 The City shall continue to fund utility costs through utility enterprise funds, based on user fees and grants. Public facilities included in utilities are sewer, solid waste, storm drainage, and water.
 - 2.3.2 Where feasible pursue joint venture facility construction, construction timing, and other facility coordination measures for City provided facilities, as well as with school districts and other potential partners in developing public facilities.
 - 2.3.3 The City shall continue to assist through direct participation, LIDs and payback agreements, where appropriate and financially feasible. Where funding is available, the City may participate in developer initiated facility extensions or improvements, but only to the extent that the improvements benefit the broader public interest, and are consistent with the policies of this Capital Facilities Plan.

- Policy 2.4 If the projected funding is inadequate to finance needed public facilities and utilities based on adopted level of service standards and forecasted growth, the City will do one or more of the following to achieve a balance between available revenue and needed public facilities:
 - 2.4.1 Lower the level of service standards;
 - 2.4.2 Increase the amount of revenue from existing sources;
 - 2.4.3 Adopt new sources of revenue;
 - 2.4.4 Require developers to provide such facilities at their own expense; and/or
 - 2.4.5 Amend the Land Use Element to reduce the need for additional public facilities.
- Policy 2.5 Both existing and future development will pay for the costs of needed capital improvements.
 - 2.5.1 Ensure that existing development pays for capital improvements that reduce or eliminate existing deficiencies, and pays for some or all of the cost to replace obsolete or worn out facilities. Existing development may also pay a portion of the cost of capital improvements needed by future development. Existing development's payments may take the form of user fees, charges for services, special assessments and taxes.
 - 2.5.2 Ensure that future development pays a proportionate share of the cost of new facilities which it requires. Future development may also pay a portion of the cost to replace obsolete or worn-out facilities. Future development's payments may take the form of voluntary contributions for the benefit of any public facility, impact fees, mitigation payments, capacity fees, dedications of land, provision of public facilities, and future payments of user's fees, charges for services, special assessments and taxes.
- Policy 2.6 The City will determine the priority of public facility capital improvements using the following criteria as general guidelines. Any revenue source that cannot be used for the highest priority will be used beginning with the highest priority for which the revenue can legally be expended.
 - 2.6.1 Projects that eliminate hazardous conditions.
 - 2.6.2 Refurbishment of existing facilities that contribute to achieving or maintaining standards for adopted level of service.
 - 2.6.3 New or expanded facilities that reduce or eliminate deficiencies in level of service for existing demand.
 - 2.6.4 New or expanded facilities that provide the adopted level of service for new development and redevelopment during the next six fiscal years.
 - 2.6.5 Capital improvements that significantly reduce the operating cost of providing a service or facility, or otherwise mitigate impacts of public facilities on future operating budgets.

- 2.6.6 Capital improvements that contribute to stabilizing and developing the economy of the City.
- 2.6.7 Project priorities may also involve additional criteria that are unique to each type of public facility, as described in other elements of this Comprehensive Plan.
- Policy 2.7 Ensure that the ongoing operating and maintenance costs of a capital facility are financially feasible prior to constructing the facility.

Goal 3 Protect public health, environmental quality, and neighborhood stability and viability through the appropriate design and installation of public facilities.

- Policy 3.1 Promote conservation of energy, water and other natural resources in the location and design of public facilities.
- Policy 3.2 Require the separation of sanitary and storm sewer facilities wherever combined sewers may be discovered.
- Policy 3.3 Practice efficient and environmentally responsible maintenance and operating procedures.
- Policy 3.4 The siting, design, construction and improvement of all public buildings shall be done in full compliance with the Americans with Disabilities Act (ADA).
- Policy 3.5 Promote economic and community stability and growth through strategic investments in public facilities and public private/partnerships.
- Goal 4 Make the Capital Facilities Plan consistent with other elements of the comprehensive plan, and to the extent feasible with other city, county, regional and state adopted plans.
- Policy 4.1 Ensure that the growth and development assumptions used in the Capital Facilities Plan are consistent with similar assumptions in other elements of the comprehensive plan.
- Policy 4.2 Coordinate with non-city providers of public facilities on a joint program for maintaining applicable level of service standards, concurrency requirements, funding and construction of public facilities.
- Goal 5 Provide public facilities that provide a sense of community that is inclusive of diverse populations.
- Policy 5.1 Contribute to community pride and foster a sense of community through provision of public facilities that create a community gathering place for neighbors, family and friends.
- Policy 5.2 Through provision of public facilities offer a broad range of activities promoting social interactions especially with new residents.
- Policy 5.3 Provide maximum flexibility and multiple uses through design of public facilities that are adaptable to changing interests.
- Policy 5.4 Provide a community center facility that is financially feasible, affordable for participants, and can generate revenue to offset a portion of the operating costs.

CHAPTER 3

CAPITAL IMPROVEMENTS

1. INTRODUCTION

This CFP includes City capital improvement projects and the financing plan to pay for those projects. It also contains the inventory of existing City facilities, and identifies level of service standards, where applicable. Each type of City public facility is presented in a separate subsection that follows a standard format. Throughout this section, tables of data are identified with abbreviations that correspond to the type of facility. For example, Table W-1 refers to Table 1 for Water (Supply and Distribution). Each abbreviation corresponds to the name of the type of facility.

1. Narrative Summary

This is an overview of the data, with sections devoted to Current Facilities, Level of Service, Capital Facilities Projects and Financing, and Impact on Future Operating Budgets.

2. Inventory of Facilities (Table X-1)

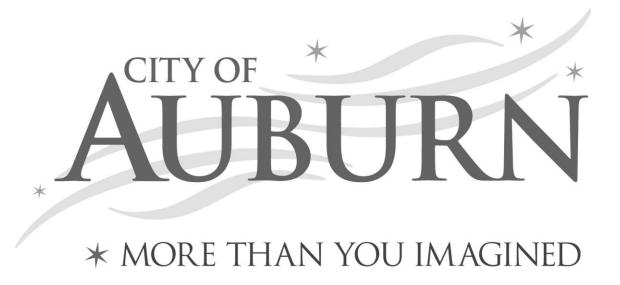

This is a list of existing capital facilities, including the name, capacity (for reference to level of service), and location. This table also includes any proposed capital projects and the planned inventory total through December 31, 2021.

3. Capital Projects and Financing Plan (Table X-2, X-2A and X-2B)

This is a list of capital improvements that identifies existing deficiencies, identifies facilities needed for future growth, and identifies the need to repair or replace obsolete or worn out facilities through December 31, 2021. Each list shows the proposed financing plan followed by individual worksheets showing the project detail.

4. Impact on Future Operating Budgets (Table X-3)

This is a list of new capital projects and the forecasted impacts on the City's future operating budgets (2017 - 2022).

TRANSPORTATION

Current Facilities

<u>Roadways:</u> The City's street system consists of a network of 216 miles of arterials, collectors, local streets and alleys. Existing non-motorized facilities include a mix of trails, sidewalks, bicycle lanes and sharrows.

<u>Transit:</u> King County Metro Transit, Sound Transit and Pierce Transit serve the Auburn area. Auburn is currently served by eight Metro bus routes, two Sound Transit bus routes, and one Pierce Transit bus route. In addition, twenty Sound Transit "Sounder" commuter rail trains stop at the Auburn Station. The Sounder also provides special event service to selected sporting events. Bus and rail service is supported by park and ride facilities and the Auburn Station.

Level of Service (LOS)

Washington's Growth Management Act (GMA) requires Level of Service (LOS) standards for both arterials and transit routes. The GMA requires that each jurisdiction's LOS standards be coordinated within the region and be supported by local ordinance, but the actual standards and the methods used are determined by each local jurisdiction.

Under GMA, the focus is on the performance of the whole road system, not on individual intersections or roadways. LOS standards are a tool to help keep the transportation system in balance with the needs of forecast population growth and development. Table T-1a summarizes the LOS definitions.

Table T-1aDefinition of Urban Street Level of Service (LOS)

LOS A - describes primarily free flow operations at average travel speeds, usually about 90 percent of the free flow speed for the given street class. Vehicles are completely unimpeded in their ability to maneuver within the traffic stream. Control delay at signalized intersections is minimal.

LOS B - describes reasonably unimpeded operations at average travel speeds, usually about 70 percent of the free flow speed for the street class. The ability to maneuver within the traffic stream is only slightly restricted, and stopped delays are not bothersome.

LOS C - describes stable conditions; however, ability to maneuver and change lanes in midblock locations may be more restricted than in LOS B, and longer queues, adverse signal coordination, or both may contribute to lower average travel speeds of about 50 percent of the free flow speed for the street class.

LOS D - borders on a range in which small increases in flow may cause substantial increases in delay and decreases in travel speed. LOS D may be due to adverse signal progression, inappropriate signal timing, high volumes, or some combination of these factors. Average travel speeds are about 40 percent of free flow speed.

LOS E - is characterized by significant delays and average travel speeds of 33 percent or less of the free flow speed. Such operations are caused by a combination of adverse progression, high signal density, high volumes, extensive delays at critical intersections, and inappropriate signal timing.

LOS F - is characterized by urban street flow at extremely low speeds, typically one-third to one-fourth of the free flow speed. Intersection congestion is likely at critical signalized locations, with high delays, high volumes and extensive queuing.

Source: 2010 Highw ay Capacity Manual, Special Report 209, Transportation Research Board, Washington, D.C. 2010, page 10-5

A methodology and set of standards have been drafted for the City of Auburn Comprehensive Plan. The standards help determine concurrency (i.e., balance) between transportation and land use elements of the City's Comprehensive Plan, as required by the GMA. The City has four choices if it finds the standards cannot be met.

- Modify the land use plan, placing tighter controls on the amount and type of development to reduce traffic.
- Construct additional transportation facilities to support increased travel demand from new development.
- Implement Transportation Demand Management (TDM) measures to increase use of non single occupant vehicle travel modes.
- Relax the LOS standards; the City can accept lower level of service standards to encourage further growth and minimize the need for additional transportation facilities.

The transportation land-use balance will be monitored through the City's Concurrency Management System as part of the State Environmental Policy Act (SEPA). Transportation concurrency will be evaluated for key facilities and on a system-wide basis. By having system-wide and facility-based roadway LOS standards, the City of Auburn can define preliminary capacity needs.

The City can then identify locations where standards are not anticipated to be met in the future and identify appropriate improvements. At the project level, the State Environmental Policy Act (SEPA) process will continue to guide the more specific planning and analysis efforts.

Level of Service Standards

LOS standards can help identify where and when transportation improvements are needed, and when development or growth will impact system operations. LOS provides a standard below which a transportation facility or system is not considered adequate.

LOS standards can also be used to evaluate the impact of proposed developments to the surrounding street system. They can assure that all developments are served by a safe, efficient and cost-effective street system. They can also be used to disclose impacts, identify remedial actions, and apportion costs between public and private sources.

The LOS standards shown in Table T-1b apply to the facility's location and its functional classification. A more detailed description of the level of service methodology is provided in the City of Auburn Comprehensive Transportation Plan (2012), page 5-4.

Table T- 1b Draft Roadway Capacity/Congestion LOS Standards

Roadway/Intersection	Maximum V/C Ratio/LOS	
Arterial Corridor	D*	
Signalized Intersection	D	
Unsignalized Intersection	D	
*Unless otherw ise specified in Chapter 2 of the City of Auburn Comprehensive Transportation Plan, 2012		

LOS standards are also the basis of an equitable traffic impact fee system, which require developments to pay a portion of the costs for capacity improvements to the transportation infrastructure.

In 2001, the City implemented a traffic impact fee program. The purpose of the fee is to mitigate traffic impacts more equitably while making the costs of development more predictable to developers. In 2007, the City implemented an additional transportation impact fee to address the impacts of heavy truck usage on the City's transportation system. Both fees are updated annually so that the fees are consistent with current project costs.

Measuring Transportation System Performance

The level of service for street segments or links is analyzed with two primary purposes in mind. First, this site-specific LOS can be used, with the help of a travel demand model, to evaluate areas of congestion within a transportation network, leading to the development of a long-range transportation facilities plan. Second, arterial corridor LOS analysis can be used to assess concurrency or if facilities are meeting the LOS standards.

The City of Auburn currently uses Highway Capacity Manual methodologies to calculate levels of service. For arterials LOS are based on average travel speeds along a defined corridor. Table T-1c shows the 42 defined street corridors, LOS standards and most recent calculated LOS.

TABLE T-1c

Auburn Corridor Level of Service

				LOS	LOS

* Split LOS indicates directional LOS in either the East-West or North-South direction. Otherwise, the LOS is the same in both directions.

** Total travel time in the eastbound direction cannot exceed 1000 seconds for this corridor to meet the LOS Standard.

Concurrency (Adequate Public Facilities)

Concurrency involves matching public facilities and new development. The GMA extends concurrency to transportation facilities by requiring that new development be served by adequate roads and public transportation service, and that development is not permitted to cause these transportation facilities to operate below level of service standards that are adopted by local governments in their comprehensive plans.

In compliance with the GMA, adequate transportation system facilities must be available within six years of the time of occupancy and use of new development.

Capital Facilities Projects and Financing

The City's transportation facilities include projects totaling \$148,451,391. Tables T-2, T-2A and T-2B show the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table T-3 shows, operating budget impacts of \$994,842 are forecasted for transportation facilities during the six years 2017 – 2022.

Project Title: A Street NW - Phase 1 (3rd St NW to 14th St NW) Project Type: c207a0 Project Type: Capacity Project Manager: Matt Larson LOS C Description: Construct a new multi-lane arterial from 3rd Street NW to 14th Street NW. This project will improve mobility: corridor development. It is consistent with the Comprehensive Plan and completes a missing link of a north/ corridor. The project length is approximately three-quarters of a mile. The City purchased right-of-way from t property owner. If the property develops, some or a portion of those funds may be reimbursed to the City (to S251,000). Progress Summary: Pre-design was completed prior to 2007. Final design and environmental permitting were completed in 201 construction was completed in 2013. Major plantings are scheduled in 2015 as part of the wetland monitorir required to continue until 2023. Future Impact on Operating Budget: The annual maintenance cost for this project is estimated to be \$25,830. -	Auburn Way Sou cp1118	th Pedestrian Imp	. (Dogwood	l St SE to Fir	St SE)	TIP #
Project Type:	Capacity, Non-Me	otorized				
Project Manager:	Jacob Sweeting				LOS	Corridor ID#
Description:	-					
This project will construct	pedestrian improv	ements along Auburr	Way South	between Dogw	ood Street SE	and Fir Street
SE that are consistent wi						
access management, a r						
SE and street lighting.						
Progress Summary:						
The City was awarded \$ ⁻ Muckleshoot Indian Tribe	contribution, WSD	OT contribution for p	aving, and Pi	rivate utility cor	ntributions for u	ndergrounding
Project design began in 2	2012. Design was o	completed in 2015 a	nd construction	onis scheduled	to be complete	ed in 2015.
Future Impact on Oper	ating Budget:					
This project will have no i		ating budget for stree	t maintenanc	e.

ARTERIAL STREET FUND (102)

Six Year Capital Facilities Plan, 2016-2021

Project Title:	M Street Underpass (3rd St SE to 8th St SE)	TIP # 5
Project No:	c201a0	
Project Type:	Capacity	
Project Manager:	Ryan Vondrak	LOS Corridor ID# 6

Capital Facilities Plan

Special Revenue Fund

Description:

Construction of a grade separated railroad crossing of M Street SE at the BNSF Stampede Pass tracks.

Progress Summary:

100% Design Drawings and right of way acquisition were completed in 2011. Construction started in early 2012 and will be complete during 2014. Debt Service is scheduled each year through 2041.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$21,827.

Activity:

Project No:	asbd12	
Project Type:	Capacity	
Project Manager:	TBD	LOS Corridor ID# 5

Capital Facilities Plan

Special Revenue Fund

Description:

This project will construct a four-lane street section that includes sidewalks, gutters, landscaping and streetlights on M St NE between south of E Main St and 4th St NE.

Progress Summary:

Pre-design will be completed during 2018 to refine project scope, alignment, and cost.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$1,500.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Harvey Rd NE/8th St NE Intersection Improvements	TIP # 17
Project No:	cp0611	
Project Type:	Capacity	
Project Manager:	None	LOS Corridor ID# 5,19

Description:

Add one eastbound through/right turn-lane on 8th St NE to the west of Harvey Rd. Modify traffic signals and traffic channelization to accommodate the new lane. The additional lane will reduce traffic delays and queuing at the intersection of Harvey Rd and 8th St NE in all directions. This project will reconstruct M St NE from 4th St NE to 8th St NE, a segment of roadway approximately 0.3 miles long with a four-lane cross-section. The reconstruction will address the existing poor pavement condition and fill in any gaps in the sidewalk network.

Progress Summary:

Project was completed in 2010. Ongoing budget is for Public Works Trust Fund Loan debt payments scheduled through 2028.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2016-2021

Project Title:West Valley Highway Improvements (15th Street NW to W Main Street)TIP # 49Project No:asbd13Project Type:CapacityProject Manager:TBDLOS Corridor ID# 35

Capital Facilities Plan

Special Revenue Fund

Description:

This project scope includes pavement rehabilitation and re-channelization, roadway widening, bicycle lanes, pedestrian facilities, roadway lighting, required storm system improvements, and Intelligent Transportation System Improvements.

Progress Summary:

Survey, base mapping and pre-design are planned to be completed in 2018 to complete preliminary plans and refine project cost-estimate.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	A Street SE & Lakeland Hills Way SE Intersection Safety & Capacity In	np. TIP # 52
Project No: Project Type:	asbd15 Capacity, Safety	
Project Manager:	TBD	LOS Corridor ID# xx

Capital Facilities Plan

Special Revenue Fund

Description:

This project will study traffic operations, safety, and prepare a preliminary design intersection improvements.

Progress Summary:

Analysis, preliminary design, and construction cost estimate will be completed in 2016. Future phases will be programmed as funding becomes available.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Special Revenue Fund

Project Title:	Kersey Way SE Corridor Study	TIP # 54
Project No:	asbd11	
Project Type:	Capacity	
Project Manager:	TBD	LOS Corridor ID# 4

Description:

This project will study improvements to the Kersey Way SE corridor from the White River Bridge to the southern city limits. The study will develop the scope and costs for horizontal /vertical geometric roadway improvements, provide roadside hazard mitigation, street lighting and non-motorized trail construction. The project length is approximately two miles.

Progress Summary:

Design will begin in 2015 following the completion of the update to the Comprehensive Plan.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Activity:

	Capacity					
Project Manager: 1	TBD				LOS	Corridor ID# 2
Description:						
This project will improve a	access, safety and	d operations for pede	estrian, bicycl	lists and motoriz	ed vehicles at th	ne intersections
of 3rd St NE/Auburn Ave,	4th St NE/Auburn	h Ave, and 4th St NE/	Auburn Way	North. Improver	ments include a	new traffic
signal at 3rd St NE to ad	d a missing pede	strian crossing and a	accommodate	e the northbound	l left-turn mover	nent; improving
pedestrian facilities to me						
traffic signal at Auburn Wa						
Progress Summary:						
Survey and pre-design we	ere started in 201	0-2011. Pre-design	will be comple	eted in 2017, wi	th construction s	cheduled for
2018, pending grant fundi				,		
Future Impact on Opera						
This project will have no ir	mpact on the ope	rating budget for stre	et maintenan	ice.

ARTERIAL STREET FUND (102) Capital Facilities Plan Six Year Capital Facilities Plan, 2016-2021 **Special Revenue Fund** Project Title: SR-18 to Auburn Way South (SR-164) Bypass TIP # 61 Project No: срхххх Project Type: Capacity Project Manager: TBD LOS Corridor ID# N/A **Description:** This project will permit and construct a new interchange at SR-18 and over a mile of new classified roadway connecting the new interchange to Auburn Way South (SR-164). This project will create a new road connecting SR-18 and SR-164 to bypass Auburns urban center serving the Muckleshoot Reservation and regional traffic to the Enumclaw area. **Progress Summary:** This project was originally analyzed by WSDOT's Auburn Way South (SR-164) Route Development Plan. The State Legislature allocated \$15 Million for the new eastbound SR-18 off-ramp serving this bypass road in 2017-2019. The Muckleshoot Indian Tribe is anticipated to donate the property necessary to accommodate the off-ramp and connecting road to Auburn Way South. The route of the new roadway will be determined after completion of a feasibility study. Future Impact on Operating Budget: This annual maintenance cost for this project is estimated to be \$37,500. Activity: 2015 YE 2016 Year End **Funding Sources:** Prior to 2015 Estimate 2016 Budget 2017 Budget **Project Total** Unrestricted Street Revenue Grants- Unsecured (Fed, State, Local) Traffic Impact Fees Other (WSDOT) 1,000,000 Other (MIT) **Total Funding Sources:** 1,000,000 **Capital Expenditures:** 1,000,000 Desian Right of Way Construction 1,000,000 **Total Expenditures: Forecasted Project Cost:** Total 2018 2019 2020 2021 2016-2021 Funding Sources: Unrestricted Street Revenue Grants- Unsecured (Fed, State, Local) Traffic Impact Fees Other (WSDOT) 1.500.000 12.500.000 _ 15,000,000 Other (MIT) 2,000,000 5,000,000 7,000,000 **Total Funding Sources:** 17,500,000 22,000,000 **Capital Expenditures:** 1,500,000 2,500,000 Desian Right of Way 2,000,000 2,000,000

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Special Revenue Fund

- . .

Project Title:	22nd Street NE & I St NE Intersection	TIP # 69
Project No:	cp1513	
Project Type:	Capacity (Safety)	
Project Manager:	TBD	LOS Corridor ID# 21

Description:

This project includes the design and construction of a modern roundabout at the 22nd Street NE and I Street NE intersection. This is currently a 4-way stop controlled intersection.

Progress Summary:

State grant was awarded for design in 2015. Construction phase is dependent on securing future grants or other local funding.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

Capital Facilities Plan
Special Revenue Fund

Project Title:	Main Street Signal Upgrades	TIP # 21
Project No:	cp1406	
Project Type:	Non-Capacity	
Project Manager:	Luis Barba	LOS Corridor ID# 11

Description:

Reconstruct the existing traffic signals at C St NW and W Main St and at E Main St and Auburn Ave/A St SE. The new C St NW signal would provide protected left-turn phasing for C St, and would provide additional safety related to the railroad preemption. The Auburn Ave/A St signal would replace one of the City's oldest signals which has exceeded its design life.

Progress Summary:

Design started in 2014 and construction is expected to start in 2015.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Project No:	cp1110	
Project Type:	Safety (Non-Capacity)	
Project Manager:	James Webb	LOS Corridor ID# 10,33

Capital Facilities Plan

Special Revenue Fund

Description:

Study the A Street SE corridor between 6th Street SE and Lakeland Hills Way SE including 41st St SE from D St SE to C St SE. The study will review the safety and access needs of the traveling public and the adjacent properties.

Progress Summary:

In-house pre-design was completed to refine project scope, alignment, and identify design issues. 2015 design will complete conceptual corridor plan for future improvements.

Future Impact on Operating Budget:

This study will have no impact on the operating budget for street maintenance.

Capital Facilities Plan Special Revenue Fund

Project Title:	ITS Dynamic Message Signs
Project No:	asbd16
Project Type:	Non-Capacity (ITS)
Project Manager:	TBD

TIP # 50

LOS Corridor ID# N/A

Description:

This project funds the design and construction of Dynamic Message Signs at various locations throughout the City. Dynamic message signs are an important Intelligent Transportation System (ITS) tool for providing information to roadway users. Priority locations for sign placement are based on the Comprehensive Transportation Plans ITS map and include Auburn Way N, Auburn Way S, W Valley Highway, E Valley Highway and Lea Hill Road.

Progress Summary:

The first phase of this project is scheduled to begin in 2016 or sooner if grant funding becomes available.

Future Impact on Operating Budget:

The annual maintenance cost for this project is estimated to be \$5,000.

Activity:

Project Title:	Traffic Signals Safety Improvements					
Project No: Project Type:	cp1501 Non-Capacity					
Project Manager:	Joel Chalmers					
a 1 <i>1</i>						

Description:

Improve traffic signal phasing and timing, and improve visibility of traffic signal heads.

Progress Summary:

Federal Grant was awarded in 2014. Design phase began in 2015 and construction is scheduled for completion in 2016.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

Six Year Capital Facilities Plan, 2016-2021

Project Title:15th Street SW ReconstructionProject No:cpxxxxProject Type:PreservationProject Manager:TBD

LOS Corridor ID# 12

TIP # 7

Capital Facilities Plan

Special Revenue Fund

Description:

This project will evaluate improvements to the Union Pacific at-grade rail-crossings as well as the vertical sight distance to the Interurban Trail crossing to the west of the tracks. This project could include pavement preservation and may be accomplished through the Pavement Preservation Program. A cost estimate for planning purposes is provided below.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2016-2021

Project Title:Lake Tapps Parkway PreservationProject No:spbd02Project Type:Non-Capacity, PreservationProject Manager:Jai Carter

Description: The Lake Tapps Parkway Preservation project will complete a patch and overlay of pavement between the Auburn/Sumner City limit and Lakeland Hills Way including all required ADA improvements to curb ramps, sidewalks, and pedestrian signals.

Progress Summary:

Federal Grant was secured in 2014.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

Project Title:Annual Arterial Street Preservation ProgramProject No:VariesProject Type:Non-Capacity, PreservationProject Manager:Jai Carter

LOS Corridor ID# N/A

Description: Implement regular pavement maintenance and/or rehabilitation of various classified streets citywide. These projects may include a combination of overlays, rebuilds, and spot repairs. This program is funded through a 1% utility tax that was adopted by City Council during 2008.

Progress Summary:

Program continues to successfully complete annual patching and overlay projects citywide.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

Project Title:Annual Arterial Crack Seal ProgramProject No:spbd03Project Type:Non-Capacity, PreservationProject Manager:Jai Carter

LOS Corridor ID# N/A

Description:

Implement regular maintenance of various classified streets by sealing newly formed cracks. Sealing the cracks will prolong the life of the pavement by stopping water from draining into the sub-base of the road.

Progress Summary:

Program continues to successfully extend pavement life pavement citywide.

Future Impact on Operating Budget:

There is no impact to the street maintenance budget.

WATER

Current Facilities

The City of Auburn water utility provides water supply, treatment, transmission, storage, distribution, and service connections to in-City residences and businesses. The City also provides water to the City of Algona and Water District #111 under wholesale agreements. The water system consists of wells, springs and interties for source; chlorination stations and corrosion control for treatment; pump stations, pressure reducing stations and pipelines for transmission; and steel and concrete enclosed reservoirs for storage. Table W-1, "Facilities Inventory", lists the facilities along with their current capacities and approximate locations.

Level of Service (LOS)

The City's Comprehensive Water Plan summarizes the design criteria and service polices for the City's water distribution system.

Capital Facilities Projects and Financing

The City of Auburn's water system anticipates seven capacity projects in the amount of \$16,593,665 and eighteen non-capacity projects totaling \$19,164,489 for a 6-year planning expectation total of \$35,758,154. The financing plan is shown in Table W-2 followed by individual worksheets showing the project details.

The capacity projects will increase water supply quantities, storage, and distribution for growth of retail customers. The non-capacity projects will provide for pipeline improvements and replacements, delivery pressure improvements, water quality enhancements, comprehensive and resource management planning, pump station upgrades, telemetry system improvements, and meter upgrades.

Impact on Future Operating Budgets

As Table W-3 shows, operating budget impacts of \$2,400 are forecasted for water supply and distribution facilities during the six years 2017 – 2022.

Six Year Capital Facilit	ies Plan, 2016-20	21			Ent	erprise Fund
Project No: Project Type:	Fulmer Well F cp1107 Capacity Fenhaus / Voi	ïeld Improveme ndrak	nts			
Description:						
Evaluate Wells 2, 6 and 7 capacity of the existing fa supply capacities, along incorporate recommenda 2015 Comprehensive W	acilities and infrast with a review of th ations for facility in	tructure. The evaluati e treatment facility op nprovements.	on will include	an assessmer	t of individual a	nd total well
Progress Summary:						
The first phase of the stu	dy is complete. Re	ecommended equipm	nent will be des	signed and inst	alled in 2016 ar	nd 2017.
Future Impact on Oper	ating Budget:					
No significant impact.

WATER FUND (430)

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Water Meter & Billing System Improvements
Project No:	cp1317
Project Type:	Non-Capacity
Project Manager:	Snyder/Fenhaus

Description:

Based on a completed study, implement and construct selected improvements in automated metering technology, generally referred to as Advanced Metering Infrastructure (AMI). Benefits include more accurate meter reads, daily information for quicker detection of leaks, and improved efficiency of billing operations.

2015 Comprehensive Plan CIP ID G-09

Progress Summary:

Study is complete. Installation of meters and metering infrastructure to begin in 2015.

Future Impact on Operating Budget:

No significant impact.

Activity:

Activity:		2015 YE			2016 Year End

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Enterprise Funds

Project Title:	24" White River Crossing
Project No:	срхххх
Project Type:	Non-Capacity
Project Manager:	TBD

Description:

The facilities evaluation study conducted in 2013-2014 found a suspected leak on the 24" steel transmission main crossing the White River. The approximate location was determined, but further investigation is required to assess the degree and magnitude of the leak. This project will provide for full replacement of the river crossing. 2015 Comprehensive Plan CIP ID D-11

Progress Summary:

Design is anticipated to be completed in 2016 with construction completed in 2017.

Future Impact on Operating Budget:

No significant impact

SANITARY SEWER

Current Facilities

The City's sanitary sewer service area encompasses approximately 28-square miles which are primarily within the City limits, but includes a total of approximately ½ square mile within Auburn's Proposed Annexation area (PAA). The City contracts with King County for sewage treatment and disposal. The City's Sanitary Sewer Utility is responsible for the collection and transmission of wastewater to the King County trunk lines.

The City's current inventory of approximately 197 miles of sewer lines serves the City's sewer service area. Table S-1, Facilities Inventory, lists the sewage collection and transmission facilities along with their capacities and locations.

Level of Service (LOS)

The Comprehensive Sewerage Plan for the Sewerage Collection System summarizes the level of service (LOS), or design criteria, for the City's sewage collection system. These standards represent the average quantities of sewage that the system is designated to accommodate for residential, industrial, and commercial development.

Capital Facilities Projects and Financing

Investments in the City's sewage collection facilities include primarily non-capacity improvements and replacement projects. Anticipated replacements include replacement of aging sewer pipes and manholes in conjunction with arterial and local street improvements, and replacement of pipe identified through the sewer program's condition assessment process. The City will also undertake significant system assessment efforts including inspections and evaluations of siphons, pump stations, large diameter pipe, and specific areas of the City that shows high levels of inflow and infiltration. The City of Auburn's sewer system anticipates costs for thirteen non-capacity projects totaling \$12,751,000. Table S-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for sanitary sewer facilities during the six years 2017 – 2022.

SEWER FUND (431)

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Enterprise Funds

Project Title:	Sanitary Sewer Repair & Replacement/System Improvements Program
Project No:	sebd01
Project Type:	Non-Capacity (Repair and Replacement)
Project Manager:	Elwell

Description:

Repair and replace broken sewer mains and other facilities. These lines will be identified through television inspection and routine cleaning. This particular program includes proposed projects which do not have an approved Project Management Plan, or are not associated with the SOS or other transportation improvements. Anticipated projects include bi-annual, stand-alone, repair and replacement projects for sewer lines which are broken, misaligned, "bellied" or otherwise require an inordinate amount of maintenance effort or present a risk of backup or trench failure, and facilities which generate consistent odor complaints. Additionally, system improvements which enhance the ability to maintain service are included here. Comp Plan ID #1.

Progress Summary:

Anticipated projects for 2016-2021 include biennial repair and replacement projects.

Future Impact on Operating Budget:

This should decrease the operating budget by correcting the problems that require operation staff's attention.

Capital Facilities Plan Enterprise Funds

SEWER FUND (431)

Six Year Capital Facilities Plan, 2015-2020	

Project Title:	Sewer Vactor Decant Facility
Project No:	sebd03
Project Type:	Non-Capacity (Improvements)
Project Manager:	TBD

Description:

Currently the City hauls vactored sewage waste to the County landfill on a biweekly basis. The sewage sludge is considerably wet, thus City funds are paying for the disposal of water. This project consists of a study/analysis to assess the City's vactor disposal method and identify a cost-effective alternative to the status quo. Possible recommendations may include maintaining current operations, constructing a gravity decant facility, incorporating special equipment into the vactor truck to increase decanting ability, or purchasing specialized dewatering machinery. Comp Plan ID #3

Progress Summary:

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the expenses associated with hauling saturated waste to the County landfill.

Activity:

Project Title:	Manhole Ring and Cover Replacement
Project No:	sebd04
Project Type:	Non-Capacity (Repair and Replacement)
Project Manager:	TBD

Description:

As manholes and roads age and their condition deteriorates, access covers and the rings in which they sit can become loose and/or misoriented, and can become a road hazard requiring maintenance staff attention and increasing the City's liability. This annual project will replace approximately 50 sewer manhole rings and covers to maintain access to the sewer system and to decrease the likelihood of the manholes becoming road hazards. Some of these replacements may be in conjunction with other City capital projects. Comp Plan ID #7.

Progress Summary:

Future Impact on Operating Budget:

This project could decrease the future operating budget by reducing the need for staff to respond to loose manholes or lids.

Activity:

Project Title:	Sewer Pump Station Replacement/Improvement
Project No:	срхххх
Project Type:	Non-Capacity (Repair and Replacement/Improvements)
Project Manager:	TBD

Description:

Three sewer pump stations, the 8th Street Pump Station, Valley Meadows Pump Station, and 22nd Street Pump Station have been identified as needing renovation, replacement, and/or relocation based on condition, safety concerns, and to accommodate growth. The scope of these improvements has not yet been developed, but will be based on the Pump Station Condition Assessment project scheduled for 2016. Rehabilitation costs for the 3 pump stations have been estimated over a 6-year period (design one year, construct following year). Comp Plan ID #4.

Progress Summary:

Following the results of the systematic pump station evaluation study scheduled for 2016, the sequence or identification of pump stations requiring R&R, and detailed scope of improvements (one pump station rehabilitated every other year) for each of these stations will be developed.

Future Impact on Operating Budget:

This project will not have a significant effect on operating budget.

STORM DRAINAGE

Current Facilities

The City's storm drainage service area encompasses the municipal boundaries of the City. For management purposes the service area is divided into 60 drainage sub-basins. The City's drainage system consists of a combination of closed conveyance pipes and open ditch conveyance facilities, with six pumping stations. Table SD-1 Facilities Inventory lists the facilities along with their current capacities and location.

Level of Service (LOS)

The City's Comprehensive Drainage Plan summarizes the level of service (LOS), or design criteria, for the City's storm drainage system. Generally, these standards represent a 25-year/24-hour design storm capacity within the 60 drainage sub-basins.

Capital Facilities Projects and Financing

The City's storm drainage facilities anticipates two capacity projects in the amount of \$631,000 and 16 non-capacity projects totaling \$17,054,618 for a six-year planning expectation total of \$17,685,618. Table SD-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for storm drainage facilities during the six years 2017 – 2022.

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan
Enterprise Funds

Project Title:	M Street SE Storm Improvement
Project No:	cp1511
Project Type:	Capacity
Project Manager:	Matt Larson

Description:

This project will install a replacement pipe of greater capacity from 3rd Street SE to Main Street to alleviate periodic flooding in this area as a result of upstream flows conveying within replaced lines associated with earlier projects.

Progress Summary:

In design.

Future Impact on Operating Budget:

None, since this is a replacement pipe.

Capital Facilities Plan Enterprise Funds

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Pipeline Repair & Replacement Program
Project No:	sdbd03
Project Type:	Non-Capacity
Project Manager:	TBD

Description:

Projects identified as those requiring replacement of existing infrastructure. These projects support street repairs and other utility replacement programs, requiring coordination. Two projects have received funding transfers from this overall Program. Those transfers out of this Program and into projects are identified below as Expenditures. 2015 Comprehensive Storm Drainage Plan Project No. 1

Progress Summary:

During 2015 funding was transferred for the following projects: The 2011 Storm Repair & Replacement project (\$830,000) and the Mill Creek Wetland 5K Restoration project (\$75,000)

No significant impact.

Six Year Capital Facilities Plan, 2016-2021

:	30th Street NE Area Flooding, Phase 2
	sdbd01
e:	Non-Capacity
ager:	TBD

Project Manag

Project Title: Project No: Project Type

Construct a new storm system to drain stormwater from two multi-family developments at the west edge of the former CRISTA Ministries property. Currently, stormwater is discharged onto a depressed area on the CRISTA Ministries property where its infiltration is limited by high groundwater levels that occur during extended periods of high flows on the Green River. This phase would construct a new storm drain within I St. NE southward to connect into the upgraded 42-inch diameter (Phase 1) storm drain near the intersection at I St. NE and 30th St. NE. The 42-inch diameter line would have sufficient available capacity to convey the I St. NE flows. Key components of Phase 2 include: 1,760 feet of 15-inch diameter gravity storm drain, Catch basin and incidental grading to collect stormwater at the upstream end of system 2015 Comprehensive Storm Drainage Plan Project No. 4A

Progress Summary:

Future Impact on Operating Budget:

No significant impact.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	30th Street NE Area Flooding, Phase 3
Project No:	срхххх
Project Type:	Non-Capacity
Project Manager:	TBD

Description:

This project would reduce flooding in C St. NE by redirecting wet weather high flows southward to the 42-inch diameter (Phase 1) storm drain in 30th St. NE. By redirecting the C St. NE drainage into the Brannan Park system, these flows would no longer be affected by high water levels in Mill Creek. To avoid deepening the Phase 1 gravity line (and extensive retrofits to the Brannan Park pump station), this project would include a wet weather pump station and force main connection to 30th St. NE. The upgraded 42-inch diameter pipe in 30th St. NE would have sufficient capacity for these additional flows. Key components of Phase 3 include: Wet weather pump station (estimated capacity of 4.5 to 7 cfs), 1,730 feet of 15-inch diameter force main; Diversion structure in C St. NE for pump station 2015 Comprehensive Storm Drainage Plan Project No. 4B

STORM DRAINAGE FUND (432) Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Enterprise Funds

Project Title:	Mill Creek Wetland 5K Reach Restoration
Project No:	CP0746
Project Type:	Non-Capacity
Project Manager:	Chris Andersen

Description:

Mill Creek Wetland 5K reach (W5K) is a stream restoration project to provide improved conveyance and habitat along an approximate one mile reach of Mill Creek between West Main Street and SR 167. The project includes construction of a new larger stream culvert at 15th Street NW for improved hydraulic conveyance and fish passage, removal of invasive vegetation, native tree and shrub plantings. The project is being conducted in partnership with the Army Corps of Engineers under the Corps' Ecosystem Restoration Program. The City's cost share for construction is 35%, and the federal cost share is 65%. The value of City-owned lands used for the project are credited toward the City's cost share. Total federal funding for the project (not shown below) is approximately \$3.9 million based on the most recent Corps estimates of \$6 million for total project costs.

Progress Summary:

In construction. Project construction is scheduled to be complete in 2015.

Future Impact on Operating Budget:

Monitoring of the project is part of the overall project cost. Upon completion of construction, the Army Corps will monitor for five (5) years. Monitoring costs are subject to City cost share (35%); City share of estimated monitoring costs previously paid to Army Corps in 2014. Maintenance for the project is budgeted as part of the Environmental Services AEP and restoration site maintenance program.

Project Title:	Eastridge Manor Outfall Replacement
Project No:	cp1316
Project Type:	Non-Capacity
Project Manager:	Joel Chalmers

Description:

Replace the existing deteriorated outfall with new High Density Polyethylene (HDPE). Two existing outfalls may be combined into a single outfall. Improvements to the Golf Course conveyance system may be needed.

Progress Summary:

None

Future Impact on Operating Budget:

None

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Enterprise Funds

Project Title:	Vegetation Sorting Facility
Project No:	срхххх
Project Type:	Non-Capacity
Project Manager:	TBD

Description:

Evaluation to determine benefits and costs of acquiring property to use as a vegetation sorting facility prior to disposal or reuse of materials from storm drainage maintenance activities (e.g., pond and ditch cleaning). In addition, evaluate potential for use by other City Departments and by neighboring jurisdictions as a regional facility. If evaluation shows a reasonable benefit/cost ratio, budget is for property acquisition and site improvements to construct the vegetation sorting facility.

2015 Comprehensive Storm Drainage Plan Project No. 10

Progress Summary:

Future Impact on Operating Budget:

Impacts to the operating budget are included in subsequent years after acquisition of the right-of-way.

Project Title:	30th Street NE Area Flooding, Phase 1B
Project No:	срххх
Project Type:	Non-Capacity
Project Manager:	Kim Truong

Description:

This project will complete the Phase 1 project by completing the downstream system not completed in Phase 1A. Phase 1A replaced the existing 30-inch diameter pipe generally located along the 30th St. NE alignment toward I St. NE to improve drainage conditions in and around the north end of the Auburn Municipal Airport. Phase 1B will complete the remainder of the project by constructing the downstream system to the existing Brannan Park pump station.

Progress Summary:

Future Impact on Operating Budget: No significant impact.

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Enterprise Funds

Project Title:	23rd Street SE Storm Improvement
Project No:	срххх
Project Type:	Non-Capacity
Project Manager:	TBD

Description:

This project will improve existing drainage conditions in vicinity of 23rd St. SE & K St. SE. The 2018 project includes installation of a new 12-inch line along K St. SE from 23rd St. SE to 21st St. SE to alleviate flooding associated with the pedestrian entrance to Terminal Park Elementary School. The 2018 project includes replacement of the existing undersized line with a 15-inch line along 23rd St. SE from F St. SE to H St. SE.

PARKS, ARTS AND RECREATION

Current Facilities

The City of Auburn's park system consists of a total of 940.54 acres of neighborhood and community parks, special use areas, open space and linear parks (trails).

Table PR - 1 "Facilities Inventory" lists all park and recreation land in the City's park system along with their current capacity and location.

Level of Service (LOS)

The current LOS provided by the City's park system represents the existing inventory of Cityowned park acres divided by the 2015 City population of 75,545. This equates to 0.77 acres per 1,000 population for neighborhood parks, 2.96 acres per 1,000 population for community parks, 0.23 acres for linear parks, 5.12 acres for open space, and 3.37 acres for special use areas.

The proposed LOS provided by the City's park system represents the planned 2021 inventory of City-owned park acres divided by the 2021 projected City population of 85,912. This equates to 0.79 acres per 1,000 population for neighborhood parks, 3.12 acres per 1,000 population for community parks, 0.24 acres per 1,000 population for linear parks, 4.50 acres per 1,000 population for population for special use areas.

Capital Facilities Projects and Financing

Parks and Recreation facilities include sixteen capital projects at a cost of 20,710.000. Table PR – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

As Table PR - 3 shows, operating budget impacts of \$1,074,000 are forecasted for parks and recreation facilities during the six years 2017 - 2022.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Jacobsen Tree Farm Site Plan
Project No:	ср0609
Project Type:	Non-Capacity
Project Manager:	Daryl Faber

Description:

Implement Master Plan for the development of this 31 acre site. Lea Hill area is deficient in park acreage.

Progress Summary:

Future Impact on Operating Budget:

No significant impact due to master plan. Future park development will result in maintenance and utility expenses undeterminable at this time.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Auburn Community and Youth/Teen Center
Project No:	cp1412
Project Type:	Non-Capacity
Project Manager:	Jacob Sweeting

Description:

Construct a new approximately 13,000 sq. ft. Community Center facility as well as repurpose the existing Parks, Recreation and Arts Administration building into a Youth/Teen Center. The project includes site improvements associated with the construction at Les Gove Campus and administrative space for the Parks Department, meeting, activity and fitness space as well as a dedicated youth/teen center. The State has allocated \$3 million of the capital budget to the City to fund the project.

Progress Summary:

Design in 2014 & 2015, bid and begin construction in 2015 with construction completed in 2016.

Future Impact on Operating Budget:

The annual operating budget fiscal impact is estimated to be \$150,000

Activity:

Six Year Capital Facilities Plan, 2016-2021

Project Title:	BPA Trail on Lea Hill
Project No:	срхххх
Project Type:	Non-Capacity
Project Manager:	Faber

Description:

Develop a feasibility study related to constructability of a pedestrian trail linking the Jacobsen Tree Farm site to the west end of Lea Hill. This trail would follow the alignment of the Bonneville Power Administration (BPA) transmission lines from 132nd to 108th Avenue SE. Construction would be in phases based on constructability.

COMMUNITY AND YOUTH/TEEN CENTER

Current Facilities

The City of Auburn currently does not have a Community and Youth/Teen Center.

Level of Service (LOS)

The City does not have a current LOS for a Community Center. The proposed LOS of 244.44 square feet per 1,000 population is based on the projected inventory divided by the 2021 projected citywide population of 85,912.

Capital Facilities Projects and Financing

The proposed Community and Youth/Teen Center facility construction project will cost approximately \$9,000,000 and the project detail worksheet is presented on page 178.

Impact on Future Operating Budgets

As Table PR – 3 shows, estimated operating budget impact of \$900,000 is forecasted for the Community and Youth/Teen Center Facility during the six years 2017-2022.

Facilities Inventory Community and Youth/Teen Center

SENIOR CENTER

Current Facilities

The City of Auburn currently has one Senior Center. Table PR-5 Facilities Inventory lists the facility along with its current capacity and location.

Level of Service (LOS)

The current LOS of 154.43 square feet per 1,000 population is based on the existing inventory divided by the 2015 citywide population of 75,545. The proposed LOS of 135.80 square feet per 1,000 population is based on the projected inventory divided by the 2021 projected citywide population of 85,912.

Capital Facilities Projects and Financing

The CFP does not include any senior center capital facilities projects during 2016-2021.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for the senior center facility during the six years 2017 – 2022.

GENERAL MUNICIPAL BUILDINGS

Current Facilities

The current inventory of City government administration and operations facilities include 194,015 square feet for general government operations, 61,680 square feet for police services, and 38,646 square feet for fire protection, for a total of 294,341 square feet. Table GM – 1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 3,895.98 square feet per 1,000 population is based on the existing inventory divided by the 2015 citywide population of 75,545. The proposed LOS of 3,585.62 square feet per 1,000 population is based on the projected inventory divided by the 2021 projected citywide population of 85,912.

Capital Facilities Projects and Financing

The City's General Municipal Building facilities include five capital projects at a cost of \$1,195,000 and debt service at a cost of \$3,945,850 for a total of \$5,140,850. The projects include (1) \$150,000 for M&O Vehicle Storage Bay Improvements, (2) \$500,000 for Equipment Rental Vehicle Maintenance Bay (3) \$320,000 for M&O Fuel Tank (4) \$105,000 for M&O Lunchroom expansion (5) \$120,000 for Council Chamber Remodel and \$3,945,850 for City Hall Annex debt service costs. Table GM – 2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

Operating budget impacts annually are not yet forecast for general municipal buildings during the six years 2017 – 2022.

EQUIPMENT RENTAL FUND (550)
----------------------------	---

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Equipment Rental Vehicle Maintenance Bay
Project No:	cp1223
Project Type:	Non-Capacity
Project Manager:	Randy Bailey

Description:

Build additional vehicle bay at Equipment Rental shop for heavy equipment and large vehicles to improve efficiency and remove choke points. Adding a large vehicle bay with a large vehicle lift will enable us to perform inspections and maintenance on more than one large vehicle at a time, this becomes extremely important during emergency operations such as snow and ice events. The City currently has 2.5 maintenance bays, this project will add one more maintenance bay for a total of 3.5 bays.

Capital Facilities Plan Enterprise Funds

NAME OF FUND/DEPT **Capital Facilities Plan** Six Year Capital Facilities Plan, 2016-2021 **Enterprise Funds M&O Fuel Tank Replacement** Project Title: Project No: срхххх **Non-Capacity** Project Type: **Randy Bailey** Project Manager: **Description:** Replace our three 10,000 gallon underground tanks with new above ground tanks. Our existing tanks were installed in 1989 and they are single wall fiberglass tanks. The City's current insurance carrier will not insure these tanks once they become 25 years old which will occur in 2014. The city is looking at other insurance options that may remove this age restriction. It will be a benefit to the City to have the tanks above ground in the future due to the reduced maintenance and inspection cost. **Progress Summary:** Future Impact on Operating Budget: None Activity: 2015 YE 2016 Year End Funding Sources: Prior to 2015 Estimate 2016 Budget 2017 Budget **Project Total** Unrestricted Equip. Six Year Capital Facilities Plan, 2016-2021

Project Title:	M&O Lunchroom Expansion
Project No:	срхххх
Project Type:	Non-Capacity
Project Manager:	Randy Bailey

Description:

Expansion of the current lunchroom by redesigning the area to accommodate All-Staff meetings, provide for a training facility, lunch room and also serve as the Department Operations Center (DOC) during an emergency event. In addition, the design would include sliding doors which would allow the area to serve two purposes at once, for example, one half of the room being used as a DOC and the other half open to employees to use as a lunch/break room.

Progress Summary:

This project will be designed and built in 2015

COMMUNITY IMPROVEMENTS

Current Facilities

Community Improvements include sidewalk and traffic signal improvements, neighborhood traffic calming program, public art and phase 2 of the Auburn Environmental Park Boardwalk project.

Level of Service (LOS)

No Level of Service for community improvement projects have been identified at this time.

Capital Facilities Projects and Financing

The City's proposed Community Improvements include ten capital projects at a cost of \$4,389,070 and debt service at a cost of 1,335,600 for a total of \$5,724,670. Table CI-2 shows the proposed financing plan followed by individual work sheets showing the project detail.

Impact on Future Operating Budgets

As Table CI-3 shows, operating budget impacts of \$40,000 are forecasted for community improvement facilities during the six years 2017-2022.

TABLE CI-2

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan Capital Projects Fund

Project Title:	Citywide Sidewalk Repairs & Improvements	TIP #32
Project No:	Various	
Project Type:	Non-Capacity (Annual)	
Project Manager:	Jai Carter	LOS Corridor ID# N/A

Description:

Project funds sidewalk improvements at multiple locations throughout the City. A sidewalk inventory was completed in 2004. Annual projects are selected based upon criteria such as: gap closure, safe walking routes to schools, completion of downtown pedestrian corridor or "linkage", connectivity to transit service, ADA requirements, and "Save our Streets" (SOS) project locations.

Progress Summary:

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Activity:

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Annual Traffic Signal Replacement & Improvements	TIP #34
Project No:	Various	
Project Type:	Non-Capacity (Annual)	
Project Manager:	TBD	LOS Corridor ID# N/A

Capital Facilities Plan

Capital Projects Fund

Description:

This project includes replacing traffic signal cabinets and equipment, video detection cameras and pedestrian pushbuttons. This project will also make safety improvements to our signals including auxiliary heads and flashing yellow arrows, or capacity improvements such as right-turn overlap signals. The City uses current traffic counts and collision data to determine the intersections to improve.

Progress Summary:

The project is ongoing and continues to successfully complete annual traffic signal improvement projects citywide.

Future Impact on Operating Budget:

This project will have no impact on the operating budget for street maintenance.

Six Year Capital Facilities Plan, 2016-2021

Capital Facilities Plan
Capital Projects Fund

Project Title:	City Wetland Mitigation Projects
Project No:	cp1315
Project Type:	Non-Capacity
Project Manager:	Andersen

Description:

This project designs and constructs off-site wetland mitigation in the Auburn Environmental Park for participating development projects as approved through the City's development review process. Design, construction, monitoring, and maintenance of the mitigation is funded through wetland mitigation fees collected by the City.

Progress Summary:

Construction and monitoring are ongoing.

Future Impact on Operating Budget:

After construction, each wetland mitigation site is monitored and maintained for a period of three to ten years, depending on the specific requirements for the project. Funding for future year monitoring and maintenance is included in the development fees collected by the City, and is budgeted as part of the Capital Facilities Plan.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Auburn Environmental Park Boardwalk - Phase 2
Project No:	gcbd01
Project Type:	Non-Capacity
Project Manager:	Andersen

Description:

The Auburn Environmental Park (AEP) provides vegetated natural open space within an urbanized area. The AEP provides opportunities for local economic development, water quality improvement, storm water detention, flood control, fish and wildlife enhancement, visual resources, public education, and passive recreation, including walking trails and bird viewing amenities. In 2012, the City completed the construction of approximately 1,200 lineal feet of the first phase (Phase 1) of an elevated boardwalk trail in the Auburn Environmental Park (AEP). This trail extended from West Main Street through existing wetlands in the AEP terminating at the base of the Bird Viewing Tower constructed in 2009. As part of the construction of the elevated boardwalk, the City also installed interpretative signage, bench seating, limited new vehicle parking on Western Avenue and over two acres of wetland species of trees, plants and shrubs. Phase 2 of the elevated boardwalk trail would construct a combination of approximately 2,000 lineal feet of surface trail and elevated boardwalk trail from the current terminus at the Bird Viewing Tower to a connection with the Interurban Trail. The Phase 2 project will further previous and current Councils' visions of the AEP providing passive recreation and environmental education opportunities for all Auburn citizens.

Progress Summary:

This is a new capital improvement proposal.

Future Impact on Operating Budget:

Construction of the Phase 2 project is anticipated to incur approximately \$10,000 in annual operating costs to the City's operating budget. This operating cost is covered in existing program improvement funding for the Environmental Services portion of the Community Development and Public Works Department budget.

Capital Facilities Plan Capital Projects Fund

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Downtown Wayfinding Program
Project No:	gcbd03
Project Type:	Non-Capacity
Project Manager:	Lauren Flemister

Description:

Phase 1: The downtown Pedestrian Kiosks were developed in 2012 as a result of additional funding being available through Local Revitalization Financing. Nine locations were selected within Downtown Auburn for a pedestrian kiosk to be constructed. With the budget available, three kiosks were constructed in 2013 at the Interurban Trail, Sound Transit Plaza, and at 1st Street/South Division Street. Phase 1 proposes construction of three additional kiosks in 2016.

Phase 2: Develop an updated wayfinding program, both pedestrian and vehicular, that would initially begin within Downtown Auburn that could then be expanded Citywide. The current vehicular wayfinding program is lacking in aesthetic appeal, does not coordinate with the vision for Downtown Auburn, and needs refreshing. A design and color scheme have been established with the pedestrian kiosk design that an updated wayfinding program can build upon.

Six Year Capital Facilities Plan, 2016-2021

Project Title:	Green River Park Design
Project No:	gcbd04
Project Type:	Non-Capacity
Project Manager:	Daryl Faber

Description:

This project provides funding to complete of a Green River Park Master Plan. The City has recently received, via a property transfer from King County and the State of Washington, the riverfront property located along a bend in the Green River between 102nd and 104th Ave SE. These two parcels comprise an approximate 14 acre site, intended to be developed for public use. This future park continues more than 1,000 feet of water access. Much of the property is subject to shoreline regulations as well as other restrictions. Community input is vital to the long-term vision and success of the property.

Progress Summary:

Future Impact on Operating Budget:

No impact on the Parks Department Operating Budget. The City's funding of a Park Master Plan for this site is critical in an effort to receive grant funding and can be a reimbursable expense should funding be allocated for construction for the proposed park site.

Impact on Future Operating Budgets COMMUNITY IMPROVEMENTS

AIRPORT

Current Facilities

The City of Auburn operates the Auburn Municipal Airport, providing hangar and tie-down facilities/leasing space for aircraft-related businesses. As of 2012, there were approximately 96,036 take-offs and landings (aircraft operations) at the airport annually. Table A-1 "Facilities Inventory" lists the facilities with current capacity and location. The Airport Master Plan was completed in May 2015 for the period 2012 through 2032.

Level of Service (LOS)

The Auburn Municipal Airport Master Plan provides a maximum runway capacity (LOS standard) of 231,000 aircraft operations annually; one take-off or landing equals one aircraft operation. This LOS is recognized by the Federal Aviation Administration (FAA). The FAA requires the airport to have the capital facilities capacity (i.e., runways, taxiways, holding areas, terminal, hangars, water/sewer system, etc.) necessary to accommodate 100% of aircraft operations during any one year. By 2022 the Airport Master Plan forecasts the number of operations to be 198,623 – well below the capacity of the airport runway.

Capital Facilities Projects and Financing

The City's Airport facilities include eleven non-capacity capital projects at a cost of \$ 8,078,650. These projects include the runway enhancements project, west helicopter parking, facilities, access road improvements and land acquisition for future approaches. Table A-2 shows the proposed financing plan followed by individual worksheets showing the project detail.

Impact on Future Operating Budgets

There are no operating expense budget impacts forecast for the airport during the six years 2017 – 2022.

CEMETERY

Current Facilities

The City owns two cemeteries. The Mountain View Cemetery is a fully developed facility (50 acres and five buildings) that provides burial services and related merchandise for the community. The Pioneer Cemetery is a historic cemetery which is no longer used for burial purposes. Table C-1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 27 burial plots/niches per 1,000 population is based on the existing inventory divided by the 2015 citywide population of 75,545. The proposed LOS of 40 burial plots/niches per 1,000 population is based on the projected inventory divided by the 2021 projected citywide population of 85,912.

Capital Facilities Projects and Financing

The CFP does not include any Cemetery capital facilities projects during 2016 - 2021.

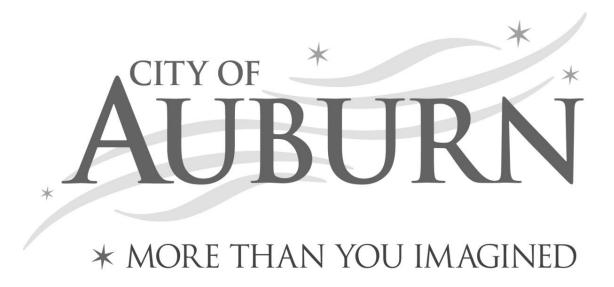

Impact on Future Operating Budgets

There are no operating budget impacts forecast for the cemetery during the six years 2017 – 2022.

2021 Projected Inventory Total	3,474	

POLICE

Current Facilities

The City of Auburn Police Department provides a full range of law enforcement services to the citizens of Auburn. All Divisions of the Auburn Police Department are housed at 340 East Main Street, Suite 201. The Divisions include Patrol, Investigations, Administrative Services, Inspectional Services, and Records.

Level of Service (LOS)

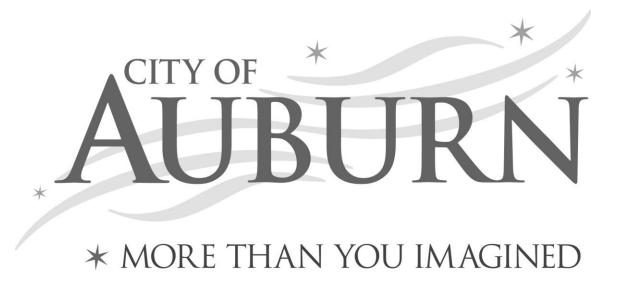

The City of Auburn Police Department contracts with SCORE, an outside entity, for housing of all misdemeanant inmates.

Capital Facilities Projects and Financing

The CFP does not include any Police capital facilities projects during 2016 - 2021.

Impact on Future Operating Budgets

The jail services expenses are dependent on the City's contract agreement with SCORE.

FIRE PROTECTION

Current Facilities

The Valley Regional Fire Authority provides fire protection and rescue services to a 25-square mile area which includes the City of Auburn, the City of Algona, the City of Pacific and King County Fire Protection District 31. The Valley Regional Fire Authority operates out of five stations, which are manned 24 hours per day. The North Station #31 also serves as the department headquarters and includes a hose and training tower. Each station is assigned fire apparatus (Engines and Aid Vehicles). Table F–1 "Facilities Inventory" lists the facilities along with their current capacity and location.

Level of Service (LOS)

The current LOS of 0.23 fire apparatus per 1,000 population is based on the existing inventory (17 fire apparatus) divided by the 2015 citywide population of 75,545. The proposed LOS of 0.21 fire apparatus per 1,000 is based on the 2021 planned inventory (18 fire apparatus) divided by the 2021 projected citywide population of 85,912.

Capital Facilities Projects and Financing

The Valley Regional Fire Authority includes one capital project at a cost of \$840,000 for fire apparatus enhancements and improvements. Table F-2 shows the proposed financing plan followed by an individual worksheet showing the project detail.

Impact on Future Operating Budgets

There are no operating budget impacts forecasted for fire protection during the six years 2017 – 2022.
